**Engagement and Teacher Autonomy among Secondary School Teachers** Samson R Victor,Umadevi Patil,2016-07-11  
Teacher autonomy is essential for ensuring a learning environment that addresses children s diverse needs As much as the learner requires space freedom flexibility and respect the teacher also requires the same Currently the system of administrative hierarchies and control examinations and centralized planning for curriculum reform all constrain the autonomy of the teacher Even when there is curricular freedom teachers do not feel confident that they can exercise it without being taken to task by the administration for doing things differently Therefore it is essential to enable and support them in exercising choice As much as the classroom needs to nurture a democratic flexible and accepting culture the school institution and the bureaucratic structure need to do the same Not only should the teacher receive orders and information

but the voice of the teacher should also be heard by the superiors who often make decisions that affect the immediate classroom life and culture in the school Relationships between teachers and their heads and principals must be informed by equality and mutual respect and decision making must be on the basis of dialogue and discussion The annual monthly and weekly calendars of activities need to provide time for such staff interactions for reviewing and planning This book intends to help the readers to understand how a research study can be conducted on teacher autonomy and work engagement of secondary school teachers     *Positive School Leadership* Joseph F. Murphy,Karen Seashore Louis,2018-04-20 This landmark book translates positive and asset based understandings of organizations to develop a powerful model of school leadership that is grounded in both existing research and the complexities of life in schools The authors both senior scholars in educational leadership apply insights from positive psychology to the role and function of educational leaders The Positive School Leadership PSL model draws on the strengths of relationships among staff and the broader school community to communicate and instill shared values and a common mission This book builds a compelling case for creating a more inclusive less mechanistic approach to leadership Designed to engage both the hearts and minds of readers the text is organized around reflective questioning of educational practice and current assumptions about the purposes and goals of leadership in schools Book Features An integrated way to think about organizational interpersonal and systemic leadership from the inside out A look at positive leadership in action demonstrating how it operates to strengthen relationships that make a school more effective An examination of the long range impacts that can be anticipated from reorienting schools toward positive leadership Reflective questions in each chapter that engage readers in deeper analysis of the information presented     ***Education and the Working Class (RLE Edu L Sociology of Education)*** Brian Jackson,Dennis Marsden,2012-05-23 When first published this book had a significant influence on the campaign for comprehensive schools and it spoke to generations of working class students who were either deterred by the class barriers erected by selective schools and elite universities or having broken through them to gain university entry found themselves at sea The authors admit at the end of the book they have raised and failed to answer many questions and in spite of the disappearance of the majority of grammar schools many of those questions still remain unanswered     *Report of the Department of the Interior ...
