The Seas of Time: Sci-Fi Romance

Christine Castle, Star-crossed lovers from different worlds. Will their love survive? When Talia agreed to take a break from her research to spend a week at the beach, ending up a captive in the depths of the ocean was the last thing she ever expected. Her best friend and travel companion Janelle has a fondness for fairy tales and is sure that their abductors, with their gold medal swimmer physiques, are sea people, mermen. Talia knows that's ridiculous, but when one of the men, Ballard, slips her his knife and lets her in on his own purpose for being there, she starts to suspect that the truth is beyond anything even Janelle could have imagined. She can't deny her attraction to Ballard, but also can't fully trust this man and his extraordinary claims. To get back home, she may have no choice. Ballard spent the past year infiltrating a rogue military group suspected of breaking the sacred and critical First Tenet of Below: Do not contact those Above. His mission is to discover the location of a

secret deep sea base and destroy the rogues ability to travel to the sea s surface But he can t help his feelings for Talia the beautiful intelligent woman from Above The deeper he falls the more he risks his own mission and the future of every human on Earth As they are drawn deeper into danger Talia and Ballard begin to realize that their only hope for survival is each other Futuristic Romance Sci Fi Romance Science Fiction Romance [Library of Congress Catalog](#) Library of Congress,1971 Beginning with 1953 entries for Motion pictures and filmstrips Music and phonorecords form separate parts of the Library of Congress catalogue Entries for Maps and atlases were issued separately 1953 1955 [Earth vs. the Sci-Fi Filmmakers](#) Tom Weaver,2010-06-28 Back in the era of black and white horror and sci fi movies we didn t have special effects or the money for em says Peter Graves one of the genre s most popular stars But in those days an unlimited amount of money wouldn t have gotten us much better special effects because they didn t exist We had to go with the stories and try to make them as believable as possible and flash the outlandish things by quickly so the audience never got a good in focus look at them Perhaps no films attracted more rabid fans and less critical acclaim than the genre movies of that era The men and women who made the characters come to life are interviewed here talking about their work the behind the scenes action and the impact the movies had on their careers The interviewees are Gene Barry Gary Clarke Gary Conway Merian C Cooper Robert Dix Donnie Dunagan Alex Gordon Peter Graves Gary Gray Arch Hall Jr Stephen Kandel Carolyn Kearney Ken Kolb Robert L Lippert Jr Jan Merlin Mary Mitchel Elliott Reid Stanley Rubin Frankie Thomas and Burt Topper Extensively illustrated *Science-fiction, the Early Years* Everett Franklin Bleiler,1990 In this volume the author describes more than 3000 short stories novels and plays with science fiction elements from earliest times to 1930 He includes imaginary voyages utopias Victorian boys books dime novels pulp magazine stories British scientific romances and mainstream work with science fiction elements Many of these publications are extremely rare surviving in only a handful of copies and most of them have never been described before **Ice Planet Barbarians** Ruby Dixon,2021-11-30 The international publishing phenomenon Ice Planet Barbarians now in a special print edition Fall in love with the out of this world romance between Georgie Carruthers a human woman and Vektal an alien from another planet in this expanded edition with bonus materials and an exclusive epilogue in print only You d think being abducted by aliens would be the worst thing that could happen to me And you d be wrong Because now the aliens are having ship trouble and they ve left their cargo of human women including me on an ice planet We re not equipped for life in this desolate winter wasteland Since I m the unofficial leader I head out into the snow to look for help I find help all right A big blue horned alien introduces himself in a rather startling way Vektal says that I m his mate his chosen female and that the reason his chest is purring is because of my presence He ll help me and my people survive but this poses a new problem If Vektal helps us survive I m not sure he s going to want to let me go **El-Hi Textbooks in Print** ,1982 [Science-fiction](#) Everett Franklin Bleiler,Richard Bleiler,1998 Complementing Science Fiction The Early Years which surveys science fiction published in book form from its beginnings through 1930 the

present volume covers all the science fiction printed in the genre magazines *Amazing*, *Astounding* and *Wonder* along with offshoots and minor magazines from 1926 through 1936. This is the first time this historically important literary phenomenon which stands behind the enormous modern development of science fiction has been studied thoroughly and accurately. The heart of the book is a series of descriptions of all 1 835 stories published during this period plus bibliographic information. Supplementing this are many useful features: detailed histories of each of the magazines; an issue by issue roster of contents; a technical analysis of the art work; brief authors' biographies; poetry and letter indexes; a theme and motif index of approximately 30 000 entries; and general indexes.

Science Fiction: The Gernsback Years is not only indispensable for reference librarians, collectors, readers and scholars interested in science fiction; it is also of importance to the study of popular culture during the Great Depression in the United States. Most of its data, which are largely based on rare and almost unobtainable sources, are not available elsewhere.

The Stuff of Science Fiction Gary Westfahl, 2022-09-27 While students and general readers typically cannot relate to esoteric definitions of science fiction, they readily understand the genre as a literature that characteristically deals with subjects such as new inventions, space, robots, and aliens. This book looks at science fiction in precisely this manner, with twenty-one chapters that each deal with a subject that is repeatedly addressed in science fiction of recent centuries. Based on a packet of original essays that the author assembled for his classes, the book could serve as a supplemental textbook in science fiction classes but also contains material of interest to science fiction scholars and others devoted to the genre. In some cases, chapters offer thorough surveys of numerous works involving certain subjects, such as imagined vehicles, journeys beneath the Earth, and undersea adventures discovering intriguing patterns in the ways that various writers developed their ideas. When comprehensive coverage of ubiquitous topics such as robots, aliens, and the planet Mars is impossible, chapters focus on major themes, referencing selected texts. A conclusion discusses other science fiction subjects that were omitted for various reasons, and a bibliography lists additional resources for the study of science fiction in general and the topics of each chapter.

Reaching back to the beginnings of television, the book includes such groundbreaking series as *The Twilight Zone* and *The Prisoner*, alongside more contemporary examples like *Crazy Ex-Girlfriend* and *Hannibal*. The authors provide production history for each series and discuss their relevance to global pop culture. To provide a more global approach to the topic, the authors also consider several
