Doing Hermeneutic Phenomenological Research Lesley Dibley, Suzanne Dickerson, Mel Duffy, Roxanne Vandermause, 2020-10-21 This practical guide offers an approachable introduction to doing hermeneutic phenomenological research across the health and social sciences Grounded in real world research it integrates philosophy methodology and method in accessible ways helping you realize the potential of using phenomenology to guide research The book maps the complete research process and shows how to apply key philosophical tenets to your project demonstrating the close relationship between philosophy and research practice It Shows step by step how to translate philosophy into research methodology and turn methodology into robust research design Focuses on applied practice illustrating theoretical discussions with examples and case studies Promotes advanced thinking about hermeneutic phenomenology in an easy to understand way Highlights the need for researchers to engage reflexively with the whole research process

Heidegger and Entrepreneurship Håvard Åsvoll, 2018-10-26 This book proposes that entrepreneurial practice is often considered an applicable paradigm An applicable paradigm which focus too much on planned analytical calculable tool based and ready to hand modes of decision making action Hence the equally important theory of Nothing has not received the attention it deserves With reference to Heidegger's existence oriented philosophy Heidegger and Entrepreneurship A Phenomenological Approach indicates how nothing can be a condition for an entrepreneurial applicable paradigm It is suggested that the theory of Nothing bears the possibility of further development and can re create the entrepreneurial paradigm of applying and decision making This may also indicate a structure for understanding the new possibilities in entrepreneurship practice such as entrepreneurial education and research The book will be of value to students researchers and academics with an interest in entrepreneurship management and innovation

The Oxford Handbook of Phenomenologies and Organization Studies François-Xavier de Vaujany, Jeremy Aroles, Mar Perézts, 2022-12-24 Phenomenological approaches to Management and Organization Studies offer a means to problematize appearances in the field allowing us to see things in a different light and uncover what is hidden from our consideration by our theoretical or ideological assumptions This handbook aims at showing the unexpected richness and diversity of phenomenological and post phenomenological thinkers such as Husserl Heidegger Merleau Ponty Arendt or Scheler as well as others belonging to the French new phenomenology Marion Henry or the German neo phenomenology Schmitz It also details the contributions of thinkers like Bachelard Deleuze or Foucault whose inscription and departures from phenomenology are illuminated In this process phenomenologies are historically critically and openly discussed by leading

scholars while highlighting the interweaving between phenomenologies and other streams such as process studies or critical perspectives Beyond a theoretical description the chapters also show how phenomenologies and post phenomenologies can help management and organization scholars and students to understand a huge variety of contemporary phenomena such as distributed collective activity artificial intelligence digitalization of organizational processes remote work financial markets and financial instruments entrepreneurial events cinematographic organizing of social media issues of place and emplacement commons and communalization processes and questions of embodiment and disembodiment at work

Barnett Newman and Heideggerian Philosophy Claude Cernuschi,2012-03-22 As a major member of the New York School Barnett Newman is celebrated for his radical explorations of color and scale and as a precursor to the Minimalist movement for his significant contribution to the development of twentieth century American art But if his reputation and place in history have grown progressively more secure the work he produced remains highly resistant to interpretation His paintings are rigorously abstract and his writings full of references to arcane metaphysical concepts Frustrated over their inability to reconcile the works with what the artist said about them some critics have dismissed the paintings as impenetrable The art historian Yve Alain Bois called Newman the most difficult artist he could name and the philosopher Jean Fran ois Lyotard declared that there is almost nothing to consume in his work or if there is I do not know what it is In order to advance interpretation this book investigates both Newman s writings and paintings in light of ideas articulated by one of Germany s most important and influential philosophers Martin Heidegger Many of the themes explored in Newman s statements and echoed in the titles of his paintings betray numerous points of intersection with Heidegger s philosophy the question of origins the distinctiveness of human presence a person s sense of place the sensation of terror the definition of freedom the importance of mood to existence the particularities of art and language the impact of technology on modern life the meaning of time and the human being s relationship to others and to the divine When examined in the context of Heideggerian thought these issues acquire greater concreteness and in turn their relation to the artist s paintings becomes clearer It is the contention of this book that at the intersection of art history and philosophy an interdisciplinary framework emerges wherein the artist s broader motivations and the specific meanings of his paintings prove more amenable to elucidation

An Interpretation and Assessment of First-person Authority in the Writings of Philosopher Donald Davidson Eivind Balsvik,2003 In An Interpretation and Assessment of First Person Authority in the Writings of Philosopher Donald Davidson first person authority is the thesis that subjects have a non evidence based form of epistemic warrant for self ascriptions of psychological concepts that does not attach to a third person evidence based ascriptions of the same concepts

Looking Through Images Emmanuel Alloa,2021-10-05

Images have always stirred ambivalent reactions Yet whether eliciting fascinated gazes or iconoclastic repulsion from their beholders they have hardly ever been seen as true sources of knowledge They were long viewed as mere appearances placeholders for the things themselves or deceptive illusions Today the traditional critique of the spectacle has given way to an unconditional embrace of the visual However we still lack a persuasive theoretical account of how images work Emmanuel Alloa retraces the history of Western attitudes toward the visual to propose a major rethinking of images as irreplaceable agents of our everyday engagement with the world He examines how ideas of images and their powers have been constructed in Western humanities art theory and philosophy developing a novel genealogy of both visual studies and the concept of the medium Alloa reconstructs the earliest Western media theory Aristotle s concept of the diaphanous milieu of vision and the significance of its subsequent erasure in the history of science Ultimately he argues for a historically informed phenomenology of images and visual media that explains why images are not simply referential depictions windows onto the world Instead images constantly reactivate the power of appearing As media of visualization they allow things to appear that could not be visible except in and through these very material devices

Human Being and Morality in Ethics of Social Consequences Vasil Gluchman,2003 Explores issues concerning the moral agent and one s moral rights Deals with issues related to fundamental moral values and principles of ethics of social consequences making essential differences between ethical theory as a kind of non utilitarian consequentialism and utilitarian forms of consequentialism Explores moral values of humanity legality justice responsibility tolerance moral duty

The Visible and the Revealed Jean-Luc Marion,2009-08-25 In *The Visible and the Revealed* Jean Luc Marion brings together his most significant papers dealing with the relationship between philosophy and theology Covering the ground from some of his earliest writings on this topic to very recent reflections they are particularly useful for understanding the progression of Marion s thought on such topics as the saturated phenomenon and the possibility of something like Christian Philosophy The book contains his seminal pieces on the saturated phenomenon and on the gift although the essays also explore more recent developments of his thought on these topics Several chapters explicitly explore the boundary line between philosophy and theology or their mutual enrichment and influence In one of the final pieces *The Banality of Saturation* Marion considers some of the most recent objections brought

against his notion of the saturated phenomenon and responds to them in detail suggesting that saturated phenomena are neither as rare nor as inflexible as often assumed The work contains two chapters not previously available in English and brings together several other pieces previously translated but now difficult to find For readers interested in the relation between the two disciplines this is indispensable reading *The Philosophy of Panayot Butchvarov* Larry Lee Blackman, 2005 Providing a glimpse of a philosophy style that is as rare as it is valuable this book is an anthology with twelve essays concerning the thought of Philosophy Professor Panayot Butchvarov with his comments on each His work reveals great depth running the gamut of metaphysics epistemology ethics philosophy of language and philosophy of mind

Understanding Research for Nursing Students Peter Ellis, 2010-05-10 From the start of their training it is crucial for nursing students to be able to understand and evaluate current research to support their learning and reading for assignments However many books focus on how to do research rather than how to understand and evaluate research This book helps students recognise what good research is by providing an entry level guide to the main research methodologies used in nursing It puts research into context for student nurses explaining how they need to use the skills of critiquing and evaluating research throughout their course and how this is linked to evidence based practice **Book Review Index**, 2003 Every 3rd issue is a quarterly cumulation **Scatter 1** Geoffrey Bennington, 2016-05-02 What if political rhetoric is unavoidable an irreducible part of politics itself In contrast to the familiar denunciations of political horse trading grandstanding and corporate manipulation from those lamenting the crisis in liberal democracy this book argues that the politics of politics usually associated with rhetoric and sophistry is like it or not part of politics from the start Denunciations of the sorry state of current politics draw on a dogmatism and moralism that share an essentially metaphysical and Platonic ground Failure to deconstruct that ground generates a philosophically and politically debilitating self-righteousness that this book attempts to understand and undermine After a detailed analysis of Foucault's influential late concept of parrhesia which is shown to be both philosophically and politically insufficient close readings of Heidegger Kierkegaard and Derrida trace complex relations between sophistry rhetoric and philosophy truth and untruth decision madness and stupidity in an exploration of the possibility of developing an affirmative thinking of politics that is not mortgaged to the metaphysics of presence It is suggested that Heidegger's complex accounts of truth and decision must indeed be read in close conjunction with his notorious Nazi commitments but nevertheless contain essential insights that many strident responses to those commitments ignore or repress Those insights are here developed via an ambitious account of Derrida's often misunderstood interruption of teleology into a deconstructive retrieval of the concept of dignity This lucid and often witty account of a crucial set of developments in twentieth century thought prepares the way for a more general re-reading of the possibilities of political philosophy that will be undertaken in Volume 2 of this work under the sign of an essential scatter that defines the political as such **Phenomenology and the Holy** Espen Dahl, 2013-02-12 SCM Veritas engages in critical and original

questions of pressing concern to both philosophers and theologians The major concern of all books in this series is to display a rigorous theological critique of categories not often thought to be theological in character such as phenomenology or metaphysics which are mainly considered as philosophical categories All the books in this series aim to illustrate that without theology something essential is lost in our accounts of such categories not only in the abstract but in the way in which we inhabit the world Phenomenology and the Holy is a study of the holy which attempts to find this both in the ordinary and in the sublime thus challenging the reduction of the holy to a discrete and separated field of experience Phenomenology is a key area of twentieth century philosophy in which there is a wide interest not only among philosophers but also among theologians and religious studies scholars

The British National Bibliography Arthur James Wells,2003 **Exploring the**

Work of Leonardo Da Vinci Within the Context of Contemporary Philosophical Thought and Art Adrian Parr,2003

This study explores the work of Leonardo da Vinci with the aim of developing a concept of creative production It argues that the conditions of a truly creative practice require an imaginative re working of the real so that new and unforeseen realities can emerge Studying Leonardo s notebooks and sketches where a cross pollination of theory and practice abounds it shows that creativity is critical power that operates in between the real and ideal confounding the clear cut distinction between them This understanding of power in terms of an enabling and productive capacity is taken from Deleuze and Nietzsche s work in this area Leonardo although he was interested in mimesis and the principles of one point perspective actively brought the real and ideal into relations with one another in innovative ways Although it focuses on the work of one Renaissance artist the conclusions are not historically restricted
