Frank Herbert Starmont Readers Guide 5:

Discovering Dune Dominic J. Nardi, N. Trevor Brierly, 2022-08-01 Frank Herbert's *Dune* is one of the most well known science fiction novels of all time and it is often revered alongside time honored classics like *The Lord of the Rings*. Unlike Tolkien's work the *Dune* series has received remarkably little academic attention. This collection includes fourteen new essays from various academic disciplines including philosophy, political science, disability studies, Islamic theology, environmental studies and Byzantine history that examine all six of Herbert's *Dune* books. As a compendium it asserts that a multidisciplinary approach to the texts can lead to fresh discoveries. Also included in this collection are an introduction by Tim O'Reilly who authored one of the first critical appraisals of Herbert's writings in 1981 and a comprehensive bibliography of essential primary and secondary sources.

Xenograffiti R. Reginald, 1996-01-01 In this new retrospective collection spanning almost forty years Pilgrim Award and Collector's Award winning fantasy novelist, critic and bibliographer Robert Reginald contributes forty-five essays on writers of fantastic literature including such major and minor figures as Piers Anthony, Edwin Lester Arnold, Margaret Atwood, John Kendrick Bangs, Leslie Barringer, John Bellairs, Arthur Byron Cover, Lindsey Davis, Alexander de Comeau, Daphne du Maurier, R. Lionel Fanthorpe, H. Rider Haggard, Charlotte Haldane, Edward Heron Allen, Eleanor M. Ingram, Vernon Knowles, Katherine Kurtz, Andrew Lang, Fritz Leiber, Bruce McAllister, Ward Moore, Robert Nathan, Sir Henry Newbolt, William F. Nolan, John Norman, Keith Roberts, Michael Reaves, Brian Stableford and George Zebrowski. Also included is a comprehensive bibliography and history of the publications of Starmont House Inc. and FAX Collector's Editions, a selection of reviews and obituaries, a bibliography and detailed index. This unique literary collection will prove of interest both to students and researchers alike. This second edition features fifteen new pieces including the author's earliest published critique (1968) and a number of original autobiographical reflections on his life and career penned shortly after his heart attack in 2003.

The Orientalist Semiotics of »Dune« Frank Jacob, 2022-03-30 Frank Herbert's *Dune* (1965) is considered to be one of the most successful Science Fiction novels of the 20th century. It introduces its readers to a future universe in which the production of the most valuable resource of the universe, spice, is only possible on one vast desert planet called Arrakis. *Dune* offers many different motifs including a hero that eventually turns into a superhuman being. However, the novel is also rich of orientalist semiotics and relates to a sign system existent when Herbert wrote his book. Frank Jacob discusses these semiotics in detail and shows how much of *Lawrence of Arabia* is present in the story's plot.
