*Surveillance as Sociotechnical Accountability* Deborah G. Johnson,Priscilla M. Regan,2014-07-11 Surveillance and  
transparency are both significant and increasingly pervasive activities in neoliberal societies Surveillance is taken up as a  
means to achieving security and efficiency transparency is seen as a mechanism for ensuring compliance or promoting  
informed consumerism and informed citizenship Indeed transparency is often seen as the antidote to the threats and fears of  
surveillance This book adopts a novel approach in examining surveillance practices and transparency practices together as  
parallel systems of accountability It presents the house of mirrors as a new framework for understanding surveillance and  
transparency practices instrumented with information technology The volume centers around five case studies Campaign  
Finance Disclosure Secure Flight American Red Cross Google and Facebook A series of themed chapters draw on the  
material and provide cross case analysis The volume ends with a chapter on policy implications      *Dear GLOBE Teachers:*

Handbook on Geographical Education Rod Gerber,2013-03-09 I am very pleased to have been asked by Rod Gerber to  
provide a preface to such a book Not least because of the twenty four chapters eight are written by former students or  
colleagues with whom I have worked in the past and whom I still meet at conferences on geographical education It is with a  
certain pride and joy that I note the progress which has been made in geographical education both in its day to day teaching  
and in research in the twenty years following the end of my term of office as Chair of the Commission on Geographical  
Education of the International Geographical Union CGEIUG My successors Joe Stoltman Hartwig Haubrich Rod Gerber and  
now Lea Houtsonen have done much and are continuing to work hard to foster the development of geographical education  
This book is proof if proof were needed that the international collaboration in this field is alive and well with contributions  
coming from all the continents except Antarctica It would be a moribund subject that remained unaffected in one way or  
another by developments on the great world stage as Fairgrieve 1926 would have put it And as Rod Gerber shows the issues  
of globalisation of cultural encounters of differing value systems of new technologies of variable economic development and  
of environmental quality all feature as topics which influence and are influenced by geographical education      *National*

**Psychology's WEIRD Problems** Guilherme Sanches de Oliveira, Edward Baggs, 2023-06-22 Psychology has a WEIRD problem. It is overly reliant on participants from Western Educated Industrialized Rich and Democratic societies. Over the last decade, this problem has come to be widely acknowledged, yet there has been little progress toward making psychology more diverse. This Element proposes that the lack of progress can be explained by the fact that the original WEIRD critique was too narrow in scope. Rather than a single problem of a lack of diversity among research participants, there are at least four overlapping problems. Psychology is WEIRD not only in terms of who makes up its participant pool but also in terms of its theoretical commitments, methodological assumptions, and institutional structures. Psychology as currently constituted is a fundamentally WEIRD enterprise. Coming to terms with this is necessary if we wish to make psychology relevant for all humanity.
