Tuplin, John Ma, 2020-12-29 During the Second World War the Bodleian Library in Oxford acquired a set of Aramaic letters eight sealings and the two leather bags in which the sealed letters were once stored The letters concern the affairs of Aršāma satrap of Egypt in the later fifth century Taken with other material associated with him mostly in Aramaic Demotic Egyptian and Akkadian they illuminate the Achaemenid world of which Aršāma was a privileged member and evoke a wide range of social economic cultural organizational and political perspectives from multi lingual communication storage and disbursement of resources and satrapal remuneration to cross regional ethnic movement long distance travel religious practice and iconographic projection of ideological messages Particular highlights include a travel authorization the only example of something implicit in numerous Persepolis documents texts about the religious life of the Judaean garrison at Elephantine Aršāma's magnificent seal a masterpiece of Achaemenid glyptic inherited from a son of Darius I and echoes of temporary disturbances to Persian management of Egypt But what is also impressive is the underlying sense of systematic coherence founded on and expressed in the use of formal even formalized written communication as a means of control The Aršāma dossier is not alone in evoking

that sense but its size variety and focus upon a single individual give it a unique quality Though this material has not been hidden from view it has been insufficiently explored it is the purpose of the three volumes of Ar ma and his World The Bodleian Letters in Context to provide the fullest presentation and historical contextualization of this extraordinary cache yet attempted Volume I presents and translates the letters alongside a detailed line by line commentary while Volume II reconstructs the two seals that made the clay bullae that sealed the letters with special attention to Ar ma s magnificent heirloom seal Volume III comprises a series of thematic essays which further explore the administrative economic military ideological religious and artistic environment to which Ar ma and the letters belonged

**The Archaeology of Phrygian Gordion, Royal City of Midas** C. Brian Rose,2013-03-16 Some of the most dramatic new discoveries in Asia Minor have been made at Gordion the Phrygian capital that controlled much of central Asia Minor for close to two centuries The most famous ruler of the kingdom was Midas who regularly negotiated with Greeks in the west and Assyrians in the east during his reign Excavations have been conducted at Gordion over the course of the last 60 years all under the auspices of the University of Pennsylvania Museum of Archaeology and Anthropology In spite of the economic and political importance of Gordion and the Phrygians the site is consistently omitted from courses in Old World archaeology primarily because Gordion lies too far to the west for many Near Eastern archaeologists and too far to the east for classical archaeologists Moreover there is no book that offers a comprehensive and up to date assessment of the material culture of Gordion during the Phrygian period a gap that will be filled by this volume The chapters cover all aspects of Gordion s Phrygian settlement topography from the arrival of the Phrygians in the tenth century B C through the arrival of Alexander the Great in 333 B C focusing on the site s changing topography and the consistently fluctuating interaction between the inhabitants and the landscape A reexamination of the material culture of Phrygian Gordion is particularly timely given the dramatic recent changes in the site s chronology wherein the dates of many discoveries have changed by as much as a century The authors are among the leading experts in Near Eastern archaeology historic preservation paleobotany and ancient furniture and their articles highlight the interdisciplinary nature of the Gordion project A significant component of the book is a new color phase plan of the site that succinctly presents the topography in diachronic perspective University Museum Monograph 136

**Incised Drawings from Early Phrygian Gordion** Lynn E. Roller, 2011-09-01 In 1950 the University of Pennsylvania Museum of Archaeology and Anthropology began excavations at the ancient Phrygian capital of Gordion in central Turkey The Museum s Gordion Project continues today with researchers from many disciplines and with many specializations contributing to a growing and sometimes changing body of information and understanding about this complex and multifaceted site inhabited by peoples and diverse civilizations for millennia In this volume of Gordion Special Studies Lynn E Roller focuses on a series of stone blocks with incised figural and abstract drawings recovered from early Phrygian structures at Gordion The great majority of the incised stones come from a single structure within the Early Phrygian citadel at Gordion known as Megaron 2 a stone building with several remarkable features and a likely candidate for the citadel s temple The volume begins with a description of the excavation of the stones and a discussion of Megaron 2 Next is an analysis of the subject matter of the drawings by type describing scenes of human figures animals architectural drawings geometric patterns and formless marks A discussion follows of the sources from which the drawings could have been taken and of parallels with similar scenes and designs on objects in other media from Gordion and other contemporary sites in Anatolia The fourth section proposes an explanatory hypothesis on the origin of the drawings and considers who could have made them and why Parallels with comparable drawings from Anatolia and the Near East are discussed here The final section summarizes the contribution of the drawings to our understanding of the development of the Early Phrygian material at Gordion University Museum Monograph 130

*Agricultural Sustainability and Environmental Change at Ancient Gordion* John M. Marston, 2017-08-21 This book publishes the results of 220 botanical samples from the 1993 2002 Gordion excavations directed by Mary Voigt Together with Naomi Miller s 2010 volume Gordion Special Studies 5 this book completes the publication of botanical samples from Voigt s excavations The book aims to reconstruct agricultural decision making using archaeological and paleoenvironmental data from Gordion to describe environmental and agricultural changes at the site John M Marston argues that different political and economic systems implemented over time at Gordion resulted in patterns of agricultural decision

making that were well adapted to the social setting of farmers in each period but that these practices had divergent environmental impacts with some regimes sponsoring sustainable agricultural practices and others leading to significant environmental change The implications of this book are twofold Gordion will now be one of the best published agricultural datasets from the entire Near East and thus serve as a valuable comparable dataset for regional synthesis of agricultural and environmental change and the methods the author developed to reconstruct agricultural change at Gordion serves as tools to engage questions about the relationship between social and environmental change at sites worldwide Other books address similar themes but none in the Near East address these themes in diachronic perspective such as we have at Gordion

University Museum Monograph 145      **Encoding Metalinguistic Awareness** E. Cancik-Kirschbaum, J. C.

Johnson, 2019-12-31 The Ancient Near East provides a particularly striking example for the dynamics of knowledge transfer throughout space and time The civilizations that emerged here at the dawn of history attest to continuous processes of exchange adaption and negotiation to the emergence of content and its reconfiguration to diffusion disappearance and resurgence of themes concepts topics and ideas In the late fourth millennium the creation and implementation of supraregional notational systems in southern Mesopotamia triggers a cognitive revolution within a few centuries the use of writing becomes a dominant cultural technique and over the subsequent millennia the technique of wedge writing spreads throughout southwest Asia Numerous indigenous cuneiform subcultures came into being in a wide variety of times and places but these distinct instantiations were held together and preserved the possibility of common legibility through shared practices of teaching and learning a common core of textual materials and not least a systematic instrumentarium for representing speech and notation This repertoire is part of each of these streams of tradition which characterise the cuneiform cultures as a whole In light of the centuries of tradition the great effort that has gone into its construction and maintenance as well as the preservation of original linguistic materials and their translation into more familiar languages the validity of this scientific tradition broadly conceived cannot be disputed Still even if the historical processes of transmission within the cuneiform world and the difficulties of translating cuneiform sources into non cuneiform traditions prevented a general and far reaching mobilisation of the cuneiform sources as vehicles for scientific reflection these same factors also ensured its continued survival in Mesopotamia and Syria for not centuries but rather millennia One of the most important components of this process was the awareness of practitioners about language its role for and its impact on the generation of knowledge and specifically about linguistic patterns Among the literally innumerable textual artefacts from the ancient Near East there are some that both explicitly and implicitly encode traces of this distinctively linguistic awareness It was in pursuit of these traces of meta linguistic awareness that the participants in this volume came together      *Empire, Authority, and Autonomy in Achaemenid Anatolia* Elspeth R. M. Dussinberre, 2013-04-29 The Achaemenid Persian Empire 550 330 BCE was a vast and complex sociopolitical structure that encompassed much of modern day Turkey Syria Jordan Israel Egypt Iraq Iran

and Afghanistan and included two dozen distinct peoples who spoke different languages worshipped different deities lived in different environments and had widely differing social customs This book offers a radical new approach to understanding the Achaemenid Persian Empire and imperialism more generally Through a wide array of textual visual and archaeological material Elspeth R M Dusinberre shows how the rulers of the Empire constructed a system flexible enough to provide for the needs of different peoples within the confines of a single imperial authority and highlights the variability in response This book examines the dynamic tensions between authority and autonomy across the Empire providing a valuable new way of considering imperial structure and development

**Imperial Matter** Lori Khatchadourian, 2016-03-18 A free ebook version of this title is available through Luminos University of California Press's new open access publishing program Visit [www.luminosoa.org](http://www.luminosoa.org) to learn more What is the role of the material world in shaping the tensions and paradoxes of imperial sovereignty Scholars have long shed light on the complex processes of conquest extraction and colonialism under imperial rule But imperialism has usually been cast as an exclusively human drama one in which the world of matter does not play an active role Lori Khatchadourian argues instead that things from everyday objects to monumental buildings profoundly shape social and political life under empire Out of the archaeology of ancient Persia and the South Caucasus **Imperial Matter** advances powerful new analytical approaches to the study of imperialism writ large and should be read by scholars working on empire across the humanities and social sciences

**Archaeology of Iran in the Historical Period** Kamal-Aldin Niknami, Ali Hozhabri, 2020-05-22 This collection of twenty eight essays presents an up to date survey of pre Islamic Iran from the earliest dynasty of Illam to the end of Sasanian empire encompassing a rich diversity of peoples and cultures Historically Iran served as a bridge between the earlier Near Eastern cultures and the later classical world of the Mediterranean and had a profound influence on political military economic and cultural aspects of the ancient world Written by international scholars and drawing mainly on the field of practical archaeology which traditionally has shared little in the way of theories and methods the book provides crucial pieces to the puzzle of the national identity of Iranian cultures from a historical perspective Revealing the wealth and splendor of ancient Iranian society its rich archaeological data and sophisticated artistic craftsmanship most of which has never before been presented outside of Iran this beautifully illustrated book presents a range of studies addressing specific aspects of Iranian archaeology to show why the artistic masterpieces of ancient Iranians rank among the finest ever produced Together the authors analyze how archaeology can inform us about our cultural past and what remains to still be discovered in this important region
