## **International Politics Foundations Of The System:**

System and Process in International Politics Morton A Kaplan, 2005 System and Process 1957 broke the mould in political science by combining systems game and cybernetic concepts in its theoretical formulations Since its publication serious research in international relations has needed to respond to the bold hypotheses that matched equilibrial rules with type of system Kaplan's life long interest in finding an objective basis for moral judgments had its scholarly origins in an appendix of this classical book which incorporated his understanding of philosophy and in particular the philosophy of science A second appendix on The Mechanisms of Regulation explored the cybernetic and recursive nature of knowing

*Medieval Foundations of International Relations* William Bain, 2016-07-15 The purpose of this volume is to explore the medieval inheritance of modern international relations Recent years have seen a flourishing of work on the history of international political thought but the bulk of this has focused on the early modern and modern periods leaving continuities with the medieval world largely ignored The medieval is often used as a synonym for the barbaric and obsolete yet this picture does not match that found in relevant work in the history of political thought The book thus offers a chance to correct this misconception of the evolution of Western international thought highlighting that the history of international thought should be regarded as an important dimension of thinking about the international and one that should not be consigned to history departments Questions addressed include what is the medieval influence on modern conception of rights law and community how have medieval ideas shaped modern conceptions of self determination consent and legitimacy are there medieval answers to modern questions is the modern world still working its way through the Middle Ages to what extent is the modern outlook genuinely secular is there a theology of international relations what are the implications of continuity for predominant historical narrative of the emergence and expansion of international society Medieval and modern are certainly different however this collection of essays proceeds from the conviction that the modern world was not built on a new plot with new building materials Instead it was constructed out of the rubble that is the raw materials of the Middle Ages This will be of great interest to students and scholars of IR IR theory and political theory

Part 1 presents a conceptual framework for developing a normative theory of world order. Each of the four chapters in Part 2 examines a specific global crisis in depth working within the framework laid out in Part 1. **Nuclear Proliferation and the Psychology of Political Leadership** Kelly O'Reilly, 2014-09-15 This book offers a novel approach to understanding the puzzle of nuclear proliferation by examining how leaders beliefs and perceptions about the international system influence states decisions to acquire nuclear weapons Today there is a persisting dilemma over the spread of nuclear weapons for both practitioners and scholars of international affairs Uncertainty remains whether determined proliferators can be stopped as shown by the cases of North Korea and Iran These instances of proliferation raise questions about regional stability the use of pre emptive military action and the potential for reactive proliferation by neighbouring countries Despite the serious implications surrounding the spread of these weapons proliferation scholarship has thus far failed to solve what has been described as the proliferation puzzle why do some countries choose nuclear weapons while others do not The author argues that understanding basic psychological motivations such as the role of power and perceptions of self and others forms a strategic context which provides answers about a leader s willingness to proliferate Proliferation willingness is a critical yet frequently overlooked part of the proliferation equation Ultimately it is the combination of willingness and proliferation opportunity i e technical and scientific capabilities that determines whether a country goes nuclear By examining several historical instances of proliferation decision making in South Africa India Libya and Australia the book s findings highlight the fundamental role of leaders beliefs in shaping proliferation outcomes This book will be of much interest to students of nuclear proliferation political psychology security studies and IR in general
