Goodenough Service Values Tradeoffs And The Nhs:

A Good-enough Service Bill New,1999 **The Affordable Care Act and Medicare in Comparative Context** Eleanor D. Kinney,2015-07-20 This book provides a comprehensive and approachable overview of Medicare under the Affordable Care Act The author illustrates how the ACA addresses the long term fiscal and demographic challenges facing Medicare as well as the potential for Medicare to become a single payer system **Oxford Handbook of Public Health Practice** David Pencheon,2006 This is a practical public health book written by public health practitioners for public health practitioners It introduces learning practitioners to the early phases of approaching a public health issue details why an issue is important and exactly how it can be analysed and addressed It deals not only with the technical issues but crucially with how those technical issues can be implemented in order to improve the health of the population directly or via one of many important causal pathways quality of health care design and delivery It is written by experienced internationally known practitioners of public health *Politics, Health, and Health Care* Theodore R. Marmor,Rudolf Klein,2012-07-24 Two towering figures in the field of health care policy analysis Theodore R Marmor and Rudolf Klein reflect on a lifetime of thought in this wide ranging collection of essays published in the wake of President Obama s health care reform Presented as a kind of dialogue between the two the book offers their recent writings on the future of Medicare universal health insurance conflicts of interest among physicians regulators and patients and many other topics Managing in Health and Social Care Vivien Martin,Julie Charlesworth,Euan Henderson,2010-02-25 Managing in Health and Social Care is a practical textbook for students of management in health and social care whether at undergraduate or postgraduate level It includes case studies with textual commentary to reinforce learning activities key references and clear explanations of essential management tools and concepts Leading Change in Health and Social Care Vivien Martin,2010-10-04 This book breaks new ground in exploring the need for individuals to engage in personal change through learning as an essential part of achieving significant change in organisations It explains how to engage with people s energy enthusiasm and abilities to enable them to think and do things differently **Nursing Times, Nursing Mirror** ,1999 The NHS Anthony Harrison,Jennifer Dixon,2000 This publication argues that no health care system can do everything that is beneficial nor should it try to The way forward therefore is the best management of the inevitable gap between supply and demand To show how this can be achieved the book sets out the case for the way the NHS is currently financed and looks at the tensions caused by this funding past and present to show how to proceed to a better future **Evidence-based Health Policy** Vivian Lin,Brendan Gibson,2003 Health policy is a highly contested arena where there have been increasing calls for policy to be more evidence based A central question remains is evidence based health policy possible This book offers a critical perspective on the interplay between generation and policy formulation The purpose of this book is to critique the notion that evidence based medicine can make an unproblematic transformation into evidence approach to health policy that makes use of the best available

research in an explicit rigorous and accountable way The book is illustrated by eleven case studies of health policy making that elucidate how evidence is used in particular policy making contexts These case studies provide unique insights from the people who have been involved in the policy process They reveal the complex nature of evidence based research The premise of the book is that although the idea of evidence based health policy holds considerable promise it will not be realised without substantial evaluation of the problems conceptual and practical that beset it Health Policy Reform John Lister,2005 Addressing the dramatic changes in healthcare systems since the early 1990s this work questions whether these major reforms are driven by the health needs of the wider population or in fact by non health considerations such as financial and political concerns of governments and global institutions This major new study presents the key issues facing health professionals today and is aimed at medics and administrators alike The book s use of a common analytical framework produces a consistent critical analysis of different situations in various countries making its approach wholly unlike previous studies of the topic of modern healthcare BMJ ,2000 **Towards a Digital Ecology** Victoria Betton,2022-02-27 Towards a Digital Health Ecology NHS Digital Adoption through the COVID 19 Looking Glass is about technology adoption in the UK s National Health Service NHS as told from the inflection point of a disaster In 2020 the world lived through a disaster of epic proportions devastating humanity around the globe It took a microscopic virus to wreak havoc on our healthcare system and force the adoption of technology in a way that had never been seen before This book tells the story of digital technology take up in the NHS through the lens of that disaster This book documents use of technology in the NHS through the lens of the first pandemic shock Our healthcare system paid for by general taxation and free at the point of demand was conceived and developed in a firmly analogue world Created in 1948 the NHS predates the invention of the World Wide Web by some forty years This is not a book simply about technology it is a study of the painful process of reengineering a mammoth and byzantine system that was built for a different era The digital health sector is a microcosm of the wider healthcare system through which grand themes of social inequality public trust private versus commercial interests values and beliefs are played out The sector is a clash of competing discourses the civic and doing good for society the market and wealth creation the industrial creating more efficient and effective systems the project expressed as innovation and experimentation lastly the notion of vitality and leading a happier healthy life Each of these discourses exists in a state of flux and tension with the other This book is offered as a critique of the role of digital technologies within healthcare It is an examination of competing interests approaches and ideologies It is a story of system complexity told through analysis and personal stories
