## **Globalising Australian Capitalism:**

**Globalising Australian Capitalism** Robert Catley, 1996-10-07 Tells the story of Australia's integration into the international economy. It traces the Australian economy from Federation to its downturn in the 1970s and assesses the current state of play. Topics include the rise of economic rationalism, demographic and social repercussions of globalisation and the emerging power of the Asia Pacific region.

**Climate Change and Capitalism in Australia** Hans A. Baer, 2021-09-30 Recognizing that climate politics has been an increasingly contentious and heated topic in Australia over the past two decades, this book examines Australian capitalism as a driver of climate change and the nexus between the corporations and Coalition and Australian Labor parties. As a highly developed country, Australia is punching above its weight in terms of contributing to greenhouse gas emissions despite rising temperatures, droughts, water shortages and raging bushfires, storm surges and flooding, and the bleaching of the Great Barrier Reef. Drawing upon both archival and ethnographic research, Hans Baer examines Australian climate politics at the margins, namely the Greens, the labour union, the environmental NGOs and the grass roots climate movement. Adopting a climate justice perspective which calls for system change, not climate change as opposed to the conventional approach of seeking to mitigate emissions through market mechanisms and techno fixes, particularly renewable energy sources, this book posits system challenging transitional steps to shift Australia toward an eco socialist vision in keeping with a burgeoning global socio ecological revolution. Accessibly written and including an interview with renowned comedian and climate activist Rod Quantock OAM, this book is essential reading for academics, students and general readers with an interest in climate change and climate activism.

Suited Themselves Sharon Beder, 2012 In this brilliantly researched exposé, communications Rottweiler Sharon Beder blasts open the backrooms and boardrooms to reveal how the international corporate elite dictate global politics for their own benefit. Beder shows how they created business associations and think tanks in the 1970s to drive public policy, forced the worldwide privatization and deregulation of public services in the 1980s and 1990s, enabling a massive transfer of ownership and control over essential services, and still not satisfied, have worked relentlessly since the late 1990s to rewrite the very rules of the global economy to funnel wealth and power into their pockets. Want a globalized and homogenized world of conflict, poverty and massive environmental degradation run by a corporate

oligarchy that wipes its feet on democracy Or a democratic world where poverty is history companies work for people and clean water is a right not a privilege you pay for Beder s message is clear it s your world and it s time to fight for it **The Cambridge Handbook of Social Sciences in Australia** Ian McAllister, Steve Dowrick, Riaz Hassan, 2003-08-07 First published in 2003 The Cambridge Handbook of Social Sciences in Australia is a high quality reference on significant research in Australian social sciences The book is divided into three main sections covering the central areas of the social sciences economics political science and sociology Each section examines the significant research in the field placing it within the context of broader debates about the nature of the social sciences and the ways in which institutional changes have shaped how they are defined taught and researched *Globalisation and the Asia-Pacific* Iyanatul Islam, Moazzem Hossain, 2006-06-27 Presents contested perspectives on globalisation illustrated by the diverse experiences of selected economies of the Asia Pacific as case studies Country experiences ranging from broad political economy perspectives to industry case studies are discussed Australian Islam from Griffith university [This Great Beast](#) R.
