Duffield, 2001-06-29 This book examines the nature of today's internal and regionalized conflicts together with the systems of global governance that have emerged in response to them The widespread commitment among donor governments and aid agencies to conflict resolution and social reconstruction indicates that war is now part of development discourse The very notion of development the author argues has been radicalized in the process and now requires the direct transformation of Third World societies This radicalization is closely associated with the redefinition of security Because conflict is understood as stemming from a developmental malaise underdevelopment itself is now seen as a source of instability The author argues however that transforming the social systems of developing countries is beyond the ability and legitimacy of individual governments in the North As a result governments NGOs security forces private companies and UN agencies have all become part of an emerging and complex system of global governance The aim is to secure stability on the borders of ordered society where the world encounters the violence of the new wars This book represents contribution to our understanding of modern conflict and the difficulties of effective engagement Together with practitioners and policymakers seeking a challenging interpretation of their work the book will be of direct interest to students and scholars in the fields of international security political economy political theory and development studies

Building Security in Post-Conflict States Ursula Schroeder,Fairlie Chappuis,2017-10-02 Support for security and justice institutions has become a crucial instrument of international engagement in fragile and conflict affected states In attempts to shore up security as a precondition for sustainable peace international actors have become deeply engaged in reforming the security agencies and security governance institutions of states emerging from conflict But despite their increasing importance in the field of international peace and state building security sector reform SSR interventions remain both highly political and deeply contentious processes Expanding on this theme this edited volume identifies new directions in research on the domestic consequences of external support to security sector reform Both empirically and theoretically the focus lies on the so far neglected role of domestic actors interests and political power constellations in recipient states Based on a wide range of empirical cases the volume discusses how the often conflictual and asymmetric encounters between external and domestic actors with divergent interests and perceptions affect the consequences of international interventions By taking into account the plurality of state and non state security actors and institutions beyond classical models of Weberian statehood the contributions make the case for engaging more closely with the complexity of the domestic security governance configurations that can result from external engagement in the field of security sector reform This book was published as a special issue of International Peacekeeping

Critical Approaches to International Security Karin M. Fierke,2015-03-06 During the Cold War the concept of international security was understood in military terms as the threat

or use of force by states The end of East West hostilities however brought critical perspectives to the fore as scholars sought to explain the emergence of new challenges to international stability such as environmental degradation immigration and terrorism The second edition of this popular and highly respected text offers a wide ranging and comprehensive analysis of the growing field of critical security studies All the chapters have been fully revised and updated to map the on going evolution of debates about international security since 1989 including the more recent shift in emphasis from critiques of the realist practices of states to those of global liberal governance Topics covered include the relationship between security and change identity the production of danger fear and trauma human insecurity and emancipation The book explores the meaning and use of these concepts and their relevance to real life situations ranging from the War on Terror to the Arab Spring migration suffering in war failed states and state building and the changing landscape of the international system with the emergence of a multipolar world and the escalation of global climate change Written with verve and clarity and incorporating new seminar activities and questions for class discussion this book will be an invaluable resource for students of international relations and security studies

human development Critical Perspectives on Human Security David Chandler, Nik Hynek, 2010-09-13 This new book presents critical approaches towards Human Security which has become one of the key areas for policy and academic debate within Security Studies and IR The Human Security paradigm has had considerable significance for academics policy makers and practitioners Under the rubric of Human Security security policy practices seem to have transformed their goals and approaches re prioritising economic and social welfare issues that were marginal to the state based geo political rivalries of the Cold War era Human Security has reflected and reinforced the reconceptualisation of international security both broadening and deepening it and in so doing it has helped extend and shape the space within which security concerns inform international policy practices However in its wider use Human Security has become an amorphous and unclear political concept seen by some as progressive and radical and by others as tainted by association with the imposition of neo liberal practices and values on non Western spaces or as legitimizing attacks on Iraq and Afghanistan This book is concerned with critical perspectives towards Human Security highlighting some of the tensions which can emerge between critical perspectives which discursively radicalise Human Security within frameworks of emancipatory possibility and those which attempt to deconstruct Human Security within the framework of an externally imposed attempt to regulate and order the globe on behalf of hegemonic power The chapters gathered in this edited collection represent a range of critical approaches which bring together alternative understandings of human security This book will be of great interest to students of human security studies and critical security studies war and conflict studies and international relations *Between Security Markets and Protection Rackets* Marc von Boemcken, 2013-02-20 Security is a social practice which constitutes different formations of political order Developing a political economy of security practice the author distinguishes these formations with a view to the actual exchanges between various providers and receivers of security services He thus departs from a popular perspective in political science which charts ongoing transformations in the global security landscape along a series of categorical divisions between state and non state or between the public and the private A more rewarding analytical perspective conceives the two most dominant security formations in the contemporary world as either based on commercial or on compulsory relations The Politics and Policies of Relief, Aid and Reconstruction Fulvio Attina, 2012-10-15 Disaster policies present a new challenge to the practitioners and students of global politics this book explains how political science enriches the contribution of the social sciences to the study of disaster relief aid and reconstruction following the major disaster events both natural and man made of recent times *Deconstructing International Politics* Michael Dillon, 2013-01-17 Michael Dillon is internationally regarded for his contributions by political philosophers international relations scholars and security studies experts as well as by philosophers more broadly It is difficult to overrate his importance to the development of critical deconstructive approaches not only in challenging traditional scholarship and addressing contemporary politics but in articulating new approaches and new thinking This book draws together some of his

key works and is framed by an introduction written specially for the volume. It is the first full length work to draw on the insights and techniques of deconstruction to analyse international relations. Influenced primarily by Derrida, it critiques the cornerstones of international relations such as modernity, the state, the subject, security and ethics and justice. This volume will provide an invaluable resource for teaching at undergraduate and postgraduate levels on traditional international relations courses and on the increasing number of specialised courses in critical approaches. Well designed and structured, it is accessible to the novice as well as challenging for the specialist.
