Women Physicians and Professional Ethos in Nineteenth-Century America Carolyn Skinner,2014-01-27 Women physicians in nineteenth century America faced a unique challenge in gaining acceptance to the medical field as it began its transformation into a professional institution The profession had begun to increasingly insist on masculine traits as signs of competency Not only were these traits inaccessible to women according to nineteenth century gender ideology but showing competence as a medical professional was not enough Whether women could or should be physicians hinged mostly on

maintaining their femininity while displaying the newly established standard traits of successful practitioners of medicine. *Women Physicians and Professional Ethos* provides a unique example of how women influenced both popular and medical discourse. This volume is especially notable because it considers the work of African American and American Indian women professionals. Drawing on a range of books, articles, and speeches, Carolyn Skinner analyzes the rhetorical practices of nineteenth-century American women physicians. She redefines ethos in a way that reflects the persuasive efforts of women who claimed the authority and expertise of the physician with great difficulty. Descriptions of ethos have traditionally been based on masculine communication and behavior, leaving women's rhetorical situations largely unaccounted for. Skinner's feminist model considers the constraints imposed by material resources and social position, the reciprocity between speaker and audience, the effect of one rhetor's choices on the options available to others, the connections between ethos and genre, the potential for ethos to be developed and used collectively by similarly situated people, and the role ethos plays in promoting social change. Extending recent theorizations of ethos as a spatial, ecological, and potentially communal concept, Skinner identifies nineteenth-century women physicians' rhetorical strategies and outlines a feminist model of ethos that gives readers a more nuanced understanding of how this mode of persuasion operates for all speakers and writers.

The Research Process Myrtle S. Bolner, Gayle A. Poirier, 2004 **Forthcoming Books** Rose Arny, 2003 *The Craft of Research, Third Edition* Wayne C. Booth, Gregory G. Colomb, Joseph M. Williams, 2009-05-15. With more than 400,000 copies now in print, *The Craft of Research* is the unrivaled resource for researchers at every level, from first-year undergraduates to research reporters at corporations and government offices. Seasoned researchers and educators Gregory G. Colomb and Joseph M. Williams present an updated third edition of their classic handbook, whose first and second editions were written in collaboration with the late Wayne C. Booth. *The Craft of Research* explains how to build an argument that motivates readers to accept a claim, how to anticipate the reservations of readers, and to respond to them appropriately, and how to create introductions and conclusions that answer that most demanding question: "So what?" The third edition includes an expanded discussion of the essential early stages of a research task: planning and drafting a paper. The authors have revised and fully updated their section on electronic research, emphasizing the need to distinguish between trustworthy sources such as those found in libraries and less reliable sources found with a quick Web search. A chapter on warrants has also been thoroughly reviewed to make this difficult subject easier for researchers. Throughout, the authors have preserved the amiable tone, the reliable voice, and the sense of directness that have made this book indispensable for anyone undertaking a research project.
