The Victory Banner Over the Reichstag Jeremy Hicks, 2020-12-15 In one of the most iconic images from World War II a Russian soldier raises a red flag atop the ruins of the German Reichstag on April 30 1945 Known as the Victory Banner this piece of fabric has come to symbolize Russian triumph glory and patriotism Facsimiles are used in public celebrations all over the country and an exact replica is the centerpiece in the annual Victory Parade in Moscow s Red Square The Victory Banner Over the Reichstag examines how and why this symbol was created the changing media of its expression and the contested evolution of its message From association with Stalinism and communism to its acquisition of Russian nationalist meaning Jeremy Hicks demonstrates how this symbol was used to construct a collective Russian memory of the war He traces how the Soviets and then Vladimir Putin have used this image and the banner itself to build a remarkably powerful mythology of Russian greatness

The Russia-Ukraine War and Its Implications on Central Asia Assylzat Karabayeva, Ikboljon Qoraboyev, 2024-10-15 The Russia Ukraine War and its Implications for Central Asia Resilience Connectivity and Decolonization embarks on a comprehensive exploration of the profound impacts of the Ukraine conflict on Central Asia viewed through the prism of the region s scholars This book assesses the geopolitical transformation economic shifts and the evolving narratives of national and regional identities underpinned by thirty years of nation building and current socio economic realities This collection critically navigates between the dual forces of emerging expectations for change decolonization and the strong undercurrents of path dependence and local socio economic constraints Furthermore it provides a nuanced examination of the intricate relationships between state society and media illustrating how these dynamics are reshaped in the face of the war s ongoing impact Through a balanced perspective this volume unveils an emerging vision of Central Asia marked by resilience and a strategic quest for a more pronounced role in global affairs This work stands as a crucial resource for understanding the multifaceted consequences of the Ukraine Russia conflict on Central Asia enriched by authentic regional voices

The Soviet Myth of World War II Jonathan Brunstedt, 2021-07-15 This pioneering monograph a Foreign Affairs Best Book of the Year asks how a socialist society ostensibly committed to Marxist ideals of internationalism and global class struggle reconciled itself to notions of patriotism homeland Russian ethnocentrism and the glorification of war Through the lens of the myth and remembrance of victory in World War II arguably the central defining event of the Soviet epoch the book shows that while state historical narratives reinforced a sense of Russian primacy and Russian dominated ethnic hierarchy the story of the war enabled an alternative supra ethnic source of belonging which subsumed Russian and non Russian loyalties alike to the Soviet whole The tension and competition between Russocentric and internationalist conceptions of victory which burst into the open during the late 1980s reflected a wider struggle over the nature of patriotic identity in a multiethnic society that continues to reverberate in the post Soviet space The book sheds new light on long standing questions linked to the politics of remembrance and provides a crucial historical context for the

The Russian Air Force carries the mantle of the erstwhile Red Air Force of the Soviet Union and has a long and illustrious history backed by grand traditions and customs The Russian Air Force is still coming to grips with its changed circumstances after the collapse of the Soviet Union and is perhaps in the best shape of the three armed forces to be able to lend credence to the Russian Federation's claim to international influence and power projection capabilities Doctrine is the reflection of a nation's character and air power doctrine is influenced by the strategic culture of a nation Nowhere else is this more apparent than in the case of the Russian Air Force The Red Air Force has been directly influenced by the political upheavals in the Soviet Union and now Russia but has displayed exemplary resilience in continuing to provide adequate support for government policies The impact of political ideology on the development of doctrine and air power has not been greater in any other air force around the world This book is an extension of a doctoral thesis produced in 2005 and is essential reading for anyone trying to come to grips with the intricate relationship that exists between national security imperatives political ideology and the development of military doctrine Back cover **Hearings, Reports and Prints of the Senate Committee on Commerce** United States.
