The Oxford Handbook of Victorian Medievalism Joanne Parker, Corinna Wagner, 2020-09-15 In 1859 the historian Lord John Acton asserted two great principles divide the world and contend for the mastery antiquity and the middle ages The influence on Victorian culture of the Middle Ages broadly understood then as the centuries between the Roman Empire and the Renaissance was both pervasive and multi faceted This medievalism led for instance to the rituals and ornament of the Medieval Catholic church being reintroduced to Anglicanism It led to the Saxon Witan being celebrated as a prototypical representative parliament It resulted in Viking raiders being acclaimed as the forefathers of the British navy And it encouraged innumerable nineteenth century men to cultivate the superlative beards we now think of as typically Victorian in an attempt to emulate their Anglo Saxon forefathers Different facets of medieval life and different periods before the Renaissance were utilized in nineteenth century Britain for divergent political and cultural agendas Medievalism also became a dominant mode in Victorian art and architecture with 75 per cent of churches in England built on a Gothic rather than a classical model And it was pervasive in a wide variety of literary forms from translated sagas to pseudo medieval devotional verse to triple decker novels Medievalism even transformed nineteenth century domesticity while only a minority added moats and portcullises to their homes the medieval style textiles produced by Morris and Co decorated many affluent drawing rooms The Oxford Handbook of Victorian Medievalism is the first work to examine in full the fascinating phenomenon of medievalism in Victorian Britain Covering art architecture religion literature politics music and social reform the Handbook also surveys earlier forms of antiquarianism that established the groundwork for Victorian movements In addition this collection addresses the international context by mapping the spread of medievalism across Europe South

perception of the arts and philosophy Time's Witness Rosemary Hill,2021-06-24 From the Wolfson Prize winning author of *God's Architect* Pugin and the Building of Romantic Britain Between the fall of the Bastille in 1789 and the opening of the Great Exhibition in 1851 history changed The grand narratives of the Enlightenment concerned with kings and statesmen gave way to a new interest in the lives of ordinary people Oral history costume history the history of food and furniture of Gothic architecture theatre and much else were explored as never before Antiquarianism the study of the material remains of the past was not new but now hundreds of men and some women became antiquaries and set about rediscovering their national history in Britain France and Germany The Romantic age valued facts but it also valued imagination and it brought both to the study of history Among its achievements were the preservation of the Bayeux Tapestry the analysis and dating of Gothic architecture and the first publication of Beowulf It dispelled old myths and gave us new ones Shakespeare's birthplace clan tartans and the arrow in Harold's eye are among their legacies From scholars to imposters the dozen or so antiquaries at the heart of this book show us history in the making *Style and Solitude* Mari Hvattum,2023-06-06 How modern notions of architectural style were born and the debates they sparked in nineteenth century Germany The term style has fallen spectacularly out of fashion in architectural circles Once a conceptual key to understanding architecture's inner workings today style seems to be associated with superficiality formalism and obsolete periodization But how did style once defined by German sociologist Georg Simmel as a place where one is no longer alone in architecture actually work How was it used and what did it mean In *Style and Solitude* Mari Hvattum seeks to understand the apparent death of style returning to its birthplace in the late eighteenth century and charting how it grew to influence modern architectural discourse and practice As Hvattum explains German thinkers of the eighteenth and nineteenth century offered competing ideas of what style was and how it should be applied in architecture From Karl Friedrich Schinkel's thoughtful eclecticism to King Maximilian II's attempt to capture the zeitgeist in an architectural competition style was at the center of fascinating experiments and furious disputes Starting with Johann Joachim Winckelmann's invention of the period style and ending a century later with Gottfried Semper's generative theory of style Hvattum explores critical debates that are still ongoing today **The Oxford**
