Franchthi Cave And Paralia:

Franchthi Cave and Paralia T. W. Jacobsen, 1987 **Franchthi Cave and Paralia** T. W. Jacobsen, William R. Farrand, 1987 With the long awaited publication of these three volumes we have the first thorough documentation of one of the most important prehistoric sites in the Mediterranean that of Franchthi Cave in the Argolid Peninsula of Greece American Anthropologist the archaeological and paleoenvironmental data from Franchthi Cave are unique in providing a site specific record of the cultural responses to great environmental changes Quarterly Research Fascicle I is an introduction to the monograph series It is complemented by a set of maps plans and profiles most of them oversized needed to match the scope of the project The maps are of excellent quality American Antiquity This volume is an introduction to the series as well as the site and excavations Its principal purpose is to provide a group of illustrations many of them oversized fundamental to the stratigraphic and environmental interpretation of the site **Franchthi Paralia--the Sediments, Stratigraphy, and Offshore Investigations** Tony J. Wilkinson, Susan T. Duhon, 1990 an interesting and valuable contribution to geoarchaeology Geoarchaeology The geomorphology of Franchthi paralia soil profiles classification of sediments stratigraphic succession submarine sediments holocene environment of the Argolid and more **The Origins And Spread Of Agriculture And Pastoralism In Eurasia** David R. Harris, 2024-11-01 As the first book to examine the origins and spread of agriculture and pastoralism in Europe and Asia as a whole this major contribution should be essential reading for archaeologists anthropologists biologists and geographers Adopting a novel approach to the subject the authors examine it first in terms of seven different disciplinary perspectives social ecological genetic linguistic biomolecular epidemiological and geographical Then 20 case studies are presented which are based primarily on archaeological and biological evidence and which relate to three major regions Southwest Asia Europe and Central Asia to the Pacific The book concludes with an overview of Eurasia as a whole The transition from hunting and gathering to agriculture had revolutionary consequences for human society It led to the emergence of urban civilizations and ultimately to humanity's almost complete dependence on relatively few domesticated animals and plants The subject has been much studied but the results have tended to be interpreted largely in terms of local cultural sequences with insufficient comparison made with evidence from other areas In contrast this book provides a continental scale framework with its scope extended to pastoralism because in Eurasia both the raising of livestock and the cultivation of crops were integral components of the agricultural revolution from its inception some 10 000 years ago Comprehensive and authoritative The Origins and Spread of Agriculture and Pastoralism in Eurasia should appeal strongly to the wide readership of students and specialists concerned with the prehistoric antecedents of modern civilization **The Archaeology of Island Colonization** Matthew F. Napolitano, Jessica H. Stone, Robert J. DiNapoli, 2021-05-25 This volume details how new theories and methods have recently advanced the archaeological study of initial human colonization of islands around the world including in the southwest Pacific the Mediterranean the Caribbean and Southeast Asia This

global perspective brings into comparison the wide variety of approaches used to study these early migrations and illuminates current debates in island archaeology Evidence of island colonization is often difficult to find especially in areas impacted by sea level rise and these essays demonstrate how researchers have tackled this and other issues Contributors show the potential of computer simulations of voyaging in determining the range of timing and origin points that were possible in the past They discuss how Bayesian modeling helps address uncertainties and controversies surrounding radiocarbon dating Additionally advances in biomolecular techniques such as ancient DNA aDNA paleoproteomics analysis of human microbiota and improved resolution in isotopic analyses are providing more refined information on the homelands of initial settlers on individual life courses and on population level migrations Islands offer rich opportunities to examine the exploratory nature of the human species providing insights into the evolution of watercraft technologies and wayfinding the impact of humans on their new environments and the motivations for their journeys The Archaeology of Island Colonization represents the innovative ways today s archaeologists are reconstructing these unique paleolandscapes Contributors Nasullah Aziz David Ball Todd J Braje Richard Callaghan John F Cherry Ethan Cochrane Robert J DiNapoli Andrew Dugmore Jon M Erlandson Scott M Fitzpatrick Amy E Gusick Derek Hamilton Terry L Hunt Thomas P Leppard Carl P Lipo Jillian Maloney Matthew F Napolitano Anthony Newton Maria A Nieves Col n Rintaro Ono Adhi Agus Oktaviana Timothy Rieth Curtis Runnels Magdalena M E Schmid Alexander J Smith Harry Octavianus Sofian Sriwigati Jessica H Stone Orri V steinsson A volume in the series Society and Ecology in Island and Coastal Archaeology edited by Victor D Thompson Personal Adornment and the Construction of Identity Hannah V. Mattson, 2021-06-09 Objects of adornment have been a subject of archaeological historical and ethnographic study for well over a century Within archaeology personal ornaments have traditionally been viewed as decorative embellishments associated with status and wealth materializations of power relations and social strategies or markers of underlying social categories such as those related to gender class and ethnic affiliation Personal Adornment and the Construction of Identity seeks to understand these artefacts not as signals of steady pre existing cultural units and relations but as important components in the active and contingent constitution of identities Drawing on contemporary scholarship on materiality and relationality in archaeological and social theory this book uses one genre of material culture items of bodily adornment to illustrate how humans and objects construct one another Providing case studies spanning 10 countries three continents and more than 9 000 years of human history the authors demonstrate the myriad and dynamic ways personal ornaments were intertwined with embodied practice and identity performativity the creation and remaking of social memories and relational collections of persons materials and practices in the past The authors careful analyses of production methods and composition curation heirlooming and reworking decorative attributes and iconography position within assemblages and depositional context illuminate the varied material and relational axes along which objects of adornment contained social value and meaning When paired with the broad temporal and geographic

scope collectively represented by these studies we gain a deeper appreciation for the subtle but vital roles these items played in human lives

Communities, Landscapes, and Interaction in Neolithic Greece Apostolos Sarris, Evita Kalogiropoulou, Tuna Kalayci, Evagelia Karimali, 2018-08-17 The last three decades have witnessed a period of growing archaeological activity in Greece that have enhanced our awareness of the diversity and variability of ancient communities New sites offer rich datasets from many aspects of material culture that challenge traditional perceptions and suggest complex interpretations of the past This volume provides a synthetic overview of recent developments in the study of Neolithic Greece and reconsiders the dynamics of human environment interactions while recording the growing diversity in layers of social organization It fills an essential lacuna in contemporary literature and enhances our understanding of the Neolithic communities in the Greek Peninsula

Siren Feasts Andrew Dalby, 2013-04-15 Cheese wine honey and olive oil four of Greece's best known contributions to culinary culture were already well known four thousand years ago Remains of honeycombs and of cheeses have been found under the volcanic ash of the Santorini eruption of 1627 BC Over the millennia Greek food diversified and absorbed neighbouring traditions yet retained its own distinctive character In *Siren Feasts* Andrew Dalby provides the first serious social history of Greek food He begins with the tunny fishers of the neolithic age and traces the story through the repertoire of classical Greece the reputations of Lydia for luxury and of Sicily and South Italy for sybaritism to the Imperial synthesis of varying traditions with a look forward to the Byzantine cuisine and the development of the modern Greek menu The apples of the Hesperides turn out to be lemons and great favour attaches to Byzantine biscuits Fully documented and comprehensively illustrated scholarly yet immensely readable *Siren Feasts* demonstrates the social construction placed upon different types of food at different periods was fish a luxury item in classical Athens though disdained by Homeric heroes It places diet in an economic and agricultural context and it provides a history of mentalities in relation to a subject which no human being can ignore

provides a uniquely broad assessment of contemporary archaeological theory methods and practice throughout the world

Europe in the Neolithic A. W. R. Whittle, 1996-05-23 Dr Whittle reviews the latest archaeological evidence on Neolithic Europe from 7000 to 2500 BC Describing important areas sites and problems he addresses the major themes that have engaged the attention of scholars the transition from a forager lifestyle the rate and dynamics of change and the nature of Neolithic society He challenges conventional views arguing that Neolithic society was rooted in the values and practices of its forager predecessors right across the continent The processes of settling down and adopting farming were piecemeal and slow Only gradually did new attitudes emerge to time and the past to the sacred realms of ancestors and the dead to nature and to the concept of community Unique in its broad and up to date coverage of long term processes of change on a continental scale this completely rewritten and revised version of Whittle's *Neolithic Europe* a survey reflects radical changes in the evidence and in interpretative approaches over the past decade

Sacred Darkness Holley Moyes, 2012-04-15 Caves have been used in various ways across human society but despite the persistence within popular culture of the iconic caveman deep caves were never used primarily as habitation sites for early humans Rather in both ancient and contemporary contexts caves have served primarily as ritual spaces In Sacred Darkness contributors use archaeological evidence as well as ethnographic studies of modern ritual practices to envision the cave as place of spiritual and ideological power that emerges as a potent venue for ritual practice Covering the ritual use of caves in Europe Asia Australia Africa Mesoamerica and the US Southwest and Eastern woodlands this book brings together case studies by prominent scholars whose research spans from the Paleolithic period to the present day These contributions demonstrate that cave sites are as fruitful as surface contexts in promoting the understanding of both ancient and modern religious beliefs and practices This state of the art survey of ritual cave use will be one of the most valuable resources for understanding the role of caves in studies of religion sacred landscape or cosmology and a must read for any archaeologist interested in caves
