## Global Village Citizen:

**Living in the Global Village**, 2009      **A Guide to Open311** Rakesh Patel, 2015-03-06 EverythingCivics is born out of the personal practical experience of Rakesh after becoming frustrated when his wife fell down on a broken footpath while going for a morning jog. He tried to report the issue to the city officials and found no result in a convenient way. Being a tech savvy guy who truly believes in using technology to solve the problems, he began to wonder if there are technologies out there in countries like USA. After doing much research and talking to a couple of his friends inspired by ideas which already have been implemented in countries like USA, UK and others, he decided to build a platform that lets anybody to click a photo and report an issue to the Municipal Corporation and get the problems fixed. This book serves as a bible for anyone who is interested in getting a global perspective around Non emergency Services use of Open311 protocols by different councils. It also provides complete insight about implementation of Open311 issue reporting apps like HeyGov, FixCity, Fix 311, FixMyStreet CA, FixMyStreet NZ and many more. This book is divided into five major sections: 1. Everything about the Non emergency Services, 2. Understanding Open311, 3. Open311 applications, 4. Other aspects of EverythingCivics, 5. These sections further unfold into 8 chapters.      *Citizen of the Global Village* Hamad M. Alqubllan, 2006      Constructing Modern Asian Citizenship Edward Vickers, Krishna Kumar, 2014-12-05 In many non Western contexts, modernization has tended to be equated with Westernization and hence with an abandonment of authentic indigenous identities and values. This is evident in the recent history of many Asian societies where efforts to modernize, spurred on by the spectre of foreign domination, have often been accompanied by determined attempts to stamp national variants of modernity with the brand of local authenticity. Asian values, Chinese characteristics, a Japanese cultural essence and so forth. Highlighting or exaggerating associations between the more unsettling consequences of modernization and alien influence has thus formed part of a strategy whereby elites in many Asian societies have sought to construct new forms of legitimacy for old patterns of dominance over the masses. The apparatus of modern systems of mass education often inherited from colonial rulers has been just one instrument in such campaigns of state legitimation. This book presents analyses of a range of contemporary projects of citizenship formation across Asia in order to identify those issues and concerns most central to Asian debates over the construction of modern identities. Its main focus is on schooling but also examines other vehicles for citizenship formation such as museums and the internet, the role of religion in particular Islam in debates over citizenship and identity in certain Asian societies and the relationship between state centred identity discourses and the experience of increasingly globalized elites. With chapters from an international team of contributors, this interdisciplinary volume will appeal to students and scholars of Asian culture and society, Asian education, comparative education and citizenship.      The Evolving Citizen Jay P. Childers, 2015-06-29 It has become a common complaint among academics and community leaders that citizens today are not what they used to be. Nowhere is this decline seen to be more troubling than when the focus is on young Americans. Compared to the youth of past

generations today's young adults so the story goes spend too much time watching television playing video games and surfing the Internet As a result American democracy is in trouble The *Evolving Citizen* challenges this decline thesis and argues instead that democratic engagement has not gotten worse it has simply changed Through an analysis of seven high school newspapers from 1965 to 2010 this book shows that young people today according to what they have to say for themselves are just as enmeshed in civic and political life as the adolescents who came before them American youth remain good citizens concerned about their communities and hopeful that they can help make a difference But as The *Evolving Citizen* demonstrates today's youth understand and perform their roles as citizens differently because the world they live in has changed remarkably over the last half century      Citizens' Hall André Carrel, 2001 Based on years of practical experience in small towns Carrel argues for municipal autonomy for turning what are now colonies of the federal and provincial orders of government into independent mature and fully democratic entities For Carrel the citizen is the sole legitimate source of political power and the best tool for citizen empowerment is the controversial tool of the referendum This is the story of how a small municipality broke the rules of local government It also recounts the author's irreverence for the status quo and his ideas on the rebuilding of citizenship at the community level      *Citizenship as a Challenge* , 2021-11-29 Citizenship is one of the most important legacies of human development It raises the human status from a biological condition into a cultural moral political and rationalistic one It is a constantly evolving process which at each new turn adds complexity to human existence After the breakthroughs of the eighteenth century with the first steps in recognition of civil and political rights and of the twentieth century with the advancement of social rights and the emergence of cultural and environmental rights one could conclude that the twenty first century would see an enlargement of citizenship ideas and ideals Has this indeed happened Where are we now when it comes to identifying ourselves as citizens Varying across several disciplines this volume addresses the complexities of citizenship and our attempts to make sense of them      **ThirdWay** , 2004-06 Monthly current affairs magazine from a Christian perspective with a focus on politics society economics and culture      Educating Tomorrow's Valuable Citizen Joan N. Burstyn, 1996-07-03 The authors discuss the dilemmas that face those who would educate tomorrow's valuable citizens and describe the day to day commitment needed to maintain a community Important questions are asked How do our public schools educate children to become members of our particular public What problems face citizens of a democracy committed to both pluralism and equity How has the meaning of citizenship changed as our society has evolved In a world made interdependent through technology how can one best define citizenship The book's various perspectives provide guidelines for action through examples of current programs and the reader is invited to join new forums to discuss questions raised forums that allow for heated but civil disagreement Only by engaging in such discussions can a public consensus be reached on the best ways to educate for tomorrow Contributors include John Covalleskie Ellen Giarelli James Giarelli Jerilyn Fay Kelle Thomas Mauhs Pugh Barbara McEwan Mary B Stanley Donald Warren and Zeus

Yiamouyiannis     Battleground States Michael Mooradian Lupro, Stephen Swanson, 2009-10-02 Stemming from an interdisciplinary conference sponsored by Culture Club The Cultural Studies Scholars Association that included scholars from various disciplines and from around the world this volume collects the work of graduate students and junior faculty which all examine the meaning of cultural scholarship in an ever changing and increasingly global milieu These voices which often become marginalized and go unheard represent what we see as the futures of interdisciplinary academic work in the humanities The conference and this book are opportunities for scholars of diverse backgrounds and disciplines to come together and engage in a real dialogue with one another Bringing disparate thoughts on politics film television history policy and literature together counters the pressures pushing individuals to take political religious scholarly and ideological sides Through the efforts represented here we gain a distanced yet engaged view on the many threads that bind us together and the forces that seek to separate us Looking at this volume the reader encounters many different approaches from critical analysis of individual texts to autoethnography The contributors and compilers of this book do not place these in separate sections or in any hierarchy but rather wish that all of these appear on an equally vital level that displays the ways in which each of the subjects and approaches might open up a piece of culture in a way that draws attention to the connections between them all

**Health Care in the Information Society** David Ingram, 2023-11-17 In this fascinating book David Ingram traces the history of information technology and health informatics from its pioneers in the middle of the twentieth century to its latest developments The book is distinctive in its broad scope and coverage and as the eyewitness account of an author who became the first UK professor appointed with the mission to bridge information technology with everyday medicine health and care In this role he has been a co founder and leader of two rapidly growing initiatives openEHR and OpenEyes which stem from international collaborations of universities health services and industries These open source and open platform technologies have struck a widely resonant chord worldwide through their focus on community interest endeavours and open access to their methods and outputs Set against the history of extremely costly burdensome and serially unsuccessful top down attempts of governments to tackle the domain the book argues for a greater focus on shared endeavours of this kind contributing towards a standardized care information utility that incorporates methods and resources evolved shared and sustained in the public domain As information technologies are now at the very core of health care shaping the relationship between medical services and communities professions organisations and industries this book is important reading for politicians health care academics administrators and providers and to anybody interested in the future of health services in the digital age

**Canadian Social Policy** Anne Westhues, 2006-09-20 The objective of this new edition is the same as that of previous editions to help students understand social policy from a Canadian perspective and to stir them to discussion and debate Part One provides a general overview of social policy and Part Two discusses the policy making processes from the international factors that influence them to the ways in which a social worker can become part of

this process Part Three focuses on current social policy issues and Part Four offers a look to the future Each chapter of this best selling book has been thoroughly updated for this new edition with regard to current policy debated issues and resources cited Three new chapters have been added including an overview of adult mental health policy and a critical look at risk assessment in child welfare There is also a discussion of current challenges to the Charter of Rights and Canadians increasing use of the justice system to shape social policy As a result the reader gains an informed perspective of policy development and evaluation Although designed primarily for use by social workers the book will benefit anyone who is involved in the policy making process

*Citizenship for the 21st Century* Cogan, John (Professor of Education, University of Minnesota, USA),Derricott, Ray (Director, Centre for Continuing Education, University of Liverpool),2014-05-01 Civic and citizenship education have emerged as major areas of discussion debate and action regarding their place in the school curriculum in many nations This text sets out to show the importance of citizenship education with examples and contributions from around the world

**Citizenship and Participation in the Information Age** Manjunath Pendakur,Roma M. Harris,2002-01-01 This book reflects each contributor s vision of the future visions that range from the enthusiastic and hopeful to the pessimistic and fearful

Empowering Children R. Brian Howe,Katherine Covell,2007-06-09 Approved by the General Assembly of the United Nations in 1989 the United Nations Convention on the Rights of the Child affirms that children in all countries have fundamental rights including rights to education To date 192 states are signatories to or have in some form ratified the accord Children are still imperilled in many countries however and are often not made aware of their guaranteed rights In Empowering Children R Brian Howe and Katherine Covell assert that educating children about their basic rights is a necessary means not only of fulfilling a country s legal obligations but also of advancing education about democratic principles and the practice of citizenship The authors contend that children s rights education empowers children as persons and as rights respecting citizens in democratic societies Such education has a contagion effect that brings about a general social knowledge on human rights and social responsibility Although there remain obstacles to the implementation of children s rights in many countries Howe and Covell argue that reforming schools and enhancing teacher education are absolutely essential to the creation of a new culture of respect toward children as citizens Their thorough and passionate work marks a significant advance in the field

**Books and Social Media** Miriam J. Johnson,2021-07-29 Social media and digital technologies are transforming what and how we read Books and Social Media considers the way in which readers and writers come together in digital communities to discover and create new works of fiction This new way of engaging with fiction stretches the boundaries of what has been considered a book in the past by moving beyond the physical or even digitally bound object to the consideration of content containers and the ability to share Using empirical data and up to date research methods Miriam Johnson introduces the ways in which digitally social platforms give rise to a new type of citizen author who chooses to sidestep the industry s gatekeepers and share their works directly

with interested readers on social platforms Gender and genre especially play a key role in developing the communities in which these authors write The use of surveys interviews and data mining brings to the fore issues of gender genre community and power which highlight the push and pull between these writers and the industry Questioning what we always thought we knew about what makes a book and traditional publishing channels this book will be of interest to anyone studying or researching publishing book history print cultures and digital and contemporary literatures **Eloquent**

**Design** Lisa A. Baird, 2015-09-18 Humans first attempts to record their thoughts resulted in images painted in the decorated caves throughout Europe known as Upper Paleolithic Art As humans developed written alphabets to record their thoughts in words the images they painted and the words they wrote competed for attention As the Sister Arts tradition attests words and pictures have developed along distinct though related lines With the rise of New Media however the innovative inter animation of words and pictures in the screen space of the computer deserves and requires artists and designers and rhetoricians to take a fresh look at the complexities of human communication particularly the way in which words and pictures share commonalities The range of image texts from cave to computer from palimpsests to pixels demands critical attention from modern designers who create innovative image texts for New Media Eloquent Design Essays on the Rhetorics of Vision explores ancient image making as a basis for understanding the modern uses of image texts in New Media Eloquent Design also considers the current state of imaginative design from the Sister Arts tradition to Gestalt theories of vision to social semiotics of image texts Moreover Eloquent Design proposes a generative method for creating image texts a technique called Rhetorical Vision Applications of the generative mode of Rhetorical Vision give rise to the innovative designs of palimpsests and experimental modes of writing such as creative nonfiction Essays in Eloquent Design outline a method for teaching Rhetorical Vision as the inter animation of words and pictures **Citizenship for the 21st Century** John J.

Cogan, Ray Derricott, R.
