Heidegger And The Place Of Ethics Being With In The Crossing Of Heideggers Thought:

Heidegger and the Place of Ethics Michael Lewis, 2005 **Heidegger and the Place of Ethics** Michael

Lewis, 2014-01-15 Despite Heidegger's identifying his own thought with ethics in the most original sense his understanding of ethics has been criticised both for its supposed ignorance of the role of the other human being and for its relation to politics. This book contends that in fact it is Heidegger's own notion of being with his rethinking of intersubjectivity which demonstrates precisely what is wrong with his early work and demands that the place of ethics be rethought. Heidegger and the Place of Ethics shows how this rethinking occurs in Heidegger's own laterwork. In particular the crossing out of the earlier work in the turn to the later allows us to think being with as essential to a Heideggerian ethics and to rethink the relationship between ethics and politics which previously issued in Heidegger's engagement with Nazism. This rethinking of ethics and politics in light of the originality of being with brings us before a hitherto unnoticed proximity between Heidegger's later work and the Lacanian political thought of Slavoj Žižek among others it thereby opens up the possibility of a politically progressive Heideggerianism and many unexpected encounters with thinkers generally considered to be separated from Heidegger by an abyss.

Jean-Luc Nancy and the Thinking of Otherness Daniele Rugo, 2013-05-09 Jean Luc Nancy and the Thinking of Otherness is the first book in English to provide a sustained account of the relationship between Nancy, Levinas and Heidegger. It investigates Jean Luc Nancy's reading of Heidegger focusing on the question of Being with and starting with the problem of otherness in Heidegger the book goes on to establish a dialogue between Nancy and the philosophy of Emmanuel Levinas. With intellectual agility and command of cinema, literature and visual art Daniele Rugo insists on the critical significance of Nancy's project for any future philosophy attempting to define itself beyond foundational acts and according to the continuous crossings at the heart of existence. By discussing Nancy alongside Heidegger and Levinas Rugo underlines the essential indecision between philosophy as literature and philosophy as the re-appropriation of the question of Being. Rugo offers unexpected associations which return thinking to the play of specificity rather than restricting it to the passage of abstract formulations.

Heidegger's Social Ontology Nicolai Knudsen, 2022-11-24 This book reconstructs Heidegger's social ontology emphasizing his unique contributions to debates on social cognition, collective intentionality and social normativity.

Heidegger and the Aesthetics of Living Vrasidas Karalis, 2009-03-26 The publication brings together contributions by many scholars, academics and researchers on the work of the German philosopher from a variety of perspectives and approaches. Prominent thinkers from various disciplines engage in a fascinating dialogue with the work of Martin Heidegger in an attempt to explain and critically evaluate his controversial legacy. The volume is an attempt to go beyond the polarised perceptions about the philosophy of Heidegger and present a neo-humanist reading of what can be still considered livable in it. Contributions also examine the consequences of Heidegger's thinking for a wide range of modes of cultural production and aspects of philosophical enterprise. Finally the volume attempts the first post-political

interpretation of his work by focusing on the texts themselves for the conceptual values they formulate and the modes of thinking they established Contributors are Gianni Vattimo Jeff Malpas Anthony Stephens Peter Murphy Elizabeth Grierson Paolo Bartoloni John Dalton Colin Hearfield Jane Mummary Robert Sinnerbrink Ashley Woodward Peter Williams George Vassilacopoulos and Vrasidas Karalis

On Becoming God:Late Medieval Mysticism and the Modern Western Self Ben Morgan,2013 Do we have to conceive of ourselves as isolated individuals inevitably distanced from other people and from whatever we might mean when we use the word God On Becoming God offers an innovative approach to the history of the modern Western self by looking at human identity as something people do together rather than on their own Ben Morgan argues that the shared practices of human identity can be understood as ways of managing and keeping at bay the impulses and experiences associated with the word God The self is a way of doing things or of not doing things with God The book draws on phenomenology Heidegger gender studies Beauvoir Butler and contemporary neuroscience to present a new approach to the history of modern identity It surveys existing approaches to modern selfhood Foucault Charles Taylor and proposes an alternative account by investigating late medieval mysticism in particular texts written in Germany by Meister Eckhart and others in the same milieu Reactions to the condemnation of Meister Eckhart s teaching for heresy in 1329 offer a microcosm of the circumstances in which something like the modern self arises as people change their behavior toward others toward themselves and toward what they call God The book makes Meister Eckhart and his contemporaries appear as our contemporaries by changing the assumptions with which we approach our own identity To make this change requires a revision of current vocabularies for approaching ourselves and in particular the vocabulary and habits inherited from psychoanalysis The book finishes by exploring the parallel between late medieval confessors and their spiritual charges and late nineteenth century psychoanalysts and their patients The result is a renewed vision of the Freud s project of finding a vocabulary for acknowledging and nurturing our everyday commitments to others and to our spiritual longings

From Conventionalism to Social Authenticity Hans Bernhard Schmid, Gerhard Thonhauser,2017-08-10 This edited volume offers a new approach to understanding social conventions by way of Martin Heidegger It connects the philosopher s conceptions of the anyone everydayness and authenticity with an analysis and critique of social normativity Heidegger s account of the anyone is ambiguous Some see it as a good description of human sociality others think of it as an important critique of modern mass society This volume seeks to understand this ambiguity as reflecting the tension between the constitutive function of conventions for human action and the critical aspects of conformism It argues that Heidegger s anyone should neither be reduced to its pejorative nor its constitutive dimension Rather the concept could show how power and norms function This volume would be of interest to scholars and students of philosophy and the social sciences who wish to investigate the social applications of the works of Martin Heidegger

Derrida and Lacan Michael Lewis,2008-11-03 Derrida and Lacan Another Writing argues that Jacques Derrida s philosophical understanding of language should be

supplemented by Jacques Lacan's psychoanalytic approach to the symbolic order Lacan adopts a non philosophical genetic or developmental approach to the question of language and in doing so isolates a dimension that Derrida cannot properly envisage the imaginary Michael Lewis argues that the real must be understood not just in relation to the symbolic but also in relation to the imaginary The existence of an alternative approach to the real that is other than language allows us to identify the idiosyncrasies of Derrida's purely transcendental approach an approach that addresses language in terms of its conditions of possibility Lacan shows us that an attention to the genesis of the symbolic order of language and culture should lead us to understand this real other in a different way This book relates transcendental thought to the insights of non philosophical thought and more specifically it proposes a way in which philosophy might relate to the insights of the human and natural sciences By critically juxtaposing Derrida and Lacan Derrida and Lacan Another Writing attempts to systematise Slavoj Žižek's presentation of a Lacanian alternative to Derridean deconstruction This work should be of interest to all readers in continental thought and transcendental philosophy deconstruction psychoanalysis and literary studies

The Metacolonial State Najeeb A. Jan, 2019-01-04 An urgent and extraordinary book Weaving a philosophical analysis of Heidegger Agamben and Foucault Jan draws out the implications of their thought for a radical analysis of the ontological politics of Islam and Pakistan Whether writing about the Ulama and Deoband schools blasphemy laws the military beards or the Bamiyan Buddhas Jan provokes and challenges our thinking while unearthing the ground on which Pakistan and our world are built Joel Wainwright Department of Geography Ohio State University USA In this exceptionally inventive and important book Jan shows us that the problems besetting political life in Pakistan are part of a more troubling crisis in modern forms of power Challenging accounts that cordon off political Islam from the West Jan discloses their fundamental indistinction and thus through his practice of critical ontology reorients our understanding of how power and violence are at work in the world Joshua Barkan Department of Geography University of Georgia USA The Metacolonial State presents a novel rethinking of the relationship between Islam and the Political Key to the text is an original argument regarding the biopoliticization of Islam and the imperative need for understanding sovereign power and the state of exception in resolutely ontological terms Through the formulation of a critical ontology of political violence The Metacolonial State endeavors to shed new light on the signatures of power undergirding postcolonial life while situating Pakistan as a paradigmatic site for reflection on the nature of modernity's precarious present The cross disciplinary approach of Dr Jan's work is certain to have broad appeal among geographers historians anthropologists postcolonial theorists and political scientists among others At the same time his explication of critical ontology with its radical reading of the interlacement of history power and the event promises to add a bold new dimension to social science research on Islamism and biopolitics

Heidegger's Ecological Turn Frank Schalow, 2021-09-05 This book makes explicit the ecological implications of Martin Heidegger It examines how the trajectory of Heidegger's thinking harbors an ecological turn which comes to the forefront in his attempt to anticipate the

impending crisis precipitated by modern technology Schalow's emphasis on such key motifs as stewardship dwelling and letting be Gelassenheit serves to coalesce the problem of freedom in a new and innovative way in order to expand the interpretive or hermeneutic horizon for re-examining Heidegger's philosophy By prioritizing a response to today's environmental crisis and the possible impact upon future generations the author traverses a divide within Heidegger scholarship by developing a deeper critical outlook on his philosophy without either reiterating standard interpretations or rejecting them wholesale He develops a trans-human approach to ethics which by prioritizing the welfare of the earth nature and animals counters the anthropocentric bias and destructive premise of modern technology Heidegger's Ecological Turn will be of interest to Heidegger scholars and researchers working in phenomenology hermeneutics continental philosophy and environmental philosophy

Silence in Modern Literature and Philosophy Thomas Gould, 2018-07-12 This book discusses the elusive centrality of silence in modern literature and philosophy focusing on the writing and theory of Jean-Luc Nancy and Roland Barthes the prose of Samuel Beckett and the poetry of Wallace Stevens It suggests that silence is best understood according to two categories apophasis and reticence Apophasis is associated with theology and relates to a silence of ineffability and transcendence reticence is associated with phenomenology and relates to a silence of listenership and speechlessness In a series of diverse though interrelated readings the study examines figures of broken silence and silent voice in the prose of Samuel Beckett the notion of shared silence in Jean-Luc Nancy and Roland Barthes and ways in which the poetry of Wallace Stevens mounts lyrical negotiations with forms of unsayability and speechlessness

Comptes Rendus Philosophiques, 2006

Departures Frank Schalow, 2013-04-30 In this study the author shows new entry points to the dialogue between Kant and Heidegger Schalow takes up the question Why should a philosopher like Kant for whom language seemed to be almost inconsequential become the crucial counterpoint for a thinker like Heidegger to develop a novel way to understand and express the most perennial of all philosophical concepts namely being as such This approach allows for addressing issues which are normally relegated to the periphery of the exchange between Heidegger and Kant including spatiality and embodiment nature and art religion and politics
