Early Postmodernism Paul A. Bové, 1995 In the decade that followed 1972 the journal boundary 2 consistently published many of the most distinguished and most influential statements of an emerging literary postmodernism Recognizing postmodernism as a dominant force in culture particularly in the literary and narrative imagination the journal appeared when literary critical study in the United States was in a period of theory induced ferment The fundamental relations between postmodernism and poststructuralism were being initially examined and the effort to formulate a critical sense of the postmodern was underway In this volume Paul A Bov the current editor of boundary 2 has gathered many of those foundational essays and as such has assembled a basic text in the history of postmodernism Essays by noted cultural and literary theorists join with Bov s contemporary preface to represent the important and unique moment in recent intellectual history when postmodernism was no longer seen primarily as an architectural term had not yet come to describe the wide range of culture it does now but was finding power and place in the literary realm These essays show that the history of postmodernism and its attendant critical theories are both more complex and more deeply bound with literary criticism than often is acknowledged today Early Postmodernism demonstrates not only the significance of these literary studies but also the role played by literary critical postmodernism in making possible newer forms of critical and cultural studies Contributors Barry Alpert Charles Altieri David Antin Harold Bloom Paul A Bov H l ne Cixous Gerald Gillespie Ihab Hassan Joseph N Riddel William V Spanos Catharine R Stimpson Cornel West The Age of Milton Alan Hager, 2004-03-30

Botanical Poetics Jessica Rosenberg, 2022-10-25 During the middle years of Queen Elizabeth s reign the number of books published with titles that described themselves as flowers gardens or forests more than tripled During those same years English printers turned out scores of instructional manuals on gardening and husbandry retailing useful knowledge to a growing class of literate landowners and pleasure gardeners Both trends Jessica Rosenberg shows reflected a distinctive style of early modern plant thinking one that understood both plants and poems as composites of small pieces slips or seeds to be recirculated by readers and planters *Botanical Poetics* brings together studies of ecology science literary form and the material text to explore how these developments transformed early modern conceptions of nature poetic language and the printed book Drawing on little studied titles in horticulture and popular print alongside poetry by Shakespeare Spenser and others Rosenberg reveals how early modern print used a botanical idiom to anticipate histories of its own reading and reception whether through replanting uprooting or fantasies of common property and proliferation While our conventional narratives of English literary culture in this period see reading as an increasingly private practice and literary production as more and more of an authorial domain *Botanical Poetics* uncovers an alternate tradition of commonplaces and common ground of slips of herbs and poetry circulated shared and multiplied

Reckoning Words Diana B Altegoer, 2000 Bacon did not call into being a fissure of science and the arts rather he conceptualized a unique relationship between the two by creating an experimental and rhetoricized logic that allowed nature to shape and fashion the perceiving mind of the witness in order to advance the political fortunes of Elizabethan and Stuart England
