Security, Technology and Global Politics Mark Lacy, 2014-02-05 This book analyses some of the key problems explored in Paul Virilio's theorising on war and security Paul Virilio has developed a provocative series of writings on how modern societies have shaped the acceleration of military security technologies and how technologies of security and acceleration have transformed society economy and politics His examination of the connections between geopolitics war speed technology and control are viewed as some of the most challenging and disturbing interventions on the politics of security in the twenty first century interventions that help us understand a world that confronts problems that increasingly emerge from the desire to make life safer faster networked and more efficient

Security Technology and Global Politics examines some of the key concepts and concerns in Virilio's writings on security society and technology endo colonization fear and the war on terror cities and panic cinema and war ecological security and integral accidents universities and ideas of progress Critics often point to an apocalyptic or fatalistic element to Virilio's writings on global politics but this book challenges this apocalyptic reading of Virilio's work suggesting that while he doesn't provide us with easy solutions to the problems we face the political force in Virilio's work comes from the questions he leaves us with about speed security and global politics in times of crisis terror and fear This book will be of interest to students of critical security studies political theory sociology political geography cultural studies and IR in general

Local Politics, Global Impacts Olivier Charnoz, Virginie Diaz Pedregal, 2016-05-06 Serving as a touchstone for a much needed research program on social scales this volume challenges disciplinary boundaries and brings into focus a

paradoxical state of affairs in contemporary thought the domain of local global interactions has not yet been identified as an object of analysis in its own right despite engaging a large multi disciplinary research community with strong potential for cross fertilization Bringing together internationally renowned as well as emerging scholars this book presents concrete case studies framed by theoretical concern with the issue of scale It demonstrates that a diverse array of theoretical methodological and empirical perspectives can productively converge on a common set of problems related to social temporal and spatial scales and contemporary globalization Local Politics Global Impacts will stimulate empirical and theoretical research that focuses on understanding how political concepts practices and instruments translate across scales and contribute to the emergence of a self aware community of scholars and practitioners focusing explicitly on modelling the dynamics of local regional global interactions
