

Multistakeholder platforms

- Stakeholders with interests in water decisions need to work together to understand their differences and search for solutions that each can accept
- Different stakeholders are identified and, usually through representatives, invited and assisted to interact in a deliberative forum that focuses on:
 - sharing knowledge and perspectives
 - generating and examining options
 - informing and shaping negotiations and decisions
- The purpose and scope of an MSP must be clear, with appropriate scales and levels for deliberation and analysis (for example watershed versus river basin, or local district versus national).
- MSPs expand representation and participation of stakeholders in governance. They encourage learning and greater understanding of interdependencies among stakeholders and ways of resolving contested issues
- By providing a pathway for deliberation, MSPs can lead to better decisions and water agreements that can be more successfully implemented.

FAO seeks to enhance the contribution of social protection to gender equality and women s empowerment by providing country level support through capacity development knowledge generation and programme support To move forward this agenda FAO has developed the Technical Guidance Toolkit on Gender sensitive Social Protection Programmes to Combat Rural Poverty and Hunger The Toolkit is designed to support SP and gender policy makers and practitioners in their efforts to systematically apply a gender lens to SP programmes in ways that are in line with global agreements and FAO commitments to expand inclusive SP systems for rural populations The Toolkit focuses on the role of SP in reducing gendered social inequalities and rural poverty and hunger
