Measurement Christof Ebert,2005 Practical approach to software measurement Contains hands on industry experiences *Books in Print Supplement* ,2002 **New Methods for Measuring and Analyzing Segregation** Mark

Fossett,2017-09-14 This book is open access under a CC BY NC 2 5 license This book introduces new methods for measuring and analyzing residential segregation It begins by placing all popular segregation indices in the difference of group means framework wherein index scores can be obtained as simple differences of group means on individual level residential attainments scored from area racial composition Drawing on the insight that in this framework index scores are additively determined by individual residential attainments the book shows that the level of segregation in a given city can be equated to the effect of group membership e g race on individual residential attainments This unifies separate research traditions in the field by joining the analysis of segregation at the aggregate level with the analysis of residential attainments for individuals Next it shows how segregation analysis can be extended by using multivariate attainment models to assess the impact of group membership i e the level of segregation for a city while including controls for other relevant individual characteristics e g income education language nativity etc It then illustrates how one can use these models to quantitatively assess the extent to which segregation traces to impacts of group membership on residential attainments versus other factors such as group differences in income The book then shows how micro level attainment models can be used to study macro level variation in segregation specifically by estimating multi level models of individual residential attainments to assess how the effect of group membership i e segregation index scores vary with city characteristics Finally the book introduces refined versions of popular indices that are free of the vexing problem of upward bias This improves the quality of segregation measurement directly at the level of individual cases and expanding the number of cases that can be safely included in empirical studies *Measuring Productivity of Labour-Intensive Work Practices in Road Construction in Africa*

Emmanuel Bamfo-Agyei, Clinton Aigbavboa, Wellington Didibhuku Thwala, 2022-07-15 This book examines an issue of constant concern in the construction industry that of productivity Using data from Ghana and South Africa it presents research into the productivity of local contractors in these countries whilst examining the predominance of labour intensive production methods The book begins by considering the theoretical and conceptual perspectives on labour productivity in the construction industry in the existing literature before reviewing current productivity measurement frameworks The book then explores the productivity of labour intensive public works projects in South Africa and Ghana alongside a general discussion of key factors affecting construction productivity in these countries Whilst the focus is on road construction the framework developed can be applied to any number of construction projects to measure and ultimately improve productivity This book is useful reading for researchers and practitioners looking to understand the factors influencing labour productivity in construction at both the industry and the project level including construction managers quantity surveyors cost engineers and project managers
