**Global Views of Adolescence** Devin G. Thornburg, 2021-02-04 This book addresses what teachers and school leaders from a dozen countries see as the social and emotional strengths interests and needs of adolescents in their schools and communities how they innovate their programs and practices to respond to their students lives The book also describes how educators themselves benefit from social and emotional supports to be responsive Rather than assume that there are universal themes in adolescents lives the book is intended to illuminate the local contextual and powerful insights of educators daily working with students In many intentional respects each serves as an action research study with an effort to better the process and outcomes of their students growth and learning as well as to enrich the classroom The chapters are organized by themes ranging from challenges adolescents face in that particular locale to curriculum work that is project based transdisciplinary and tied to the communities where the adolescents live The voices of adolescents particularly with regard to their social and emotional development have been neglected in the literature Thus we know very little about their feelings and personal experiences as they progress through their schooling A book such as this will be beneficial in terms of providing a contribution to this field thereby increasing our understanding of the issues faced by adolescents across countries and cultures Peggy L Anderson Ph D Metropolitan State University of Denver The outstanding strength of this book is quite precisely its international scope here is an anthology that lives up to the claims made by its title Anyone interested in either adolescent development or Social and Emotional Learning in real world as opposed to abstract settings will appreciate the breadth of experience described Mokhtar El Maouhal Laboratoire de Recherche sur les Langues et la Communication

despite the ever increasing flow of publications on globalization our understanding and knowledge of it still leaves much to be desired Especially it concerns the global processes in general of which globalization is a part We also need to systematize our ideas about globalization and Global Studies to somehow fit the realities In particular this concerns the education process because the current state of education will determine the way people will perceive reality in the forthcoming decades This yearbook aims at contributing to the solution of these important tasks It is the third in the series of yearbooks titled Globalistics and Globalization Studies This year it has the following subtitle Aspects Dimensions of Global Views Its authors consider globalization and Global Studies in different dimensions and aspects philosophical methodological and pedagogical in terms of various processes problems and perspectives Of course to some extent this means that this yearbook presents rather diverse materials But globalization itself is very diverse And its comprehension may proceed in the framework of different theoretical approaches and points of view In the present yearbook one can find perceptions of globalization and Global Studies by a number of scholars from different countries of the world and learn rather peculiar visions of globalization by the Russian scientists and educators The yearbook will be interesting to a wide range of researchers teachers students and all those who pay attention to global issues

These issues are becoming increasingly pertinent due to the potentially devastating outcomes of human environmental carelessness. As a species, humans now have realized the need for worldwide environmental engagement. This engagement is intended to heighten awareness about environmental problems, build knowledge in education, and change human behaviors to improve sustainability. Synthesizing the literature on cultural dimensions, e.g., attitudes, beliefs, values, that undergird positive views of environmental issues and engagement of sustainability practices would significantly contribute to the development of effective approaches to fostering sustainable environmental practices. Through the identification of commonalities across cultures and sensitivity to cultural differences, we can begin to work toward a global consensus on viable solutions to this critical issue.
