International Governance, Regimes, and Globalization Peter Kien-hong Yu,Emily W. Chow,Shawn S.F. Kao,2010-04-27 In the this collection International Governance Regimes and Globalization the writers explore international relations and globalization by using specific examples from Beijing and Taipei In December 1949 when China was politically divided the People s Republic of China PRC central government was in control of most resources tangible and intangible For that reason our unit of analysis has to be the state meaning a government or a politically organized body With the rise of civil society at both national and international levels applying the international global governance theory should be closer to reality because we have to look at both the state and non state sponsored dimensions which are more complex and complicated Indeed international global governance could become a new school of thought and will continue to expand as academics explore For example neo liberalism primarily focuses on market and contract When people buy and sell something they are in a market In other words politics is the superstructure of economics or as Karl Marx said what prevails in economy will ultimately prevail in politics In a sense subscribers to this school of thought are Marxian However the study of international global governance embraces the non state sponsored dimension Hence it is broader than that of the neo liberalism school of thought *The*

Dynamics of Economic and Political Relations Between Africa and Foreign Powers Tukumbi Lumumba-Kasongo, 1999-01-30

International relations at large and Africa's in particular are shaped by the actors' historical location by what they offer economically and culturally and by who they are socially. In international relations, nations tend to deal with objective conditions as they are or as they are perceived. However, Lumumba-Kasongo demonstrates through case studies of Liberia and Zaire-Congo that what the objective conditions are may not necessarily be what they ought to be in the national development process. The international struggle for power between the West and the East and their supportive brutal and oppressive states in the South, especially in Africa, created the extremely weak conditions that redefined international relations as the tools of domination rather than the tools of understanding and cooperation. As Lumumba-Kasongo clarifies, Africa did not gain economically or developmentally from this struggle. An important work for scholars and researchers of contemporary Africa and international relations in general.

The European Union and the Use of Military Force Tommi Koivula, 2016-05-26 Koivula examines the discursive space related to the use of military force by the European Union (EU). By examining the EU's relationship to its use of military force during the course of its history and by demonstrating that the contemporary discursive space of the EU's military dimension is incoherent in nature and contains inherent contradictions, he seeks to answer the related question of whether extreme forms of military enforcement, for example, killing is appropriate for the EU.

The Group of Twenty (G20) Andrew F. Cooper, Ramesh Thakur, 2013-01-04 This work offers a concise examination of the purpose, function and practice of the Group of Twenty (G20) summit. Providing a comprehensive historical account of the G20 Finance Ministers and Central Bank Governors process, the text then moves on to outline the conditions, events and debates that led to the formation of the permanent expanded leaders' level forum. The historical span of the G20 Summit process is not long, but the global transformations that precipitated it are crucial when seeking to understand it. Cooper and Thakur explore a variety of major debates including Governance by self-selected groups versus mandated multilateral organizations, the legitimacy of informal leadership, the issue of the G20's composition of both solution countries and problem countries, the role of the emerging powers, new conceptions of North-South relationships. This work offers a detailed examination of the ongoing shifts in economic power and the momentum toward global institutional reform, illustrating how the G20 has moved from a crisis committee to the premier global forum over this short but intense history and mapping out its comparative advantages and key challenges ahead.
