**Payback** David P. Barash, Judith Eve Lipton, 2011-02-01 From the child taunted by her playmates to the office worker who feels stifled in his daily routine people frequently take out their pain and anger on others even those who had nothing to do with the original stress The bullied child may kick her puppy the stifled worker yells at his children Payback can be directed anywhere sometimes at inanimate things animals or other people In Payback the husband and wife team of evolutionary biologist David Barash and psychiatrist Judith Lipton offer an illuminating look at this phenomenon showing how it has evolved why it occurs and what we can do about it Retaliation and revenge are well known to most people We all know what it is like to want to get even get justice or take revenge What is new in this book is an extended discussion of redirected aggression which occurs not only in people but other species as well The authors reveal that it s not just a matter of yelling at your spouse because your boss yells at you Indeed the phenomenon of redirected aggression so called to differentiate it from retaliation and revenge the other main forms of payback haunts our criminal courts our streets our battlefields our homes and our hearts It lurks behind some of the nastiest and seemingly inexplicable things that otherwise decent people do from road rage to yelling at a crying baby And it exists across boundaries of every kind culture time geography and even species Indeed it s not just a human phenomenon Passing pain to others can be seen in birds and horses fish and primates in virtually all vertebrates It turns out that there is robust neurobiological hardware and software promoting redirected aggression as well as evolutionary underpinnings Payback may be natural the authors conclude but we are capable of rising above it without sacrificing self esteem and social status They show how the various human responses to pain and suffering can be managed mindfully carefully and humanely

Cukor's *The Philadelphia Story* Stewart was drafted into the Armed Forces and became a hero in real life. When he returned to Hollywood, he discovered that not only the town had changed but so had he. Stewart's combat experiences left him emotionally scarred, and his deepening darkness perfectly positioned him for the 50s in which he made his greatest films for Anthony Mann: *Winchester 73* and *Bend of the River*, and most spectacularly Alfred Hitchcock in his triple meditation on marriage: *Rear Window*, *The Man Who Knew Too Much*, and *Vertigo*, which many film critics regard as the best American movie ever made. While Stewart's career thrived, so did his personal life. A marriage in his forties, the adoption of his wife's two sons from a previous marriage, and the birth of his twin daughters laid the foundation for a happy life until an unexpected tragedy had a shocking effect on his final years.

Intimate and richly detailed, *Jimmy Stewart* is a fascinating portrait of a multi-faceted and much admired actor as well as an extraordinary slice of Hollywood history. Probably the best actor who's ever hit the screen, Frank Capra taught me that it was possible to remain who you are and not be tainted by your environment. He was not an actor; he was the real thing. Kim Novak: He was uniquely talented and a good friend. Frank Sinatra: He was a shy, modest man who belonged to cinema nobility. Jack Valenti: There is nobody like him today. June Allyson: He was one of the nicest, most unassuming persons I have known in my life. His career speaks for itself. Johnny Carson: *The Butcher Workman*, 1966. *Crash Course in Weeding Library Collections* Francisca Goldsmith, 2015-11-02. Weeding is a perennial challenge for librarians. This book will help you rise to the task by offering you basic instructions, including information on new formats and digital collections. Weeding is often difficult; who can easily decide to discard books and other materials that someone may someday want to borrow? But weeding is essential to keeping your collection healthy and relevant. Perfect for all types of libraries and for both paraprofessionals and librarians unfamiliar with modern weeding methods, this practical guide offers clear guidance that can help you cope with the sometimes paralytic fear and distaste that can accompany a must-do task. Each of the book's chapters treats a specific concern: for example, weeding electronic collections. Practical matters related to collection maintenance through material and online resource weeding are addressed, as are policy and procedure, documentation, and communication planning and best practices. You'll read about weeding ethics, using vendor-provided weeding tools, and floating collections. The book also shares advice on training volunteers as weeding assistants and on communicating with library stakeholders about collection maintenance. By showing you how to make weeding a normal part of your library's routine, this book will help you provide your community with a healthier, better circulating, and more valuable collection.
