**Globalization and Governance** Ann Marie Bissessar, 2014-10-04 Despite the controversial nature of globalization there is no doubt that the pace and intensity of global interactions has been multiplied exponentially over the last few decades Criticism of globalization is generally arranged into three camps political economic and cultural Political critics point to the status of the small state and conclude either that it is in retreat or that the state has reconstituted itself to confront the challenges posed by globalization thereby transforming itself into a competition state Economic critics hold that globalization is nothing new that international transactions are in the logic of capitalism and that the trade along the silk route goes back centuries Cultural critics protest that globalization is taking us headlong into the homogenization of the world Others warn of new fault lines that would lead to a clash of civilizations and international conflicts along those lines Others lament that cultural globalization will end with the Americanization of the world This collection of essays like the debates themselves is divided into three parts The first section focuses on the political aspects of globalization In one essay Globalization and the Caribbean the essayist argues that internationalization leaves no room for small countries in the Caribbean The essays in the second section are devoted to an economic inquiry into the process and impact of globalization In Inequality and the Division of Gains at the Global Level one essayist notes that the logic of economic theory is being overwhelmed by the interests of the powerful and that the concerns of the poor countries are important only to the point where they begin to impact the well being of the rich The final section explores the issue of cultural and social integration Instructors considering this book for use in a course may request an examination copy here

**D.W. Winnicott and Political Theory** Matthew H. Bowker, Amy Buzby, 2017-01-31 In this volume the work of British psychoanalyst D W Winnicott is set in conversation with some of today's most talented psychodynamically sensitive political thinkers The editors and contributors demonstrate that Winnicott's thought contains underappreciated political insights discoverable in his reflections on the nature of the maturational process and useful in working through difficult impasses confronting contemporary political theorists Specifically Winnicott's psychoanalytic theory and practice offer a framework by which the political subject destabilized and disrupted in much postmodern and contemporary thinking may be recentered Each chapter in this volume in its own way grapples with this central theme the potential for authentic subjectivity and intersubjectivity to arise within a nexus of autonomy and dependence aggression and civility destructiveness and care This volume is unique in its contribution to the growing field of object relations oriented political and social theory It will be of interest to political scientists psychologists and scholars of related subjects in the humanities and social sciences

Franda, 2006 The United Nations is confronting a severe crisis at the beginning of the twenty first century Its capabilities have been called into question amid a rash of recent scandals and charges of leadership mismanagement bureaucratic ineptitude and corrupt activities Current world opinion seems to express elevated concern about the organization's ability to

deal with the complexity of international relations in the new millennium Despite six decades of survival its membership still appears unable to maintain a consistent focus or set of practices to pursue common goals The United Nations in the Twenty First Century analyzes the significance of the many forces and events affecting the UN s efforts at reform It provides a detailed examination of these processes for all of the major UN organs and agencies including chapters on the Secretaries General the Secretariat the General Assembly the Security Council and ECOSOC The chapters on the Secretaries General are the only detailed discussion that compares contrasts and evaluates the tenures of the seven people who have headed the UN The book s concluding chapters focus on Kofi Annan s reform agenda as it relates to previous UN reform experiences and assess the future impact of recent UN related scandals and charges of mismanagement *Social Partnership and Governance Under Crises* Nelson, Carol, 2019-05-15

### **Trade Investment and Development in the Contemporary Caribbean** Bhoendradatt Tewarie, Roger Hosein, 2007

Small open economies like those making up the countries of the Caribbean region share a number of fundamental problems of economic management which ultimately affect the entire development process Co authors Bhoie Tewarie and Roger Hosein use Trinidad and Tobago and the management of its energy resources as a case study to examine some of the development challenges that face countries of the region They make the point that in spite of that country s abundant energy resources which has allowed it to grow at a comparatively rapid rate Trinidad and Tobago like lesser endowed CARICOM partners has had to cope with challenges such as diversification human development managerial capacity and institutional weakness all of which contributed to seven consecutive years of decline between 1983 and 1990 Not only is the availability of resources no guarantee for economic success it also creates unique problems and in the case of Trinidad and Tobago this is manifested in uneven development in the energy sector compared to other sectors of the economy and society While the volume focuses on Trinidad and Tobago there is ample discussion of a range of issues that affect the entire region extending from trade within

CARICOM to globalization open regionalism relations with the United States human capital formation and the role of education systems and educational policy in the development process Tewarie and Hosein combine their talents and research in the areas of economics culture education literature trade and investment and development generally to produce a volume that is rich in data and insights into the development process *Parliamentary Dimensions of Regionalization and Globalization* O.
