Globalization Inequality And The Commodification Of Life And Wellbeing:

Globalization, Inequality and the Commodification of Life and Well-Being Mammo Muchie,2006-01-31 Wealth and money which are meant to be sources of human happiness and facilitators of good social relations has instead become a monstrosity beyond human control The unbridled quest to make money and accumulate wealth as well as assign social signification on the basis of the outcome of individuals efforts in the process has ended up distorting existence and the meaning of being human itself This work brings together a collection of very provocative and challenging articles that confront the problems created by wealth Can there be happiness when wealth is increasingly concentrated in fewer and fewer hands Can wealth really bring happiness And what are the implications of the current trend to commodify everything for the project of human happiness The contributors to the volume argue that there is a need to change wealth accumulation and its core purpose They contend that from wealth accumulation the gear must change to wealth alleviation because the ways the rich become wealthy often correlate with the ways the number of the poor increase Following from this they argue that rather than the current focus on poverty alleviation the focus should shift to wealth alleviation because a happy future for all lies in promoting human well being and removing human ill being through the spring wells of solidarity and humanity

Globalization, Inequality, and the Commodification of Life and Well-being Mammo Muchie,Li Xing,2006 In this sense therefore they argue that rather than the current focus on poverty alleviation the focus should shift to wealth alleviation because a happy future for all lies in promoting human well being and removing human ill being through the spring wells of solidarity and humanity

Transnationalism And CivicEngagement Abdulkadir Osman Farah,2012-10-25 The question of population migration and Diaspora transnationalism in the age of globalization is an area of social sciences deserving much more attention than it has received This book deals with the advent of new ideological currents based on an assumed Clash of Civilizations increasingly popular in social economic and political discourses In this regard applicable oriental literature on migration and Diaspora formation is comparatively older than what has been produced in the west in

recent years thus deserving careful consideration For instance when dealing with transnational communities the concept of qabiil kinship allegiance as a central organizational factor dominates western scholarship Instead this book favors taking both western and non western approaches into consideration in order to achieve deeper and richer understanding of the transnational global Diaspora condition In order to surmount the dichotomy of essentialist versus non essentialist frames the epistemological approach instrumentalized in this work follows an emancipatory method critically engaging both approaches Furthermore the book proposes a theoretical framework analytically connecting western and non western social inquiry Hence we should note Emile Durkheim s scheme of modern society transformation from mechanical to organic solidarity was preceded by Ibn Khaldun s binary scheme distinguishing badawa primitive or pre modern i e symbolizing nomadism loyalty and tribalism from hadara civilization or modern i e symbolizing modernity urbanization and individualism Finally this book empirically examines how a host country s mobilizing political and structural opportunities or lack of them influence transnational Diasporas civic engagement that often include the application of combined formal and informal social economic and political capital in addressing multifaceted challenges emanating from host and homeland environments European Political Economy Leila Simona Talani,2020-09-10 As with the previous version Ashgate 2004 this second edition is divided for didactic purposes into two parts The first part provides an overview of political science approaches to European political economy both mainstream and critical ones As such it contributes directly to the current debate among scholars of political science and international political economy concerning the nature of the process of European integration The second part provides alternative explanations of some European economic policy events the ECB banking regulation fiscal co ordination the crisis of the euro zone social policy and unemployment allowing the reader to assess the explanatory value of competing approaches
