Francis Bacon And The Project Of Progress:

Francis Bacon and the Project of Progress Robert K. Faulkner, 1993 The wild magic is taking its toll on the land Many Heralds and Herald Mages have died fighting to preserve the peace Even Vanyel the most powerful of the Herald Mages is almost at the end of his strength in need of a respite from the dual threats of war and dark magic But for Vanyel there can be no rest Not when his Companion Yfandes receives a summons which can't be ignored a desperate cry for help which draws them both into the heart of a magical holocaust in the neighboring kingdom Almost overwhelmed by the devastation they discover there Herald Mage and Companion must try to unravel this tragic mystery Is the young Prince Tashir a newly Chosen Herald who can't control his own magic responsible for the destruction Or is Tashir a pawn in a deeper more deadly game and if so will Vanyel be able to find and defeat the true destroyer before this master of dark powers can strike again Don't miss MAGIC'S PAWN the first novel The Last Herald Mage trilogy [Francis Bacon's Inquiry Touching Human Nature](#) Svetozar Minkov, 2010-05-10 Francis Bacon's Inquiry Touching Human Nature is a study of Francis Bacon's moral philosophy in its relation to the enlightenment project he helped launch Since Bacon is one of the founders of technological modernity the book presents a meditation on the presuppositions and character of modern life In its distinctiveness modern life is characterized by a rejection as well as a reinterpretation of the classical and Christian approaches to life and conceptions of virtue Svetozar Minkov follows closely Bacon's confrontation with the traditional views on courage moderation justice wisdom love and ways of dealing with death and general adversity Bacon had a comprehensive vision of the human situation He can help us think through the relation between power and wisdom And because he saw the costs or dangers of modern life as clearly as he predicted and helped bring about its advancements and boons Bacon is a thinker who addresses directly and deeply our own perplexities **The Kingdom of Science** Paul A. Olson, 2002-01-01 The Kingdom of Science examines Baconian utopias as blueprints for a scientific sociology of knowledge that founded a new social and economic world in the seventeenth century Looking backward Paul A Olson begins with More's Utopia and Shakespeare's The Tempest static state utopias designed to woo us toward a moral as opposed to a scientific reform To these Olson then contrasts the primary subjects of his study Bacon's New Atlantis the Commonwealth educational utopias and the utopianism of Adam Smith and his Utilitarian followers These later utopias increasingly point to an ideal world to be dominated by a science linked to technology compelled education and competitive capitalism They posit as their end the conquest of nature and use as their means the routinizing of research and education Their visions Olson argues lie at the center of the educational models adopted by mainstream British and American policymakers in the last century and a half despite the warnings of both conservative and radical critics concerning their potential consequences for the environment and for culture The challenge Olson presents for those responsible for forging our social future is creating visions sufficient to energize human groups while allowing both for the critical reflection necessary for constructive policy debate and for the action necessary to prevent

environmental chaos and cultural disruption The Kingdom of Science is a companion to Olson's earlier book The Journey to Wisdom and carries the assumptions of that patristic medieval study into the early modern and modern periods Kant and the Possibility of Progress Paul T. Wilford, Samuel A. Stoner, Samuel Stoner, 2021-06-04 Immanuel Kant 1724 1804 transformed the philosophical cultural and religious landscape of modern Europe Emphasizing the priority of practical reason and moral autonomy Kant's radically original account of human subjectivity announced new ethical imperatives and engendered new political hopes This collection of essays investigates the centrality of progress to Kant's philosophical project and the contested legacy of Kant's faith in reason's capacity to advance not only our scientific comprehension and technological prowess but also our moral political and religious lives Accordingly the first half of the volume explores the many facets of Kant's thinking about progress while the remaining essays each focus on one or two thinkers who play a crucial role in post Kantian German philosophy J G Herder 1744 1803 J G Fichte 1762 1814 G W F Hegel 1770 1831 S ren Kierkegaard 1813 1855 Friedrich Nietzsche 1844 1900 Walter Benjamin 1892 1940 and Martin Heidegger 1889 1976 This two part structure reflects the central thesis of the volume that Kant inaugurates a distinctive theoretical tradition in which human historicity is central to political philosophy By exploring the origins and metamorphoses of this tremendously influential tradition the volume offers a timely perspective on fundamental questions in an age increasingly suspicious of the Enlightenment's promise of universal rational progress It aims to help us face three sets of questions 1 Do we still believe in the possibility of progress If we do on what grounds If we do not why have we lost the hope for a better future that animated previous generations 2 Is the belief in progress necessary for the maintenance of today's liberal democratic order Does a cosmopolitan vision of politics ultimately depend on a faith in humanity's gradual asymptotic realization of that lofty aim 3 And if we no longer believe in progress can we dispense with hope without succumbing to despair **Leadership and the Unmasking of Authenticity** Brent Edwin Cushner, Mark A. Menaldo, 2018 Leadership and the Unmasking of Authenticity presents a philosophic treatment of the core concept of authentic leadership theory with a view toward illuminating how authors in the history of philosophy have understood authenticity as an ideal for humanity Such an approach requires a broader view of the historical origins of authenticity and the examination of related ideas such as self knowledge and deception The chapters of this book illuminate the conflict between the contemporary understanding of authenticity and traditional philosophy by revisiting the ideas of thinkers who express self knowledge as a cornerstone of their philosophy Mysteries of State in the Renaissance Colm Gillis, 2014-08-28 Government decisions shape our lives but how much do we know about the foundations of modern political thought Theorists in the Renaissance constructed the ideological world we inhabit They claimed to have mastered natural secrets whilst also promising perpetual flawless and scientifically demonstrable rule Selective applications of artistic themes religious symbols imperialistic concepts and spells cast by intellectual magic helped advance sovereign rule By mid 17th century these speculations were spinning an elaborate web of

control If we wish to understand myths of our current age the intellectual mystique enshrouding origins of the modern State must first be revealed **Republics Ancient and Modern, Volume II** Paul A. Rahe,2017-11-01 This is a work vast in scale soaring in its scholarly ambition and magnificent in its achievement The author s command of the primary sources is staggering in breadth and depth deftly orchestrated and rich with insight Deploying an avalanche of evidence Rahe shows how alien the modern project in all its diverse versions was to the classics as well as the Bible Thomas L Pangle Political Theory *Francis Bacon's New Atlantis in the Foundation of Modern Political Thought* Kimberly Hurd Hale,2013-10-10 Francis Bacon long considered a minor figure in the founding of modern political thought is now recognized as one of its foremost thinkers Bacon not only championed a new type and method of scientific inquiry he also developed a plan for how modern society could be re ordered to accommodate and promote scientific progress Bacon s scientific writings cannot be wholly understood apart from his political writings and many of his works combine the two topics so subtly that it is difficult to even place them in a definitive category in this book Kimberly Hurd Hale identifies the thread in Bacon s body of work that links modern science and liberalism Hale provides a detailed analysis of New Atlantis examining Bacon s place in the founding of modern political philosophy and the ways he relates to Plato Machiavelli and Hobbes Hurd argues that Bacon s demonstration of scientific rule in the New Atlantis is not meant as a blueprint for modern society rather it shows us the dangers of a scientific society devoid of liberty By examining what is troubling about the New Atlantis this book explains what problems lead to the emergence of Atlantean societies i e societies that are prosperous ambitious and doomed It shows that Bacon s portrait of Bensalem may provide the light necessary to guide those of us living in a world shaped by modern science through the dangerous seas **Literature and Utopian Politics in Seventeenth-Century England** Robert Appelbaum,2002-04-04 Hundreds of writers in the English speaking world of the seventeenth century imagined alternative ideal societies Sometimes they did so by exploring fanciful territories such as the world in the moon or the nations of the Antipodes but sometimes they composed serious disquisitions about the here and now proposing how England or its nascent colonies could be conceived of as an Oceana or a New Jerusalem This book provides a comprehensive view of the operations of the utopian imagination in literature from 1603 to the 1660s Appealing to social theorists literary critics and political and cultural historians this volume revises prevailing notions of the languages of hope and social dreaming in the making of British modernity during a century of political and intellectual upheaval **God and the Crisis of Freedom** Richard Bauckham,2002-01-01 This book outlines a biblical understanding of freedom and the particular ways in which Christians choose to exercise that freedom in response to major issues confronting the world today Specifically Bauckham constructs a Christian understanding of freedom explores the authority of Scripture in modern and postmodern contexts and also examines themes of tradition ethics oppression and ecology as they relate to issues of freedom and authority

Enlightenment and Secularism Christopher Nadon,2013-04-18 Enlightenment and Secularism is a collection of twenty

eight essays that seek to understand the connection between the European Enlightenment and the emergence of secular societies as well as the character or nature of those societies The contributors are drawn from a variety of disciplines including History Sociology Political Science and Literature Most of the essays focus on a single text from the Enlightenment borrowing or secularizing the format of a sermon on a text and are designed to be of particular use to those teaching and studying the history of the Enlightenment within a liberal arts curriculum

Exploring the Facets of Revenge

,2020-04-14 This volume was first published by Inter Disciplinary Press in 2012 The present book assesses the multifaceted phenomenon of revenge and tries to open a hatch to the human comprehension of vengeance its roots role and functions in philosophy history societies and literature It introduces studies as they were presented at the Inter Disciplinary Net s 2nd Global Conference on Revenge which took place in July 2011 at Mansfield College in Oxford University

Civil Religion in Modern Political Philosophy Steven Frankel,Martin D. Yaffe,2020-07-15 Inspired by Machiavelli modern philosophers held that the tension between the goals of biblical piety and the goals of political life needed to be resolved in favor of the political and they attempted to recast and delimit traditional Christian teaching to serve and stabilize political life accordingly This volume examines the arguments of those thinkers who worked to remake Christianity into a civil religion in the early modern and modern periods Beginning with Machiavelli and continuing through to Alexis de Tocqueville the essays in this collection explain in detail the ways in which these philosophers used religious and secular writing to build a civil religion in the West Early chapters examine topics such as Machiavelli s comparisons of Christianity with Roman religion Francis Bacon s cherry picking of Christian doctrines in the service of scientific innovation and Spinoza s attempt to replace long held superstitions with newer progressive ones Other essays probe the scripture based anti Christian argument that religion must be subordinate to politics espoused by Jean Jacques Rousseau and David Hume both of whom championed reason over divine authority Crucially the book also includes a study of civil religion in America with chapters on John Locke Montesquieu and the American Founders illuminating the relationships among religious and civil history acts and authority The last chapter is an examination of Tocqueville s account of civil religion and the American regime Detailed thought provoking and based on the careful study of original texts this survey of religion and politics in the West will appeal to scholars in the history of political philosophy political theory and American political thought

Living with Other Creatures: Green Exegesis and Theology Richard Bauckham,2011-09-01 Richard Bauckham offers a fresh approach to the relationship between humanity and creation and our responsibility before God to steward wisely The Bible offers fresh and often innovative approaches to a wide range of the issues that arise in relating the Bible and Christian theology to the ecological concerns of our contemporary world Clear biblical teaching on ecology Encourages readers to a more responsible relationship to the planet Those interested in ecology and Christianity in tandem Anyone concerned with a greener world It aims to show that the subject than is commonly supposed While focusing especially on biblical material it also engages Francis of Assisi modern

Matter and Form Ann Ward,2009-01-01 Matter and Form

explores the relationship that has long existed between natural science and political philosophy Plato s Socrates articulates the Ideas or Forms as an account of the ultimate source of causality in the cosmos Aristotle s natural philosophy had a significant impact on his political philosophy he argues that humans are by nature political animals having their natural end in the city whose regime is hierarchically structured based on differences in moral and intellectual capacity Medieval theorists attempt to synthesize classical natural and political philosophy with the revealed truths of scripture they argue that divine reason structures an ordered universe the awareness of which allows for psychic and political harmony among human beings Enlightenment thinkers challenge the natural philosophy of classical and medieval philosophers ushering in a more liberal political order For example for Hobbes there is no rest in nature as there are no Aristotelian forms or natural places that govern matter Hobbes applies his mechanistic understanding of material nature to his understanding of human nature individuals are by nature locked in an endless pursuit of power until death However from this mechanistic understanding of humanity s natural condition Hobbes develops a social contract theory in which civil and political society is constituted from consent Later thinkers such as Locke and Rousseau modify this Hobbesian premise in their pursuit of the protection of rights and a free society Nevertheless materialist conceptions of the cosmos have not always given rise to liberal democratic philosophies Historicist influence on scientific inquiry in the nineteenth century is connected to Darwin s theory of evolution Darwin reasoned that over time the process of natural selection produces ever newer and more highly adapted species Reflecting a form of social Darwinism Nietzsche envisions an aristocratic order that draws its inspiration from art rather than the rationalism

The Politics of Perfection Kimberly Hurd Hale,2016-10-07 The Politics of Perfection Technology and Creation in Literature and Film provides an exploration of the relationship between modern technological progress and classical liberalism Each chapter provides a detailed analysis of a film or novel including Fritz Lang s Metropolis Ridley Scott s Prometheus Michael Gondry s Eternal Sunshine of the Spotless Mind Kazuo Ishiguro s Never Let Me Go and Margaret Atwood s Oryx and Crake These works of fiction are examined through the lens of political thinkers ranging from Plato to Hannah Arendt The compatibility of classical liberalism and technology is questioned using fiction as a window into Western society s views on politics economics religion technology and the family This project explores the intersection between human nature and creation particularly artificial intelligence and genetic engineering using works of literature and film to access cultural concerns Each of the works featured asks a question about the relationship between technology and creation Technology also allows humanity to create new types of life in the forms of artificial intelligence and genetically engineered beings This book studies works of literature and film as evidence of the contemporary unease with the progress of technology

and its effect on the political realm Piety and Humanity Douglas Kries,1997 The nature of the relationship between early modern political philosophy and revealed religion has been much debated The contributors to Piety and Humanity argue that this relationship is one of dissonance rather than concord They claim that the early modern political philosophers found revealed religion especially Christianity to be a threat to the modern political project and that these philosophers therefore attempted to transform revealed religion so that it would be less of a threat and possibly even an aid Each essay is devoted to a particular work by a single political philosopher the thinkers and works discussed include Machiavelli's Exhortation to Penitence Francis Bacon's New Atlantis Spinoza's Theologico Political Treatise and Locke's Reasonableness of Christianity Each essay is followed by a brief selected bibliography This book will be of great importance to philosophers political theorists and scholars of religion and early modern European history **Political Philosophy Cross-Examined** T. Pangle,J. Lomax,2013-04-10 Political societies frequently regard philosophers as potential threats to morality and religion and those who speak for politics often demand a defense of philosophy This book will address philosophy as a mode of existence put into question **Enlightenment, Modernity and Science** Paul A. Elliot,2010-10-30 Scientific culture was one of the defining characteristics of the English Enlightenment The latest discoveries were debated in homes institutions and towns around the country But how did the dissemination of scientific knowledge vary with geographical location What were the differing influences in town and country and from region to region Enlightenment Modernity and Science provides the first full length study of the geographies of Georgian scientific culture in England The author takes the reader on a tour of the principal arenas in which scientific ideas were disseminated including home town and countryside to show how cultures of science and knowledge varied across the Georgian landscape Taking in key figures such as Erasmus Darwin Abraham Bennett and Joseph Priestley along the way it is a work that sheds important light on the complex geographies of Georgian English scientific culture
