The Evolution of Carbon Markets Jørgen Wettestad, Lars Gulbrandsen, 2017-12-14 Carbon markets are developing and expanding around the world but how and to what extent is their design shaped by learning and interaction between them How do these markets function and what is the role of design Carrying out a ground breaking analysis of their design and diffusion this book covers all the major carbon market systems and processes around the world the EU RGGI California Tokyo New Zealand Australia China South Korea and Kazakhstan It offers a systematic in depth discussion and comparison of the key design features in these systems with expert contributors exploring how and to what extent these features have been shaped by central policy diffusion mechanisms and domestic politics By focussing on the specific design features of the instruments used this volume makes important contributions to diffusion theory highlighting how ETS diffusion processes

more often have resulted in design divergence than convergence and discussing the implications of this finding for the vision of linked systems in the post Paris era It will be of significant interest to a broad audience interested in the emergence evolution functioning and interaction of carbon markets *Widen the Market, Narrow the Competition* Daniel Mücke, 2024-10-31 EU capital markets have changed radically over the past 20 years In the 1980s countries had their own financial industries and rules Now there is one Champions League of banks and member states have transferred crucial regulatory powers to Brussels Drawing on policy documents and more than fifty in depth interviews *Widen the Market Narrow the Competition* argues that financial industry interests have been key to this power shift Continental banks initially feared a single European market and governments followed their protectionist impulses In the 1990s the mood changed and the likes of ABN AMRO and Deutsche Bank rushed into international investment banking They emerged as the crucial lobby for the supranational governance in place today Linked by the interests of centrally placed firms EU financial integration and supranational governance have been two sides of the same coin At the same time national parliaments and ordinary citizens have been pushed to the sidelines **Rethinking World Bank Influence** D. Brent Edwards Jr., 2023-04-13 Why is it so hard for international development organizations even ones as well resourced and influential as the World Bank to generate and sustain change in the way things are done in those countries where they work Despite what in many cases is decades of investment and effort why do partner governments continue to engage in those traditional patterns and styles of public service management that international development organizations have sought to supplant with methods that are supposedly more accountable efficient and effective This book provides an answer to these questions However rather than pathologizing partner governments as the source of the problem that is rather than maintaining the distinction between doctor international development organizations and patient partner governments wherein the patient is seen as unwilling to take their medicine enacting good governance practices this book instead reframes the relationship The central argument is first that the programs and projects of international organizations are introduced into and are constrained by multiple layers of ritual governance that is performative acts and cultural logics that intersect with and reinforce the political economic and social structures in and through which they operate As is shown the contextual factors that guide governance practices are largely beyond the reach of the international development organizations the relevant logics have their roots in state ideology but also extend back to the colonial logics that continue to operate at the heart of the state apparatus The second the central argument is that international aid organizations and the governments with which they work are engaged in a ritual aid dance where each actor plays a part but does not and cannot acknowledge the ways that it depends on the other for its own gain This relationship can be considered a dance because each participant responds to and needs the other and because both sides do so in ways that are carefully choreographed with the overall trajectory or contours of the dance being more or less known to the participants These arguments are based on research on the World Bank s efforts over the course of several

decades to encourage through its financing projects and technical assistance the implementation of social sector reform in Indonesia related to decentralization community participation and school based management

Rethinking World Politics Philip G. Cerny, 2010-03-24 *Rethinking World Politics* is a major intervention into a central debate in international relations how has globalization transformed world politics Most work on world politics still presumes the following in domestic affairs individual states function as essentially unified entities and in international affairs stable nation states interact with each other In this scholarship the state lies at the center it is what politics is all about However Philip Cerny contends that recent experience suggests another process at work transnational neopluralism In the old version of pluralist theory the state is less a cohesive and unified entity than a varyingly stable amalgam of competing and cross cutting interest groups that surround and populate it Cerny explains that contemporary world politics is subject to similar pressures from a wide variety of sub and supra national actors many of which are organized transnationally rather than nationally In recent years the ability of transnational governance bodies NGOs and transnational firms to shape world politics has steadily grown Importantly the rapidly growing transnational linkages among groups and the emergence of increasingly influential even powerful cross border interest and value groups is new These processes are not replacing nation states but they are forging new transnational webs of power States he argues are themselves increasingly trapped in these webs After mapping out the dynamics behind contemporary world politics Cerny closes by prognosticating where this might all lead Sweeping in its scope *Rethinking World Politics* is a landmark work of international relations theory that upends much of our received wisdom about how world politics works and offers us new ways to think about the forces shaping the contemporary world
