## **Faith In Science Scientists Search For Truth:**

**Faith in Science** Mark Richardson, Gordy Slack, 2005-07-05 Through intimate conversations with some of the world's most distinguished scientists including two Nobel Laureates *Faith in Science* invites us to explore the connections between scientific and religious approaches to truth. Subjects range from the existence and nature of God to the role of spirituality in modern science. The result is a clear account of how two major cultural forces can work together to offer unique insights into questions of existence.

*Faith in Science* Mark Richardson, Gordy Slack, 2005-07-05 **PUBLICITY TITLE** The high profile Science and the Spiritual Quest project has received strong media attention featuring in Time magazine and on the front cover of Newsweek. Popular science and the science religion debate are hot topics at the moment. The interviews in this volume include the most eminent scientists in their respective fields. Two are Nobel prize winners.

**A Manual for Creating Atheists** Peter Boghossian, 2014-07-01 For thousands of years the faithful have honed proselytizing strategies and talked people into believing the truth of one holy book or another. Indeed the faithful often view converting others as an obligation of their faith and are trained from an early age to spread their unique brand of religion. The result is a world broken in large part by unquestioned faith. As an urgently needed counter to this tried and true tradition of religious evangelism *A Manual for Creating Atheists* offers the first ever guide not for talking people into faith but for talking them out of it. Peter Boghossian draws on the tools he has developed and used for more than 20 years as a philosopher and educator to teach how to engage the faithful in conversations that will help them value reason and rationality, cast doubt on their religious beliefs, mistrust their faith, abandon superstition and irrationality and ultimately embrace reason.

*God, Humanity and the Cosmos - 2nd Edition* Christopher Southgate, 2005-12-01 Contributors include Christopher Southgate, John Hedley Brooke, Celia Deane Drummond, Paul D Murray, Michael Robert Negus, Lawrence Osborn, Michael Poole, Jacqui Stewart, Fraser Watts, David Wilkinson. This fully revised and updated edition of *God, Humanity and the Cosmos* includes new chapters by John Hedley Brooke, Paul D Murray and David Wilkinson. In addition to a systematic exploration of contemporary perspectives in physics, evolutionary biology and psychology as they relate to theological descriptions of the universe, humanity and consciousness, the book now provides a thorough survey of the theological, philosophical and historical issues underpinning the science religion debate. Contributors also examine such issues as theological responses to the ecological crisis and to biotechnology, how science is treated and valued in education and the relation of science to Islamic thought. Dr Christopher Southgate is Lecturer in Theology at the University of Exeter.

**God and the Scientist** Fraser Watts, 2016-04-22 This book presents a celebration, survey and critique of the theological work of arguably the most important and most widely read contributor to the modern dialogue between science and theology, John Polkinghorne.
