*Introduction to International Relations and Global Politics* Sorensen, *Structural Power in the Global Age* Xuewu Gu, 2022-10-07 In light of recent global trends and crises including the hasty withdrawal of Western troops from Afghanistan and the Russian war of aggression against Ukraine this book sheds new light on global power shifts in multiple areas of international relations between industrialized countries and emerging powers This book argues that the global age is rapidly supplanting the modern age and that modernity is paving the way for globality The events that are taking place in the 21st century can no longer be effectively described understood or explained by the concept of modernity which originated more than 500 years ago Further this book challenges the academic and societal tendency to view international power related phenomena on the basis of a dichotomy between hard and soft power It assumes that another power source independent of hard and soft power does exist Invisible structure manipulating and effectively leveraged it is precisely this third power that drives and shapes power phenomena in the global age more intensively than either hard or soft power This book seeks to verify its core hypotheses by applying them to a set of selected global phenomena particularly from the domains of geopolitics Belt Road Initiative Iran conflict war in Afghanistan and competition for a new world order and technology Global
