Rensink, 2022-11 In 1893 Frederick Jackson Turner famously argued that the generational process of meeting and conquering the supposedly uncivilized western frontier is what forged American identity In the late twentieth century new western historians dissected the mythologized western histories that Turner and others had long used to embody American triumph and progress While Turner's frontier is no more the West continues to present America with challenging processes to wrestle navigate and overcome The North American West in the Twenty-First Century edited by Brenden W. Rensink takes stories of the late twentieth century modern West and carefully pulls them toward the present explicitly tracing continuity with or unexpected divergence from trajectories established in the 1980s and 1990s Considering a broad range of topics including environment Indigenous peoples geography migration and politics these essays straddle multiple modern frontiers not least of which is the temporal frontier between our unsettled past and uncertain future These forays into the twenty-first century West will inspire more scholars to pull histories to the present and by doing so reinsert scholarly findings into contemporary public awareness **Loggers' Handbook**, 1984 **American Book Publishing Record**
