The Pacific Ranginui Walker,William M. Sutherland,1988 **Pragmatic Women and Body Politics** Margaret Lock,Patricia Alice Kaufert,1998-01-29 This thought provoking volume compares the responses of women in a variety of countries and cultural settings to modern medical technologies The contributors describe how women in East Africa deal with infertility how American women respond to pre natal diagnostic screening how women in China and Japan choose to make use of reproductive technologies The essays also explore wider themes such as the emergence of the breast cancer movement and how women confront environmental hazards which threaten them and their families It is often assumed that women are passive in the face of biomedical technology but this book shows that they make pragmatic choices with responses ranging from acceptance to rejection or indifference The reception of biomedical technology is situated in its local cultural contexts and vital issues of women s health are related to political and ethnic concerns *Principles and Applications of Environmental Biotechnology for a Sustainable Future* Ram Lakhan Singh,2016-10-14 This textbook on

Environmental Biotechnology not only presents an unbiased overview of the practical biological approaches currently employed to address environmental problems but also equips readers with a working knowledge of the science that underpins them. Starting with the fundamentals of biotechnology it subsequently provides detailed discussions of global environmental problems including microbes and their interaction with the environment, xenobiotics and their remediation, solid waste management, waste water treatment, bioreactors, biosensors, biomining and biopesticides. This book also covers renewable and non renewable bioenergy resources, biodiversity and its conservation and approaches to monitoring biotechnological industries, genetically modified microorganism and foods so as to increase awareness. All chapters are written in a highly accessible style and each also includes a short bibliography for further research. In summary, this textbook offers a valuable asset allowing students, young researchers and professionals in the biotechnology industry to grasp the basics of environmental biotechnology.

Ending the Fossil Fuel Era Thomas Princen, Jack P. Manno, Pamela L. Martin, 2015-05-15. A provocative call for delegitimizing fossil fuels rather than accommodating them, accompanied by case studies from Ecuador to Appalachia and from Germany to Norway. Not so long ago people North and South had little reason to believe that wealth from oil, gas and coal brought anything but great prosperity. But the presumption of net benefits from fossil fuels is eroding as widening circles of people rich and poor experience the downside. A positive transition to a post fossil fuel era cannot wait for global agreement, a swap in of renewables, a miracle technology, a carbon market or lifestyle change. This book shows that it is now possible to take the first step toward the post fossil fuel era by resisting the slow violence of extreme extraction and combustion, exiting the industry and imagining a good life after fossil fuels. It shows how an environmental politics of transition might occur, arguing for going to the source rather than managing byproducts, for delegitimizing fossil fuels rather than accommodating them, for engaging a politics of deliberately choosing a post fossil fuel world. Six case studies reveal how individuals, groups, communities and an entire country have taken first steps out of the fossil fuel era with experiments that range from leaving oil under the Amazon to ending mountaintop removal in Appalachia.

Building a Road to Nuclear Disarmament Rizwana Abbasi, 2021-07-26. This book while comprehending the contemporary global security environment offers a new roadmap for nuclear disarmament by creating a balance between deterrence supporters and disarmament advocates. The author identifies the divide between competing approaches such as traditional security centric aspects and humanity centered disarmament perspectives, tackling the complex question of how to balance some states requirements for effective nuclear deterrence with other states long term desire for a nuclear free world. The book explores how new technologies such as cyber and Artificial Intelligence advances are available to more countries than nuclear technology and could level the playing field for weaker nuclear weapons states. It also looks into the issues which continue to be obstacles in the way of convincing the nuclear weapon states on nuclear disarmament presented in this volume. The author argues that the gap between states security needs and disarmament aspirations can be bridged by

building a new roadmap and creating new security environment This volume will be of great interest to students and scholars researchers policymakers NGOs and members of the diplomatic community in the fields of security studies strategic studies and nuclear policy

Nuclear Power Harry Henderson,2014-05-12 Provides timely and up to date facts context perspectives and tools to make informed decisions about nuclear energy In the 21st century nuclear power has been identified as a viable alternative to traditional energy sources to stem global climate change and condemned as risky to human health and environmentally irresponsible Do the advantages of nuclear energy outweigh the risks especially in light of the meltdown at the Fukushima plant in 2011 This guide provides both a comprehensive overview of this critical and controversial technology presenting reference tools that include important facts and statistics biographical profiles a chronology and a glossary It covers major controversies and proposed solutions in detail and contains contributions by experts and important stakeholders that provide invaluable perspective on the topic

Environmental Protest and the State in France G. Hayes,2002-09-19 This book discusses the issues and strategies which have characterized the environmental campaigns mounted against recent controversial infrastructure projects in France Focusing on the changing nature of policymaking in the Fifth Republic as a key factor in the organization of each protest Graeme Hayes asks why some protests succeed where others fail and how we should understand the relationship between states and social movements in general

Site Fights Daniel P. Aldrich,2011-03-15 One of the most vexing problems for governments is building controversial facilities that serve the needs of all citizens but have adverse consequences for host communities Policymakers must decide not only where to locate often unwanted projects but also what methods to use when interacting with opposition groups In *Site Fights* Daniel P Aldrich gathers quantitative evidence from close to five hundred municipalities across Japan to show that planners deliberately seek out acquiescent and unorganized communities for such facilities in order to minimize

conflict When protests arise over nuclear power plants dams and airports agencies regularly rely on the coercive powers of the modern state such as land expropriation and police repression Only under pressure from civil society do policymakers move toward financial incentives and public relations campaigns Through fieldwork and interviews with bureaucrats and activists Aldrich illustrates these dynamics with case studies from Japan France and the United States The incidents highlighted in Site Fights stress the importance of developing engaged civil society even in the absence of crisis thereby making communities both less attractive to planners of controversial projects and more effective at resisting future threats
