Civil Society, Post-Colonialism and Transnational Solidarity Marie-Violaine Louvet, 2016-06-28 Civil Society Post Colonialism and Transnational Solidarity originates from Louvet's observation of the strong commitment of a layer of Irish civil society from the man on the street to political parties associations and trade unions to the defence of one antagonist or the other in the Israeli Palestinian conflict beginning with the Six Day War in 1967 and increasingly so after the Lebanon Wars at the start of the 1980s and the Second Intifada 2000 2005 This book observes how this phenomenon is particularly striking in Northern Ireland where Israeli and Palestinian flags have been flown by Unionists and Nationalists as signs of solidarity and identification Louvet sheds light on the dynamics and strategies at play in the Middle East conflict in Northern Ireland but also in the Republic of Ireland a country considered to be widely sympathetic to the Palestinian cause With an overarching perspective highlighting the influence of Irish colonial history over the motives and discourse of the different levels of mobilization in civil society this book shows the global movement towards the fragmentation and specialization of transnational solidarity actions in Ireland

Global Geographies of the Internet Barney Warf, 2012-08-01 Today roughly 2 billion people use the internet and its applications have flourished in number and importance This volume will examine the growth and geography of the internet from a political economy perspective Its central motivation is to illustrate that cyberspace does not exist in some aspatial void but is deeply rooted in national and local political and cultural contexts Toward that end it will invoke a few major theorists of cyberspace but apply their perspectives in terms that are accessible to readers with no familiarity with them Beyond summaries of the infrastructure that makes the internet possible and global distributions of users it delves into issues such as the digital divide to emphasize the inequalities that accompany the growth of cyberspace It also addresses internet censorship e commerce and e government issues that have received remarkably little scholarly attention particularly from a spatial perspective Throughout it demonstrates that in cyberspace place matters so that no comprehensive understanding of the internet can be achieved without considering how it is embedded within and in turn changes local institutional and political contexts Thus the book rebuts simplistic death of distance views or those that assert there is or can be a one size fits all cookie cutter model of the internet applicable to all times and places
