Time Matters T.M. Rudavsky, Tamar Rudavsky, 2000-02-10 Traces the development of the concepts of time cosmology and creation in medieval Jewish philosophy Life's Last Fork in the Road: Finding Your Heaven's Zip Code Dr. Glenn M. Cosh, 2022-08-05 We all have an earthly zip code a place we live and call home It ranges from 10001 for New Yorkers to 90210 for those in Beverly Hills But what about our life after death the next phase for our souls aEUR the afterlife eternity and heaven Yes we seek guidance from the world's major religions and the plethora of beliefs and perceptions from other sources as to where our souls might end up Yet an astonishing one quarter of those who consider themselves part of a major religion still don't believe in heaven at all Life's Last Fork in the Road offers a thought provoking scientific and theological overview of what heaven is and isn't among the major belief systems but goes a step further asking and offering answers to the question What zip code do you want on your tombstone Like your fingerprint you want it to fit within your spiritual beliefs and comfort zone not someone else's If we can choose our zip code on earth why not in heaven The Emperor Landing on the Nine Heavens Kong Shen, 2019-11-08 I am the Emperor of the Nine Layered Heavens of the Myriad Domain My decree is so vast that in this world there is no one who dares to disobey it This was the story of an ordinary boy like Lin Dong growing up to become the Nine Heavens Emperor Experts were as numerous as the clouds and they could also be seen how Lin Dong managed to carve a path through countless geniuses and powerhouses If a beauty falls in love how could the main character choose **Heaven and Hell** Emanuel Swedenborg, 1896 **The Monthly Review**, 1835 Essays on Islamic Philosophy George Fadlo Hourani, 1975-01-01 "A Knot Worth Unloosing" John H. Duff, 2019-01-21 In the study of Christian eschatological thought virtually no attention has been given to past interpretations of the biblical phrase the new heavens and earth John Duff uncovers the interpretations of this phrase that were extant in seventeenth century England These interpretations fall into two basic camps those that understood the phrase metaphorically and those that understood the phrase literally Some English divines believed the new heavens and earth referred to the new age of the gospel that commenced in the first century CE At that time God flung open the doors of salvation to Gentiles while at the same time bringing judgment to the Jewish nation for its failure to recognize and embrace Jesus as Messiah This epic transition was fittingly described as a new heavens and earth A second group of English interpreters believed the phrase stood for a yet future time when the political and religious circumstances of the world would change for the betterment of the church for one thousand years The new heavens and earth stood for a future millennium in which Christ would establish his reign over the world prior to the day of resurrection and final judgment Theologians who accepted a literal understanding believed the new heavens and earth described the renovation of the physical creation at the final judgment Among this group differences of opinion existed with respect to how much of the world would need cleansing what creatures would be restored and of what use would a renovated world serve The idea that the earth and not heaven would be the final abode of the saints emerged

Chryssides,2011 The Heaven s Gate suicides were part of a series of major violent incidents involving New Religions in the 1990s Despite the

major attention that Heaven's Gate attracted there have been few scholarly studies This anthology on Heaven's Gate includes a combination of articles previously published in academic journals some new writings from experts in the field and some original Heavens Gate documents All the material is expertly brought together under the editorship of George Chryssides

Towards a Theory of Spacetime Theories Dennis Lehmkuhl, Gregor Schiemann, Erhard Scholz, 2017-01-05 This contributed volume is the result of a July 2010 workshop at the University of Wuppertal Interdisciplinary Centre for Science and Technology Studies which brought together world wide experts from physics philosophy and history in order to address a set of questions first posed in the 1950s How do we compare spacetime theories How do we judge objectively which is the best theory Is there even a unique answer to this question The goal of the workshop and of this book is to contribute to the development of a meta theory of spacetime theories Such a meta theory would reveal insights about specific spacetime theories by distilling their essential similarities and differences deliver a framework for a class of theories that could be helpful as a blueprint to build other meta theories and provide a higher level viewpoint for judging which theory most accurately describes nature But rather than drawing a map in broad strokes the focus is on particularly rich regions in the space of spacetime theories This work will be of interest to physicists as well as philosophers and historians of science working with or interested in General Relativity and or Space Time and Gravitation more generally
