Global Ideas, Local Adaptations Taru Salmenkari, 2025-06-09 Exploring the boundaries fringes and inner workings of civil society Taru Salmenkari investigates local forms of political agency in China in light of the globalization of political values practices and institutions She provides a theoretical framework for globalization to examine new forms of governance emerging with non government organizations NGOs and how these have reconfigured social power in China The Influence of Global Ideas on Environmentalism and Human Rights Markus Hadler, 2017-12-01 This book explores whether individual attitudes and behaviors are swayed by global developments in a world increasingly populated by organizations treaties and other institutions that focus on environmentalism and human rights It uses the sociological approach of World Society theory to investigate the effects of global ideas on individual environmentalism xenophobia and homophobia while drawing its data from a variety of international public opinion surveys The Influence of Global Ideas on Environmentalism and Human Rights questions the dominant narrative of World Society related research as a positive influence of global ideas on various outcomes Hadler demonstrates the complexity of this issue through empirical analyses revealing mixed trends in attitudes and behaviors from around the world This book will be of interest to academics seeking to critically engage with World Society theory through two of its core topics human rights and environmentalism *Neoliberalism: National and Regional Experiments with Global Ideas* Ravi K. Roy, Arthur T. Denzau, Thomas D. Willett, 2006-12-13 Critics of globalization often portray neoliberalism as an extremist laissez faire political economic philosophy that rejects government any sort of government intervention in the domestic economy Like most over used terms it is more complicated than this introductory sentence suggests This volume seeks to move beyond these caricature depictions and definitions as well as the emotional rhetoric that has unfortunately dominated both the scholastic and political debate on neoliberalism and global market oriented reform This book emphasizes that there are in fact a variety of neoliberalisms that share a common emphasis on the role of the market Beyond this however its usages and applications appear much more varied according to the cultural economic political and social context in which it is used A host of eminent contributors including Douglass C North Arthur T Denzau Thomas D Willett Mark Blyth Colin Hay Craig Parsons and others provide a rigorous assessment of the significance of neoliberal ideas on economic policy Through their detailed international case studies the contributors to this book show how varied its impact has in fact been and the result is a book that will stimulate further debate in this most controversial of subject matters Ravi K Roy is a Research Scholar at the Claremont Institute for Economic Policy Studies Arthur T Denzau is Professor of Economics at Claremont Graduate University He is also a Research Associate at the Center for American Business at Washington University St Louis Thomas D Willett is Horton Professor of Economics at Claremont Graduate University He is also Director of the Claremont Institute for Economic Policy Studies *Translating Global Ideas* Claudia Diaz-Rios, 2024-04-01 International organizations have consistently influenced education reforms in Latin America but not all

countries have adopted the same policy recommendations This book offers a unique comparative analysis of secondary education reforms in Chile Argentina and Colombia from the 1960s to the 2010s with a focus on three key areas manpower planning state retrenchment market based versus active state and ideas about having a right to a quality education in an era of government accountability While responding to similar policy recommendations these countries have differed in how they have implemented decentralization incorporated private actors allocated authority over curriculum and established instruments of accountability Claudia Diaz Rios traces the legacies of previous education policies and local struggles among stakeholders in reshaping and sometimes rejecting foreign recommendations Translating Global Idea will be an invaluable resource for scholars of comparative politics and the globalization of education particularly those interested in policy development in middle and low income countries as well as practitioners invested in promoting education policy changes in Latin America

A Global Idea Mayssoun Sukarieh,2023-08-15 A Global Idea outlines how youth as shown by the Arab Spring uprisings and subsequent state responses became a prominent social and political category during the first two decades of the twenty first century in the Middle East Drawing on ethnographic fieldwork interview data and textual analysis Mayssoun Sukarieh explains that the spread of youth as an important category is linked to the operation of a global youth development complex a diverse transnational network of state private sector civil society and international development aid organizations that worked through key urban areas such as Washington DC Amman and Dubai In its analysis of the arrival extension and embedding of the youth development complex in the Middle East during this period A Global Idea addresses a broader question that is of global and not just regional concern How are certain ideas that are central to the working and reproduction of global capitalism able to travel the world so that they are found virtually everywhere *Global Innovation Science Handbook, Chapter 20 - Managing Development of Innovation Ideas* Cathie M. Kauffman,2016-11-01 When international agreements fail to solve global problems like climate change transnational networks attempt to address them by implementing global ideas policies and best practices negotiated at the global level locally around the world Grassroots Global Governance not only explains why some efforts succeed and others fail but also why the process of implementing global ideas locally causes these ideas to evolve Drawing on nodal governance theory the book shows how transnational actors success in putting global ideas into practice depends on the framing and network capacity building strategies they use to activate networks of grassroots actors influential in local social and policy arenas Grassroots actors neither accept nor reject global ideas as presented by outsiders Instead they negotiate whether and how to adapt them to fit local conditions This contestation produces experimentation and results in unique institutional applications of global ideas

infused with local norms and practices Grassroots actors ultimately guide this process due to their unique ability to provide the pressure needed to push the process forward Experiments that endure are perceived as successful empowering those actors involved to activate transnational networks to scale up and diffuse innovative local governance models globally These models carry local norms and practices to the international level where they challenge existing global approaches and stimulate new global governance institutions By guiding the way global ideas evolve through local experimentation grassroots actors reshape international actors thinking discourse organizing and the strategies they pursue globally This makes them grassroots global governors To demonstrate this the book compares transnational efforts to implement local Integrated Watershed Management programs across Ecuador and shows how local experiments altered the global debate regarding sustainable development and stimulated a new global movement dedicated to changing the way sustainable development is practiced In doing so the book reveals the grassroots level as not merely the object of global governance but rather a terrain where global governance is constructed
