

Facts and ideas from anywhere

William C. Roberts, MD

SCIENTIFIC HUMILITY

Belief in the protective powers of hormonal therapy was just overturned (1–6). The massive study of hormone replacement therapy in postmenopausal women had to be halted 3 years early because the estrogen-progestin combination appeared to cause an alarming increase in the frequency of invasive breast cancer, thrombosis, stroke, and heart attack. The pure-estrogen arm will continue. When the

announcement was made, Wyeth Pharmaceuticals lost 24% of its value in 1 day. Thus, hormone replacement therapy in postmenopausal women joins tonsillectomy, antibiotics for ear infections, leeching, bleeding, lobotomies, and shock therapy for psychiatric disorders as common therapies eventually shown to be unnecessary or harmful. The belief that peptic ulcer disease was secondary to excessive acid in the stomach and/or stress has also vanished. Fetal tissue transplants for degenerative diseases and angiogenesis inhibitors as anticancer drugs have yet to pan out. Whether regenerative medicine via stem cells and cloning will turn out favorably is as yet unclear. There is no need for arrogance in medicine.

DRINKING WATER AND POLLUTION

The recently published Global Environment Outlook 3, a 450-page United Nations document (www.unep.org/geo/), indicates that about half of the world's rivers now are seriously depleted and polluted and that one third of the world's population is dependent on ground water, with the levels of ground water falling (7). By 2032, more than half the global population will face water shortages, 10% higher than the proportion predicted in 1995. Worst affected will be the people living in the Middle East—where oil resources, of course, are largest in the world but where 95% of the population is forecasted to face water shortages. By 2032, over 70% of the earth's land surface could be affected by the impact of roads, mining, cities, and other infrastructure developments made to satisfy the global population set to increase by 2 billion over the next 30 years. Although the number of people being served by better water facilities has increased from 4.1 billion in 1990 to 4.9 billion in 2000, 1.1 billion people in the developing world still have no access to safe drinking water, and 2.4 billion people currently lack adequate sanitation facilities. As a consequence, 4 billion cases of diarrhea and 2.2 million deaths occur each year. Intestinal worms affect 10% of the people in the developing world, 6 million people are

blind from trachoma, and some 200 million people are affected by Schistosoma (Bilharzia).

TRASH

It's almost trite to say that public health activities such as garbage collecting have done more good for humankind than physicians have ever been able to do. Our government leaders encourage economic growth, but as the economy grows so does the quantity of trash. New York City collects 11,000 tons of trash daily from its residences alone, and the city has no more space to dispose of it (8). It is now carrying trash to Pennsylvania and Virginia, and there is even talk of sending it to a Caribbean island. And what about nuclear waste? No state wants it stored in its acreage, and other states don't even want nuclear waste to travel through their borders. The waste management industry has talked of a cleaner and safer incinerator that will produce energy without creating tons of toxic residue, but that technology has not yet arrived and whether it actually will is unclear. Expanding the recycling programs, decreasing the amount of packaging, and encouraging composting have all been suggested as useful endeavors, but these are only small solutions to a much bigger problem. More buying means more trash, which means more pollution.

MORE ON STATINS

Statins have been available in the USA since 1987, and yet 15 years later most patients who have had atherosclerotic events and/or diabetes mellitus or who are at high risk for atherosclerotic events are not on statin therapy despite its proven benefit in decreasing first and repeat atherosclerotic events. The following are my recommendations for increasing the numbers of patients on statin therapy.

1. *Shift the emphasis from secondary prevention and diabetes mellitus to primary prevention.* Do not wait to start statin therapy until after an atherosclerotic event has occurred or diabetes mellitus has appeared. By the time either has appeared, one or more major epicardial coronary arteries are narrowed >75% in cross-sectional area by atherosclerotic plaque. Guidelines for lipid-lowering therapy, formulated by the adult-treatment panel of the National Cholesterol Education Committee in 1988 and revised in 1993 and in 2001, are based on decreasing the risk of developing first and repeat atherosclerotic events. Because it is rarely genetic in origin (the familial variety is present in only about 1 in 500 people), atherosclerosis in my view needs to be approached not primarily from the standpoint of decreasing risk but from the standpoint of actually preventing and/or arresting plaque formation. Pediatricians do not talk in terms of decreas-

Facts And Ideas From Anywhere

Jean Baptiste Henri D. Lacordaire

Facts And Ideas From Anywhere:

Proceedings ,2009 Articulating Intersex: A Crisis at the Intersection of Scientific Facts and Social Ideals

Natalie Delimata,2019-09-26 This book explores the ethical dilemma clinicians may face when disclosing a diagnosis of atypical sex The moment of disclosure reveals an epistemic incompatibility between scientific fact and social meaning in relation to sex Attempting to assess the bio psychosocial implications of this dilemma highlights a complex historic antagonism between fact and meaning making satisfactory resolution of this dilemma difficult Drawing on David Hume WVO Quine and Michel Foucault the author presents an integrative model which views scientific fact and social meaning as codetermining threads in one fabric of knowledge From this epistemic perspective the ethical dilemma is understood as a tear in the fabric signifying a rupturing of ontological integrity To mend this tear and resolve the ethical dilemma three metaphysical perspectives are considered essentialism naturalism and emergentism The book s unique features include an exploration of the impact of diagnostic disclosure on people with atypical sex intersex a synthesis of the epistemic perspectives of social and natural science facilitating interdisciplinary collaboration a critical evaluation of three metaphysical perspectives on atypical sex intersex the application of Hume s epistemological and moral distinctions to contemporary biomedicine and bioethics The book s target audience includes academics students and professionals whose work intersects the natural and social sciences and individuals interested in the metaphysics epistemology and meta ethics of sex

Michigan Christian Advocate ,1921 Graham's Magazine ,1855 Baltimore and Ohio Employees Magazine ,1932 The Journal of Philosophy ,1907 Covers topics in philosophy psychology and scientific methods Vols 31 include A Bibliography of philosophy 1933 **The Forum ,1924 Chinese tourists - what do they want? Facts,**

ideas and successful examples Ingemar Fredriksson,2020-10-07 The world has never seen such a huge business opportunity for which they have so little understanding of how to address it Many entrepreneurs have more or less seriously dreamt of being able to sell just one product to every single Chinese That dream is now quickly turning into a possibility for many hotels restaurants shops and attractions As of 2012 Chinese tourists are the largest group of travellers in the world Unfortunately understanding of the needs that these Chinese tourists have is exceptionally poor What do they want to eat do or buy Where do they want to stay and what places do they want to visit All these differ radically from the needs of other tourists In this book we will take you through what is different and why it is so In the book we will also offer ideas on how to easily shift your offering to match what Chinese tourists want We will also provide plenty of examples on what others have done to attract their business since naturally many have already invested heavily to do this So yes competition for Chinese tourists has undoubtedly begun but an equally vital investment for winning this fight is understanding What do you know about their needs INGEMAR FREDRIKSSON has 30 years experience in top management business development profitability development and marketing He has worked with plenty of SMEs in different industries including tourism and also with Fnatic

IKEA Invest Sweden Miss Sweden and the Swedish government He has also been vice chairman of The Swedish Federation of Business Owners Since a few years back he lives and works in the UAE All four books by Ingemar Fredriksson in their original Swedish edition have featured on top lists together with names like Steve Jobs Daniel Kahneman Thomas Piketty Sun Tzu and even the Fifty shades series Search on YouTube for Ingemar Fredriksson s books Bestsellers for 15 years for a full video of random list positions over the years LYU WEN has a degree in Economics from Fudan University in Shanghai with an extensive finance background Together they have the academic background with down to earth know how and experience of the meeting between East and West and how this can be used in business development Said about the Swedish edition of this book This book is basically a huge checklist and a fantastic basis for those who would like to attract Chinese tourists

Monika Fleming Glogoza West Sweden Tourist Board Contributions to Education ,1907 **The Learning Process** Jesse Harliaman Coursault,1907 Pluralism, Democracy and Political Knowledge Hans Blokland,2016-04-22 The political discontent or malaise that typifies most modern democracies is mainly caused by the widely shared feeling that the political freedom of citizens to influence the development of their society and related to this their personal life has become rather limited We can only address this discontent when we rehabilitate politics the deliberate joint effort to give direction to society and to make the best of ourselves In Pluralism Democracy and Political Knowledge Hans Blokland examines this challenge via a critical appraisal of the pluralist conception of politics and democracy This conception was formulated by above all Robert A Dahl one of the most important political scholars and democratic theorists of the last half century Taking his work as the point of reference this book not only provides an illuminating history of political science told via Dahl and his critics it also offers a revealing analysis as to what progress we have made in our thinking on pluralism and democracy and what progress we could make given the epistemological constraints of the social sciences Above and beyond this the development and the problems of pluralism and democracy are explored in the context of the process of modernization The author specifically discusses the extent to which individualization differentiation and rationalization contribute to the current political malaise in those countries which adhere to a pluralist political system **Conservation of Wildlife Populations**

L. Scott Mills,2012-12-17 Population ecology has matured to a sophisticated science with astonishing potential for contributing solutions to wildlife conservation and management challenges And yet much of the applied power of wildlife population ecology remains untapped because its broad sweep across disparate subfields has been isolated in specialized texts In this book L Scott Mills covers the full spectrum of applied wildlife population ecology including genomic tools for non invasive genetic sampling predation population projections climate change and invasive species harvest modeling viability analysis focal species concepts and analyses of connectivity in fragmented landscapes With a readable style analytical rigor and hundreds of examples drawn from around the world Conservation of Wildlife Populations 2nd ed provides the conceptual basis for applying population ecology to wildlife conservation decision making Although targeting primarily undergraduates

and beginning graduate students with some basic training in basic ecology and statistics in majors that could include wildlife biology conservation biology ecology environmental studies and biology the book will also be useful for practitioners in the field who want to find in one place and with plenty of applied examples the latest advances in the genetic and demographic aspects of population ecology Additional resources for this book can be found at www.wiley.com/go/mills_wildlife_populations

Finding Philosophy in Social Science Mario Bunge, Professor Mario Bunge, 1996-01-01 Graham's American Monthly Magazine of Literature, Art, and Fashion, 1855 Human Associative Memory John R. Anderson, G. H. Bower, 2014-02-25 First published in 1973 This book proposes and tests a theory about human memory about how a person encodes retains and retrieves information from memory The book is especially concerned with memory for sentential materials We propose a theoretical framework which is adequate for describing comprehension of linguistic materials for exhibiting the internal representation of propositional materials for characterizing the interpretative processes which encode this information into memory and make use of it for remembering for answering questions recognizing instances of known categories drawing inferences and making deductions *The New Yearbook for Phenomenology and Phenomenological Philosophy* Burt C. Hopkins, John J.
