Chinese Teacher Compensation System of Compulsory Education Jiang Jinqiu, 2021-11-29. This book examines the compensation system for teachers in compulsory education in China and how it can be brought to bear in attracting, retaining, and motivating teachers while improving the quality of basic education. The study first draws on theories of modern pay systems and revisits major teacher pay reforms at the national level and their implementation at the school level, thereby evaluating the characteristics and problems of pay systems. A comparative analysis of different pay scales and its competitiveness in contrast to other professions then further demonstrates the limitations of existing salary structures in compulsory education schools along with a failure to offer enough incentives for high-quality teachers and teaching. Approaching the topic from both theoretical and empirical perspectives, the author proposes a restructured pay system and advances constructive suggestions on policymaking as well as research directions in teacher pay reform.
