Voice and Versification in Translating Poems James W. Underhill, 2016-12-09 Great poets like Shelley and Goethe have made the claim that translating poems is impossible And yet poems are translated not only that but the metrical systems of English French Italian German Russian and Czech have been shaped by the translation of poems Our poetic traditions are inspired by translations of Homer Dante Goethe and Baudelaire How can we explain this paradox James W Underhill responds by offering an informed account of meter rhythm rhyme and versification But more than that the author stresses that what is important in the poem and what must be preserved in the translated poem is the voice that emerges in the versification Underhill's book draws on the author's translation experience from French Czech and German His comparative analysis of the versifications of French and English have enabled him to revise the key terms involved in translating the poetic voice and transposing the poem's versification The theories of versification from the Prague School of Linguistics the French and Swiss schools of versification and recent scholarship in metrics and rhythm in the UK and in the USA have been integrated into this synthetic but rigorously coherent approach to translating poems The extensive glossary at the end of the book will prove useful for both students and teachers alike And the detailed case studies on translating poems by Baudelaire and Emily Dickinson allow the author to categorize and appraise the various poetic and aesthetic strategies and theories that are brought to bear in translating Baudelaire into English and Dickinson into French Published in English

Poetry's Data Meredith Martin, 2025-04-22 In this book Meredith Martin presents a historical account of prosodic criticism and through the example of her own research path argues for new scholarly practices in literary studies and the humanities more broadly Challenging the common scholarly practice of emphasizing one critical narrative one pathway through history or one author's reading the book traces three arcs the effects of the major shift in the late twentieth century from print based to digital resources in scholarship with the emergence of the World Wide Web Martin's experience as a scholar who coordinated a digital project about the history of the study of poetry which led to the creation of the Princeton Prosody Archive and the founding of Princeton's Center for Digital Humanities CDH and the mix of computational and aesthetic elements in the study of prosody including the study of versification and meter in the broader context of English literary study as a discipline Across these three arcs Martin argues that scholars must take seriously the idea of digital media as mediation through which textual forms are transformed into data and delivered to us via data structures and that our reading of historical texts in digital forms must reckon with these mediations She also demonstrates the connection between the intellectual labor of studying prosody or any historical object and the intellectual labor of fostering a collaborative research process This is a book she writes about the shifting grounds of knowledge production in the digital age and how we might situate ourselves amid these shifts by returning to of all things poetry
