Global Environmental Change And International Governance:

GLOBAL ENVIRONMENTAL CHANGE AND INTERNATIONAL GOVERNANCE, 1996 **Global Environmental Change and International Relations** Malory Greene, Ian Rowlands, 2016-07-27 Climate change and depletion of the ozone layer are two examples of dramatic changes in the Earth's natural environment which raise new questions in international relations. The nine chapters in this book explore some of the theoretical and policy problems that are posed by global environmental change. The variety of perspectives employed: international relations theory, international political economy, international law, strategic studies, North-South issues, and Eastern Europe, illustrates the complexity of the issues involved.

Global Environmental Governance James Gustave Speth and Peter M. Haas, 2007-09 Global Environmental Governance examines ten major environmental threats: climate disruption, biodiversity loss, acid rain, ozone depletion, deforestation, desertification, freshwater degradation and shortages, decline of marine fisheries, toxic pollutants, and excess nitrogen, and explores how they can be addressed through treaties, governance regimes, and new forms of international cooperation. It also critically examines the serious shortcomings of current efforts and the underlying reasons for the persistence of disturbing trends. This book presents key concepts in international law and regime formation in simple, accessible language and describes the current institutional landscape, lessons learned, and new directions needed in international governance.

Global Cities and Climate Change Taedong Lee, 2014-08-21 Cities have led the way to combat climate change by planning and implementing climate mitigation and adaptation policies. These local efforts go beyond national boundaries. Cities are forming transnational networks to enhance their understandings and practices for climate policies. In contrast to national governments that have numerous obstacles to cope with global climate change, in the international and national level, cities have become significant international actors in the field of international relations and environmental governance. *Global Cities and Climate Change* examines the translocal relations of cities that have made an international effort to collectively tackle climate change. Compared to state-centric terms, international or transnational relations, translocal relations look at policies, politics, and interactions of local governments in the globalized world. Using multi-methods such as multi-level analysis, comparative case studies, regression analysis, and network analysis, Taedong Lee illustrates why some cities participated in transnational climate networks, for what conditions cities internationally cooperate with other cities, with which cities, and which factors influence climate policy performance. An essential read to all those who wish to understand the driving factors for local governments' engagement in global climate governance from a theoretical as well as practical point of view, Lee makes a valuable contribution to the fields of international relations, environmental policies, and urban studies.

Global Environmental Change and International Governance Oran R. Young, George J. Demko, Kilaparti Ramakrishna, 1991 *Managers of Global Change* Frank Biermann, Bernd Siebenhüner, 2009 An examination of the role and relevance of international bureaucracies in global

environmental governance Transnational Climate Change Governance Harriet Bulkeley, 2014-07-21 Leading experts provide the first comprehensive account of transnational efforts to respond to climate change for researchers graduate students and policy makers *Governing Climate Change* Jolene Lin, 2018-06-21 Cities are no longer just places to live in They are significant actors on the global stage and nowhere is this trend more prominent than in the world of transnational climate change governance TCCG Through transnational networks that form links between cities states international organizations corporations and civil society cities are developing and implementing norms practices and voluntary standards across national boundaries In introducing cities as transnational lawmakers Jolene Lin provides an exciting new perspective on climate change law and policy offering novel insights about the reconfiguration of the state and the nature of international lawmaking as the involvement of cities in TCCG blurs the public private divide and the traditional strictures of domestic versus international This illuminating book should be read by anyone interested in understanding how cities in many cases more than the countries in which they re located are addressing the causes and consequences of climate change *Global Environmental Change and International Governance* by Oran R. Young, George J. Demko and Kilaparti Ramakrishna Oran R. Young, 1996 *The Global Environment* Norman J. Vig, Regina S. Axelrod, 2023-04-14 All serious environmental threats are now international in scope and more than one thousand international environmental agreements already exist Yet the prospects for international cooperation leading to the management of impacts on the planet remain grim The Global Environment meets the need for an authoritative assessment of the state of international environmental institutions laws and policies at the end of the 20th century The book examines disagreements over the meaning of sustainable development problems inherent in implementing environmental policies and the conflict over the exclusion of developing countries from the Kyoto Protocol It discusses the profound trade offs that may be required the role of international financial interests in promoting incompatible forms of development and analyses international environmental institutions law and policy and sustainable development *The Institutional Dimensions of Environmental Change* Oran R. Young, 2002 A study that lays the foundation for cumulative research on the roles institutions play in causing and confronting environmental changes

Essential Concepts of Global Environmental Governance Jean-Frederic Morin, Amandine Orsini, 2020-08-31 Aligning global governance to the challenges of sustainability is one of the most urgent international issues to be addressed This book is a timely and up to date compilation of the main pieces of the global environmental governance puzzle Essential Concepts of Global Environmental Governance synthesizes writing from an internationally diverse range of well known experts Each entry defines a central concept in global environmental governance presents its historical evolution and related debates and includes key bibliographical references This new edition takes stock of several recent developments in global environmental politics including the 2015 Paris Agreement on Climate Change the UN Global Pact for the Environment attempt in 2017 and the 2018 Oceans Plastics Charter More precisely this book offers cutting edge analysis of the state of global environmental

governance presents an up to date debate on sustainable development at the global level gives an in depth exploration of current architecture of global environmental governance examines the interaction between environmental politics and other policy fields such as trade development and security provides a critical review of the recent global environmental governance literature Innovative thinking and high profile expertise come together to create a volume that is accessible to students scholars and practitioners alike

Earth System Governance Frank Biermann, 2014-11-21 A new model for effective global environmental governance in an era of human caused planetary transformation and disruption Humans are no longer spectators who need to adapt to their natural environment Our impact on the earth has caused changes that are outside the range of natural variability and are equivalent to such major geological disruptions as ice ages Some scientists argue that we have entered a new epoch in planetary history the Anthropocene In such an era of planet wide transformation we need a new model for planet wide environmental politics In this book Frank Biermann proposes earth system governance as just such a new paradigm Biermann offers both analytical and normative perspectives He provides detailed analysis of global environmental politics in terms of five dimensions of effective governance agency particularly agency beyond that of state actors architecture of governance from local to global levels accountability and legitimacy equitable allocation of resources and adaptiveness of governance systems Biermann goes on to offer a wide range of policy proposals for future environmental governance and a revitalized United Nations including the establishment of a World Environment Organization and a UN Sustainable Development Council new mechanisms for strengthened representation of civil society and scientists in global decision making innovative systems of qualified majority voting in multilateral negotiations and novel institutions to protect those impacted by global change Drawing on ten years of research Biermann formulates earth system governance as an empirical reality and a political necessity

Routledge Handbook of Global Environmental Politics Paul G. Harris, 2022-03-24 This handbook brings together leading international academic experts to provide a comprehensive and authoritative survey of global environmental politics Fully revised updated and expanded to 45 chapters the book Describes the history of global environmental politics as a discipline and explains the various theories and perspectives used by scholars and students to understand it Examines the key actors and institutions in global environmental politics explaining the roles of states international organizations regimes international law foreign policy institutions domestic politics corporations and transnational actors Addresses the ideas and themes shaping the practice and study of global environmental politics including sustainability consumption expertise uncertainty security diplomacy North South relations globalization justice ethics public participation and citizenship Assesses the key issues and policies within global environmental politics including energy climate change ozone depletion air pollution acid rain transport persistent organic pollutants hazardous wastes rivers wetlands oceans fisheries marine mammals biodiversity migratory species natural heritage forests desertification food and agriculture This second edition includes new chapters on plastics climate change

energy earth system governance and the Anthropocene It is an invaluable resource for students scholars researchers and practitioners of environmental politics environmental studies environmental science geography globalization international relations and political science Chapter 19 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license available at <http://www.taylorfrancis.com>

International Relations and Global Climate Change Urs Luterbacher, Detlef F. Sprinz, 2001-10-26 This book surveys current conceptual theoretical and methodological approaches to global climate change and international relations Although it focuses on the role of states it also examines the role of nonstate actors and international organizations whenever state centric explanations are insufficient The book begins with a discussion of environmental constraints on human activities the environmental consequences of human activities and the history of global climate change cooperation It then moves to an analysis of the global climate regime from various conceptual and theoretical perspectives These include realism and neorealism historical materialism neoliberal institutionalism and regime theory and epistemic community and cognitive approaches Stressing the role of nonstate actors the book looks at the importance of the domestic international relationship in negotiations on climate change It then looks at game theoretical and simulation approaches to the politics of global climate change It emphasizes questions of equity and the legal difficulties of implementing the UN Framework Convention on Climate Change and the Kyoto Protocol It concludes with a discussion of global climate change and other aspects of international relations including other global environmental accords and world trade The book also contains Internet references to major relevant documents

Managing Institutional Complexity Sebastian Oberthür, Olav Schram Stokke, 2011 The book a product of the Institutional Dimensions of Global Environmental Change research project IDGEC offers both theoretical and empirical perspectives

Coping with Global Environmental Change, Disasters and Security Hans Günter Brauch, Ursula Oswald Spring, Czesław Mesjasz, John Grin, Patricia Kameri-Mbote, Béchir Chourou, Pál Dunay, Joern Birkmann, 2011-02-03 Coping with Global Environmental Change Disasters and Security Threats Challenges Vulnerabilities and Risks reviews conceptual debates and case studies focusing on disasters and security threats challenges vulnerabilities and risks in Europe the Mediterranean and other regions It discusses social science concepts of vulnerability and risks global regional and national security challenges global warming floods desertification and drought as environmental security challenges water and food security challenges and vulnerabilities vulnerability mapping of environmental security challenges and risks contributions of remote sensing to the recognition of security risks mainstreaming early warning of conflicts and hazards and provides conceptual and policy conclusions

Global Warming and China's Environmental Diplomacy Hongyuan Yu, 2008 Since the early 1990s there are two increasingly hot topics attracting numerous scholarly attentions in Chinese politics first it is the transformation of China's political system Second it is China's increasingly involvement in international regimes Nevertheless until now there are only a few scholars to work out

the distinctive relations between them and even less people work on the bureaucratic politics level By explaining and evaluating the development of policymaking coordination in the United Nations Framework Convention on Climate Change UNFCCC the author demonstrates the argument that international regimes have contributed to the development of coordination in Chinese Policymaking taking the UNFCCC as a departure

Multilevel Governance of Global Environmental Change Gerd Winter, 2006-03-30 Originally published in 2006 this collection is the outcome of an interdisciplinary research project involving scholars in the fields of international and comparative environmental law the sociology and politics of global governance and the scientific study of global climate change Earth system analysis as developed by the natural sciences is transferred to the analysis of institutions of global environmental change Rather than one overarching supranational organisation a system of multilevel institutions is advocated The book examines the proper role of industrial self regulation of horizontal transfer of national policies of regional integration and of improved coordination between international environmental organisations as well as basic principles for sustainable use of resources Addressing both academics and politicians this book will stimulate the debate about the means of improving global governance

The Global Environment Regina S. Axelrod, Stacy D. VanDeveer, 2014-02-25 The new edition of Regina S Axelrod and Stacy D VanDeveer s award winning volume The Global Environment Institutions Law and Policy reflects the latest events in global environmental politics and sustainable development while providing balanced coverage of the key institutions issues laws and policies The volume has been reorganized to better highlight global environmental institutions major state and non state actors and includes an expanded set of cases such as climate change biodiversity hazardous chemicals ozone layer depletion nuclear energy and resource consumption Based on reviewer feedback the new edition broadens coverage of the growing global environmental agenda and explores the relationships between states NGOs and international organizations

Decoding **Global Environmental Change And International Governance**: Revealing the Captivating Potential of Verbal Expression

In a period characterized by interconnectedness and an insatiable thirst for knowledge, the captivating potential of verbal expression has emerged as a formidable force. Its capability to evoke sentiments, stimulate introspection, and incite profound transformations is genuinely awe-inspiring. Within the pages of "**Global Environmental Change And International Governance**," a mesmerizing literary creation penned by way of a celebrated wordsmith, readers set about an enlightening odyssey, unraveling the intricate significance of language and its enduring impact on our lives. In this appraisal, we shall explore the book's central themes, evaluate its distinctive writing style, and gauge its pervasive influence on the hearts and minds of its readership.
