**2009** The World Bank,2008-12-09 The eruption of the worldwide financial crisis has radically recast prospects for the world economy Global Economic Prospects 2009 Commodity Markets at the Crossroads analyzes the implications of the crisis for low and middle income countries including an in depth look at long term prospects for global commodity markets and the policies of both commodity producing and consuming nations Developing countries face sharply higher borrowing costs and reduced access to capital This will cut into their capacity to finance investment spending ending a five year stretch of developing country growth in excess of 6 percent annually The looming recession presents new risks coming as it does on the heels of the recent food and fuel crisis Commodity markets meantime are at a crossroads Years of fast GDP growth contributed to the rise in commodity prices while the slowdown provoked by the financial crisis has seen those same prices plummet However other factors were also at play notably a period of low investment in commodity supply capacity during the 1990s due to low prices and reduced demand from the countries of the former Soviet Bloc In the longer run slower population growth is expected to ease the pace at which commodity demand grows while commodity producers are expected to discover sufficient new supplies and improved production techniques to prevent any acute shortages from developing In part this is because prices are projected to be higher than they were in the 1990s which will induce necessary investment in exploration and production by firms Higher prices will also promote greater conservation and substitution with more abundant alternatives while policies to limit carbon emissions and boost agricultural investment and the dissemination of efficient techniques will also contribute This year s Global Economic Prospects also looks at government responses to the recent price boom Producing country governments have been more prudent than during earlier booms and because they

have saved more of their windfall revenues they are less likely to be forced to cut into spending now that prices have declined The spike in food prices tipped more people into poverty which led governments to expand social assistance programs Ensuring such programs are better targeted toward the needs of the very poor in the future will help improve the capacity of governments to respond effectively the next time there is a crisis

**Global Economic Prospects 2008** World Bank,2008-01-08 Global Economic Prospects 2008 Technology Diffusion in the Developing World examines the state of technology in developing countries and the pace with which it has advanced since the early 1990s It reveals both encouraging and cautionary trends On the one hand the pace of technological progress in developing countries has been much faster than in high income countries reflecting increased exposure to foreign technology as a result of linkages with high skilled diasporas and the opening of these countries to international trade and foreign direct investment On the other hand the technology gap remains large and the domestic factors that determine how quickly technologies spread within developing countries often stymie progress especially among low income countries This year's Global Economic Prospects comes on the heels of an extended period of strong growth and a 15 year period of strong performance in much of the developing world which has contributed to substantial declines in global poverty While high oil prices and heightened market volatility may signal a coming pause in this process over the longer term continued technological progress should continue to push back poverty Rapid technological progress in developing countries has been central to the reduction of poverty in recent decades While the integration of global markets has played and will continue to play a key role in this future success will increasingly depend on strengthening technical competencies and the business environment for innovative firms in developing countries Graeme
