Our Violent World and the Ethics of Jesus John Dudley Willis,2019-11-29 This book is driven by forty years of study on 1700 years of Christian violence The historical section Part 1 opens with Christianity is the most homicidal religion in the history of the world Half a Billion men women children infants elderly sick and disabled slain You read how Christians were and are taught to obey their governments more than Jesus Christ whether killing as soldiers torturing for governments or harming innocent citizens as police You read the words of Christian European Kings Queens and Popes to their Christian explorers sent into world Discover subdue and conquer **Blitzkrieg to Desert Storm** Robert M. Citino,2022-05-25 When Germany launched its blitzkrieg invasion of France in 1940 it forever changed the way the world waged war Although the Wehrmacht ultimately succumbed to superior Allied firepower in a two front war its stunning operational achievement left a lasting impression on military commanders throughout the world even if their own operations were rarely executed as

effectively Robert Citino analyzes military campaigns from the second half of the twentieth century to further demonstrate the difficulty of achieving decisive results at the operational level. Offering detailed operational analyses of actual campaigns, Citino describes how UN forces in Korea enjoyed technological and air superiority but found the enemy unbeatable. He provides analyses of Israeli operational victories in successive wars until the Arab states finally grasped the realities of operational level warfare in 1973 and tells how the Vietnam debacle continued to shape U.S. doctrine in surprising ways. Looking beyond major power conflicts, he also reveals the lessons of India's blitzkrieg-like drive into Pakistan in 1971 and of the senseless bloodletting of the Iran-Iraq War. Citino especially considers the evolution of U.S. doctrine and assesses the success of Desert Storm in dismantling an entrenched defending force with virtually no friendly casualties. He also provides one of the first scholarly analyses of Operation Iraqi Freedom, showing that its plan was curiously divorced from the realities of military history, grounded instead on nebulous theories about expected enemy behavior. Throughout, Citino points to the importance of mobility, especially mobilized armor, in modern operational warfare and assesses the respective roles of firepower, training, doctrine, and command and control mechanisms. Brimming with new insights, Citino's study shows why technical superiority is no guarantee of victory and why a thorough grounding in the history of past campaigns is essential to anyone who wishes to understand modern warfare. Blitzkrieg to Desert Storm provides that grounding as it addresses the future of operational level warfare in the post-9/11 era.

Dimensions of Goodness Vittorio Hösle, 2014-10-02. *Dimensions of Goodness* is based on the second conference of the Notre Dame Institute for Advanced Study, whose aim is to bridge the normative and descriptive dimensions of knowledge by bringing in as many disciplines as possible to address fundamental philosophical issues. While the first conference dealt with the elusive topic of beauty, the second addressed crucial issues of ethics. In the first section of this volume, the German philosophers Franz von Kutschera and Markus Gabriel discuss the nature of values and the reasons why we believe that normativity has a place in the world. In the second section, the British historian Jonathan Israel, the American theologian Jennifer Herdt, and the editor of the volume analyse epochal changes in our moral beliefs due to Enlightenment Christianity and the general evolution of moral ideas, which is presented in a way that markedly differs from Alasdair MacIntyre's famous account. The third section explores both the light that the exact sciences shed on the process of decision making in the contributions by the Italian neuroscientist Camillo Padoa-Schioppa and the Canadian psychologist Clive Seligman, as well as the ethical challenges that modern science has brought forward in areas such as the responsibility of scientists, bioethics, and medical ethics in chapters by the Swiss chemist and Nobel laureate Richard Ernst, the American bioethicist and historian of biology Jane Maienschein, and the American philosopher and legal scholar Anita Allen. The fourth section focuses on specific challenges of our time: the British philosopher Robin Attfield explores the principles of environmental ethics; the Swiss business ethicist Georges Enderle investigates goodness in economy; the Mexican elder statesman, former Secretary of Economy and of Foreign Affairs, Luiz Ernesto Derbez Bautista looks at the challenges of

development and the American legal scholars Steven D Smith and Mary Ellen O Connell examine the place of religion in the American constitution and the power of international law in limiting violence respectively Finally the last section consists of a chapter by the well known Chinese intellectual Wang Hui on Lu Xun s struggle to find a middle way between respect of one s own tradition and the demands of globalization There is probably no other volume in which so many different disciplines come together to try to find a convergence of perspectives on basic moral issues The book will be invaluable to those who believe that goodness is the focal point of most academic disciplines and that academia can find a stronger point of unity in a common reflection on what goodness in various areas means
