Hearings, Reports and Prints of the Senate Committee on Labor and Public Welfare United States. Congress. Senate. Committee on Labor and Public Welfare,1971 The Intersection of Environmental Justice, Climate Change, Community, and the Ecology of Life Ande A. Nesmith,Cathryne L. Schmitz,Yolanda Machado-Escudero,Shanondora Billiot,Rachel A. Forbes,Meredith C. F. Powers,Nikita Buckhoy,Lucy A. Lawrence,2020-10-23 This book examines and encourages the increasing involvement of those in the social sciences including social work as well as everyday citizens with environmental injustices that affect the natural ecology community health and physical and mental health of marginalized communities The authors draw on their diverse experiences in research practice and education to suggest interdisciplinary strategies for addressing environmental justice climate change and ecological destruction on both a local and global scale This insightful work presents models for action practice and education including field learning with examples of how programs and schools have integrated and infused environmental justice content across their curricula Environmental and ecological impacts on local communities as well as the whole ecology of life are examined Models for engaging civic dialogue addressing structural oppression and employing other interdisciplinary responses to environmental injustices are provided Topics explored among the chapters include Water Air and Land The Foundation for Life Food and Society Human Health and Well Being in Times of Global Environmental Crisis Power and Politics Protection Rebuilding and Justice Pathways to Change Community and Environmental Transformation Decolonizing Nature The Potential of Nature to Heal The Intersection of Environmental Justice Climate Change Community and the Ecology of Life equips readers to identify the impact of the global environmental crisis in their own communities Emphasizing the need for immediate action on ecological climate and environmental justice issues this forward thinking book assists social science professionals educators researchers and other concerned individuals with the knowledge needed for creating meaningful interdisciplinary responses in their communities as they take action within a rapidly changing context *Looking to the Future* Derek Hodson,2011-10-25 In advocating an action oriented and issues based curriculum this book takes the position that a major but shamefully neglected goal of science and technology education is to equip students with the knowledge skills attitudes and values to confront the complex and often ill defined socioscientific issues they encounter in daily life as citizens in an increasingly technology dominated world carefully critically confidently and responsibly In outlining proposals for addressing socioscientific issues through a curriculum organized in

terms of four increasingly sophisticated levels of consideration the author adopts a highly critical and politicized stance towards the norms and values that underpin both scientific and technological development and contemporary scientific engineering and medical practice criticizes mainstream STS and STSE education for adopting a superficial politically naïve and hence educationally ineffective approach to consideration of socioscientific issues takes the view that environmental problems are social problems occasioned by the values that underpin the ways in which we choose to live and urges teachers to encourage students to reach their own views through debate and argument about where they stand on major socioscientific issues including the moral ethical issues they often raise More controversially the author argues that if students are to become responsible and politically active citizens the curriculum needs to provide opportunities for them to experience and learn from sociopolitical action The relative merits of direct and indirect action are addressed notions of learning about action learning through action and learning from action are developed and a case is made for compiling a user friendly database reflecting on both successful and less successful action oriented curriculum initiatives Finally the book considers some of the important teacher education issues raised by this radically new approach to teaching and learning science and technology The book is intended primarily for teachers and student teachers of science technology and environmental education graduate students and researchers in education teacher educators curriculum developers and those responsible for educational policy The author is Emeritus Professor of Science Education at the Ontario Institute for Studies in Education University of Toronto Adjunct Professor of Science Education at the University of Auckland and Visiting Professor of Science Education at the University of Hong Kong His research interests include considerations in the history philosophy and sociology of science and their implications for science and technology education STSE education and the politicization of both students and teachers science curriculum history multicultural and antiracist education and teacher education via action research

Un/familiar Theology Susannah Cornwall, 2017-06-15 Through engagement with theologies of adoption pro natalism marriage and queer theology Susannah Cornwall figures developments in models of marriage and family not as distortions of or divergences from the divinely ordained blueprint but as developments already of a piece with these institutions being Much Christian theological discussion of family sex and marriage seems to claim that they are or should be unchanging and immaculate that to celebrate their shifting and developing natures is to reject them as good gifts of God However models of marriage family parenting and reproduction have changed and are still in some cases radically changing These changes are not all a raging tide to be turned back but in continuity with goods deeply embedded in the tradition Alternative forms of marriage and family stand as signs of the hope of the possibility of change Changed institutions such as same sex marriage are new beginnings with the potential to be fruitful and generative in their own right In them humans create new imaginaries which more fully acknowledge the interactive nature of our relationships with the world and the divine *Urban Resilience, Livability, and Climate Adaptation* Ilaria Pigliautile, Cristina Piselli, Hirushie Pramuditha Karunathilake, Claudia Fabiani, 2024-06-30 This book explores urban environments and their impact on resilience livability climate adaptation health and societal well being It provides interdisciplinary insights for fostering resilient livable and sustainable cities prioritizing well being and quality of life for all residents The book covers various topics and discusses innovative approaches for incorporating nature into urban planning It also examines the relationships between diet diversity food environments and transportation systems Spatial analysis of noise contour maps based on traffic speed is conducted along with an assessment of the impact of office environments on productivity The book explores the influence of streetscapes on anxiety envisions future cities from a youth perspective and identifies critical factors affecting the design and use of elevated urban spaces Daylighting performance in school expansions is evaluated and the concept of a livable city is examined Community adaptive capacity for climate resilient development is assessed through a case study analysis The livability of street vendors in different urban contexts is compared and alternative perspectives on restorative environments are presented The book investigates the impact of urban refugees on cities and reevaluates scientific theories for human well being oriented built environments It evaluates tourist satisfaction with urban railway systems and explores sport as a tool for healthy and sustainable cities **Forthcoming Books** Rose Army, 1990 Hearings United States. Congress. Senate. Committee on Labor and Public Welfare, 1970 **Environmental Absurdities Debunked: Unmasking the Misinformation Campaign against Science** Pasquale De Marco, 2025-07-27 In a world increasingly divided by environmental alarmism and climate change denial *Environmental Absurdities Debunked: Unmasking the Misinformation Campaign against Science* offers a refreshing and much needed voice of reason This comprehensive and thought provoking book takes a critical look at the

environmental movement its claims and the science behind them With meticulous research and clear accessible language the author exposes the myths and misconceptions that have surrounded the environmental debate for far too long From the exaggerated claims of climate change activists to the unfounded attacks on fossil fuels and the demonization of economic growth the book provides a much needed antidote to the misinformation that has dominated the public discourse The book also delves into the history of environmentalism tracing its evolution from its early roots in the conservation movement to its current focus on climate change It examines how the movement has been shaped by political and economic forces and how it has become increasingly polarized in recent years But this book is not just a critique of the environmental movement It is also a call for a new environmentalism one that is based on science reason and common sense The author argues that we need to move beyond the alarmism and denial and focus on developing policies that are both environmentally responsible and economically sustainable *Environmental Absurdities Debunked Unmasking the Misinformation Campaign against Science* is a must read for anyone who wants to understand the complex issues involved in the environmental debate It is a call for a more informed and productive dialogue about the future of our planet In this book you will learn The truth about climate change and the real science behind it The economic and political implications of environmental policies The role of the media in shaping public opinion on environmental issues The history of environmentalism and how it has evolved over time The need for a new environmentalism that is based on science reason and common sense If you are tired of the misinformation and alarmism that surrounds the environmental debate then this book is for you *Environmental Absurdities Debunked Unmasking the Misinformation Campaign against Science* will help you to understand the issues and make informed decisions about the future of our planet If you like this book write a review

The Politics of Millennials Stella M. Rouse,Ashley D Ross,2018-08-09 Today the Millennial generation the cohort born from the early 1980s to the late 1990s is the largest generation in the United States It exceeds one quarter of the population and is the most diverse generation in U S history Millennials grew up experiencing September 11 the global proliferation of the Internet and

of smart phones and the worst economic recession since the Great Depression of the 1930s Their young adulthood has been marked by rates of unemployment and underemployment surpassing those of their parents and grandparents making them the first generation in the modern era to have higher rates of poverty than their predecessors at the same age The Politics of Millennials explores the factors that shape the Millennial generation s unique political identity how this identity conditions political choices and how this cohort s diversity informs political attitudes and beliefs Few scholars have empirically identified and studied the political attitudes and policy preferences of Millennials despite the size and influence of this generation This book explores politics from a generational perspective first and then combines this with other group identities that include race and ethnicity to bring a new perspective to how we examine identity politics
