Prevention of Land Degradation, Enhancement of Carbon Sequestration and Conservation of Biodiversity Through Land Use Change and Sustainable Land Management with a Focus on Latin America and the Caribbean Food and Agriculture Organization of the United Nations,1999-01-01 The objective of IFAD FAO consultation was to bring together experts in order to review the state of the art knowledge in carbon sequestration for the land management programmes IFAD and FAO in Latin America

and the Caribbean The main objectives addressed were how to stabilize the atmospheric concentration of CO₂ how to increase agricultural productivity and reduce rural poverty in view of the Global Mechanism for Desertification Convention how to activate the flow of new funds for the benefit of Convention implementation through carbon sequestration i e its binding and neutralisation It is believed that carbon stock in soils is either stable or increasing and that it is was a major source of global carbon emission a major cause of global climate change **Response to Land Degradation** E M

Bridges,2019-04-24 This work is intended for advanced readers interested in methods of sustainable land management the prevention and control of land degradation It offers a coherent view of the situation concerning land degradation and the human response to the problem It is generally recognized that technological solutions alone cannot solve the problems of land degradation This book discusses the role of land use and land management policies programmes insitutional innovations and economic incentives for the control and prevention of land degradation Special attention is given to legal issues at the international level and in individual countries *Linkages Between Land Management, Land Degradation, and Poverty in*

Sub-Saharan Africa Nkonya, Ephraim,Pender, John,Kaizzi, Kayuki C.,Kato, Edward,Mugarura, Samuel,Ssali, Henry,Muwonge, James,2008-01-01 Most African countries strive for both poverty reduction and sustainable land management yet information on the exact relationship between these goals is limited This report seeks to fill the gap by demonstrating a strong linkage between poverty and land management Using Uganda as a case study the authors show that certain policies such as investments in soil and water conservation and agroforestry may simultaneously increase productivity and reduce poverty and land degradation Other strategies including development of rural roads non farm activities and rural finance may reduce poverty without significantly affecting productivity or land management Some policies however will likely involve trade offs among different goals and will need to have their negative impacts minimized Those in government NGOs the private sector or academia who are concerned about sustainably reducing poverty in Sub Saharan Africa will benefit from this analysis of how to pursue these key development goals **Land Quality, Agricultural Productivity, and Food Security** Keith Daniel

Wiebe,2003-01-01 Action is needed to fight poverty by sustaining the environment and the use of natural resources Land Quality Agricultural Productivity and Food Security explores a range of factors driving food security The book offers an assessment to link quality of the available land resources with productivity of land and the ability to ensure food security It offers a mixture of broad scale assessments across the globe with detailed case studies deepening our understanding of economics and decision making mechanisms It is recommended to researchers as well as actors in the private and public domain who are keen to improve their understanding of the appropriate actions that ensure food security in the decade to come Floor Brouwer Agricultural Economics Research Institute LEI The Hague The Netherlands Land quality and land degradation affect agricultural productivity and food security but quantifying these relationships has been difficult Data are extremely limited and outcomes are sensitive to the choices that farmers make The contributors to this book including soil

scientists geographers and economists analyse data on soils climate land cover agricultural inputs and outputs and a variety of socio economic factors to provide new insights into three key issues the extent to which differences in land quality generate differences in agricultural productivity across countries how farmers responses to differences or changes in land quality are influenced by economic environmental and institutional factors and whether land degradation over time threatens productivity growth and food security at local regional and global levels **Land Degradation** A.J.
