Understanding the Dynamics of Global Inequality Alexander Lenger, Florian Schumacher, 2014-12-03 Despite the fact that the globalization process tends to reinforce existing inequality structures and generate new areas of inequality on multiple levels systematic analyses on this very important field remain scarce Hence this book approaches the complex question of inequality not only from different regional perspectives covering Africa Asia Europe Latin and Northern America but also

from different disciplinary perspectives namely cultural anthropology economics ethnology geography international relations sociology and political sciences The contributions are subdivided into three essential fields of research Part I analyzes the socio economic dimension of global exclusion highlighting in particular the impacts of internationalization and globalization processes on national social structures against the background of theoretical concepts of social inequality Part II addresses the political dimension of global inequalities Since the decline of the Soviet Union new regional powers like Brazil China India and South Africa have emerged creating power shifts in international relations that are the primary focus of the second part Lastly Part III examines the structural and transnational dimension of inequality patterns which can be concretized in the rise of globalized national elites and the emergence of multinational networks that transcend the geographical and imaginative borders of nation states

Global Religions Mark Juergensmeyer, 2003-03-20 Can Islam be located on a map Is Europe the center of the Christian world Is India a Hindu nation While decades ago these questions were often answered in the affirmative the truth has never been that simple Not only are adherents of particular faiths spread across the globe but there are many variations of a particular faith practiced side by side This has only become more true in recent years as the pace of globalization has quickened The essays collected here provide brief and accessible introductions to the major world religions in their global contexts The volume begins with an introduction to the globalization of religion by Mark Juergensmeyer and is followed by individual essays on Christianity Islam Judaism Hinduism Buddhism and local religious societies The book concludes with three essays reflecting on the global religious scene Taken together these essays provide a concise authoritative and highly readable introduction to the state of worldwide religion in the 21st century

Religion, Identity and Human Security Giorgio Shani, 2014-04-03 Religion Identity and Human Security seeks to demonstrate that a major source of human insecurity comes from the failure of states around the world to recognize the increasing cultural diversity of their populations which has resulted from globalization Shani begins by setting out the theoretical foundations dealing with the transformative effects of globalization on identity violence and security The second part of the volume then draws on different cases of sites of human insecurity around the globe to develop these ideas examining themes such as securitization of religious symbols retreat from multiculturalism rise of exclusivist ethno religious identities post 9 11 state religion colonization and the racialization of migration Highlighting that religion can be a source of both human security and insecurity in a globalizing world Shani offers a critical human security paradigm that seeks to de secularize the individual by recognizing the culturally contested and embedded nature of human identities The work argues that religion serves an important role in re embedding individuals deracinated from their communities by neo liberal globalization and will be of interest to students of International Relations Security Studies and Religion and Politics

The Consequences of Global Disasters Anthony Elliott, Eric L. Hsu, 2016-04-14 Disasters of the 21st century differ substantially from other kinds of hazards that previous societies have had to cope with because of the twin forces of globalization and the communications revolution But what makes today's disasters industrial technological environmental and socio cultural so different in scope and impact What are the possible disasters of the future And how can we as collective humanity best manage and respond to the globalization of disasters The Consequences of Global Disasters makes a distinctive contribution to the ever expanding field of disaster research by developing a multi contextual multi disciplinary and multi methodological approach to the social analysis of disasters Anthony Elliott and Eric L Hsu have brought together a highly distinguished group of international contributors to focus on how people react to the unsettling effects of disasters which come in a multitude of forms Numerous contributors concentrate on the cultural political and psychological ramifications of the 2011 Great East Japan earthquake

and tsunami but disasters in other contexts such as Australia China and Haiti are considered as well By offering unique empirical methodological and theoretical insights *The Consequences of Global Disasters* sets an agenda for future developments in the field of disaster research and will be a key resource for students and scholars working in social science disciplines such as sociology cultural studies international relations psycho social studies social work Japanese studies and social theory
