Globalization in the Asian Region  
Gloria Davies, Chris Nyland, 2004-04-28 For anyone seeking a diverse range of perspectives on globalisation in the Asia Pacific region this collection of highly readable essays is a good place to start Focusing on individual countries the chapters examine the specific modalities of global integration and the responses of different sections of society in each country The authors address questions of major importance for democratic societies such as the connection between globalisation and the rise of religious extremism whether globalisation is in reality a new form of imperial preference who the winners and losers are These are complemented by three short case studies dealing with Indonesia's unrealised potential foreign investment in China and patterns in the movement of people between Hong Kong and the mainland The essays provide a rich source of thought provoking analysis of the complex cultural and political responses arising from both opportunities provided by globalisation and its more negative impacts Melanie Beresford Macquarie University Australia

Globalization in the Asian Region draws confident ragged lines across disciplines themes and the conventional boundaries of scholarship The range of material in the anthology is astounding The diversity and admixture of political positions and approaches is confronting Contemporary Asia is thus mapped without overgeneralizing a homogenous whole Paul James RMIT University Australia This collection of thoughtful essays provides a reliable picture of the dynamic and often ironic operation of globalization in Asia today and challenges individuals to believe that as communities we have a choice in how we respond and contribute to globalization The editors highlight the multifaceted nature of globalization and bring to the fore its supraterritoriality A dozen detailed studies make good on these claims from analyses of American militancy since 9 11 terrorism and poverty to case studies on Malaysia Indonesia India Australia New Zealand Japan and China These essays make clear the interactive nature of globalization as various economic cultural and political forces pour into Asian societies while the impact of their responses from exports to currency fluctuations to migration flows to transnational religious movements in turn reshape the selfsame globalization process Timothy Cheek University of British Columbia Canada

Bringing together contributors from both the university sector and business centered research institutions this comprehensive volume offers diverse perspectives on the impacts and consequences of globalization in different parts of the Asian region Each chapter offers a substantial account of globalization within a particular nation state or area in the region Different understandings underpin the chapters Some contributors perceive globalization as progress in the form of economically driven processes that have made nations

mutually dependent in unprecedented and complex ways Others emphasize the uneven outcomes of globalization as well as the stakes for economic growth and social order in the global climate of deepening political and religious divisions since September 2001 General and specialist readers alike will gain an appreciation of the myriad emphases placed on globalization within different nations and from various vantage points The book showcases diverse styles of discourse and serves to greatly broaden the scope of what can be discussed under the rubric of globalization within a single volume

**The WTO and Infant Industry Promotion in Developing Countries** Juan He, 2014-09-25 The charter of the World Trade Organization WTO sets the tone that sustainable trade and economic development dominates multilateral trade negotiation and specific working agreements This book examines the novel challenge for developing countries to upgrade and optimize their industrial structure and trade composition by stimulating genuinely innovative and competitive industrial strength The book specifically explores the issue of infant industry promotion under the legal framework of the WTO treaties and case law Taking the regulatory measures and incentives China has used to build up a large civil aircraft supplier the book evaluates the key trade agreements relevant to infant industry promotional policies and practices such as product regulations and standards under the Agreement on Technical Barriers to Trade and export promotion policies under the Agreement on Subsidies and Countervailing Measures Juan He argues that the regulatory room prescribed by the multilateral trade rules of the WTO does not allow adequate space for developing countries to encourage new and technologically advanced areas of production and trade The author concludes by suggesting ways in which WTO rules could be modified to help enable developing countries industrialization In doing so the book highlights a need to investigate how localized and international policy trends can be reconciled and enhanced towards the common goal of development The book will be of great interest to scholars and students of international trade law Chinese studies international political economy and of great use to government agencies responsible for internal trade and industrial policy decisions

uncovers a significant and generally unrecognised development in Japanese politics SNGs are ever more dynamic international actors as national borders weaken across the world Exploring what Japanese SNGs do where they do it and why the book considers the implications of these factors for Japan s international relations and domestic politics By bringing to light the scope and consequences of the international actions of Japan s SNGs this book provides a more accurate and nuanced understanding of the country s foreign policy at a time when it is pursuing a broader and more active profile in international affairs
