

The background of the book cover is a deep blue with a subtle, lighter blue grid pattern representing a globe. In the upper left corner, there is a stylized white logo that resembles a bird or a flame. The title and author's name are centered on the cover.

THE INTERNATIONAL POLITICS OF RACE

MICHAEL BANTON

International Politics Of Race

**Alexander Anievas, Nivi
Manchanda, Robbie Shilliam**

International Politics Of Race:

The International Politics of Race Michael Banton, 2002-12-13 In this important and timely new book Michael Banton examines the international politics of racial discrimination and racism The book recounts key events in the international politics of race during the past few decades It discusses the difficulties in defining race and racism provides case studies of international initiatives and national measures against discrimination and reviews the 2001 World Conference Against Racism The idea that humans naturally belong in races derives from a scientific error but it is not easily dispelled from popular thought By relying on this conception of racism the international antiracist movement continually recycles the very idea of race that it condemns In its place the adoption of an international perspective should inspire a powerful critique of the language of race as used in the English speaking world The new language of human rights reformulates the issues in ways that should appeal to everyone Michael Banton's writings over many years have included classical studies of race and ethnicity and have made him one of the best known and respected sociologists of race This book will be a key text for students of the politics and sociology of race international relations and anti discrimination law It is written in a style that will also appeal to the general reader

Understanding International Politics Megan Dee, 2024-03-07 How did today's international systems emerge and how are they shaped by war unequal development and international cooperation How do individuals firms international organisations and nation states operate within these systems How can st

International Politics Scott P. Handler, Robert T. Person, 2020-12-23 Why do states do what they do Who are the relevant nonstate actors in international politics and why do they do what they do What causes conflict and cooperation in the international system These are some of the most basic questions that the discipline of International Relations IR seeks to answer they are also the questions that drive the objectives organization and content of this book International Politics Classic and Contemporary Readings Second Edition seeks to help students engage critically with some of the world's most challenging questions through the use of leading classic and contemporary scholarship in the field of international relations The first five chapters of the book explore the leading theoretical traditions in international relations while subsequent chapters explore the themes of international security international political economy and contemporary challenges in international relations This organization makes the book easy to use as standalone text or alongside core text Class tested on over 10 000 students in the last decade this text was built from the ground up to introduce students to the traditions and new foundations of international relations as well to the principles of intellectually rigorous thought

International Politics Robert J. Art, Timothy W. Crawford, Robert Jervis, 2023-02-06 International Politics Enduring Concepts and Contemporary Issues has been helping students understand the dynamics of international relations for fifty years Readings by leading scholars on essential topics illustrate fundamental debates and differing points of view for a comprehensive and engaging overview of the discipline while introducing readers to the major forces shaping the world today The fourteenth edition continues the book's

cornerstone approach of combining foundational theoretical works with recent perspectives on current problems including a wealth of new material spread across each of the book's four parts. The foundational material is organized to highlight the concept of anarchy in international relations and how matters of security, power, military force, international political economy, and strategic interactions influence patterns of cooperation and conflict. In addition to a focus on basic security and strategic problems, the politics of international commerce and challenges facing the global economy, this edition also covers critical contemporary issues including human rights, civil wars, intervention and peacekeeping, migration, cyber conflict, great power competition, climate change, energy transition, nuclear weapons, pandemic, diplomacy, and changes in the political shape of the system. **Features:** 60 expertly edited readings from scholarly sources with 30 new to this edition. A four-part organization to cover anarchy, the use of force, international political economy, and contemporary issues with an in-depth editor introduction to each Part. An entirely new chapter on the return of great power politics, ever more important after Russia's invasion of Ukraine. Learning objectives and discussion questions to focus student learning.

Lord Hailey, the Colonial Office and Politics of Race and Empire in the Second World War S. Wolton, 2000-06-21. The book studies the Anglo-American debate in which British officials led by Lord Hailey countered American criticisms of imperial rule by emphasizing economic development and peacekeeping as new, non-racial justifications for western authority. These are themes that have retained a powerful resonance in the post-war world.

The Globalization of World Politics John Baylis, Steve Smith, Patricia Owens, 2020. The best-selling introduction to international relations offers the most comprehensive coverage of the key theories and global issues in world politics written by the leading experts in the field.

Race and Racism in International Relations Alexander Anievas, Nivi Manchanda, Robbie Shilliam, 2014-10-30. International Relations as a discipline does not grant race and racism explanatory agency in its conventional analyses despite such issues being integral to the birth of the discipline. *Race and Racism in International Relations* seeks to remedy this oversight by acting as a catalyst for remembering, exposing, and critically re-articulating the central importance of race and racism in International Relations. Focusing especially on the theoretical and political legacy of W. E. B. Du Bois's concept of the colour line, the cutting-edge contributions in this text provide an accessible entry point for both International Relations students and scholars into the literature and debates on race and racism by borrowing insights from disciplines such as history, anthropology, and sociology where race and race theory figures more prominently yet they also suggest that the field of IR is itself an intellectually and strategically important field through which to further confront the global colour line. Drawing together a wide range of contributors, this much-needed text will be essential reading for students and scholars in a range of areas including Postcolonial studies, race, racism in world politics, and international relations theory.

The Eurocentric Conception of World Politics John M. Hobson, 2012-03-29. John Hobson claims that throughout its history, most international theory has been embedded within various forms of Eurocentrism. Rather than producing value-free and universalist theories of inter-

state relations international theory instead provides provincial analyses that celebrate and defend Western civilization as the subject of and ideal normative referent in world politics Hobson also provides a sympathetic critique of Edward Said's conceptions of Eurocentrism and Orientalism revealing how Eurocentrism takes different forms which can be imperialist or anti imperialist and showing how these have played out in international theory since 1760 The book thus speaks to scholars of international relations and also to all those interested in understanding Eurocentrism in the disciplines of political science political theory political economy international political economy geography cultural and literary studies sociology and not least anthropology

Interpreting International Politics Cecelia Lynch, 2013-12-04 Interpreting International Politics addresses each of the major traditional subfields in International Relations International Law and Organization International Security and International Political Economy But how are interpretivist methods and concerns brought to bear on these topics In this slim volume Cecelia Lynch focuses on the philosophy of science and conceptual issues that make work in international relations distinctly interpretive This work both legitimizes and demonstrates the necessity of post and non positivist scholarship Interpretive approaches to the study of international relations span not only the traditional areas of security international political economy and international law and organizations but also emerging and newer areas such as gender race religion secularism and continuing issues of globalization By situating describing and analyzing major interpretive works in each of these fields the book draws out the critical research challenges that are posed by and the progress that is made by interpretive work Furthermore the book also pushes forward interpretive insights to areas that have entered the IR radar screen more recently including race and religion demonstrating how work in these areas can inform all subfields of the discipline and suggesting paths for future research

Arms Races in International Politics Thomas Mahnken, Joseph Maiolo, David Stevenson, 2016-01-14 This volume provides the first comprehensive history of the arms racing phenomenon in modern international politics drawing both on theoretical approaches and on the latest historical research Written by an international team of specialists it is divided into four sections before 1914 the inter war years the Cold War and extra European and post Cold War arms races Twelve case studies examine land and naval armaments before the First World War air land and naval competition during the 1920s and 1930s and nuclear as well as conventional weapons since 1945 Armaments policies are placed within the context of technological development international politics and diplomacy and social politics and economics An extended general introduction and conclusion and introductions to each section provide coherence between the specialized chapters and draw out wider implications for policymakers and for political scientists Arms Races in International Politics addresses two key questions what causes arms races and what is the connection between arms races and the outbreak of wars

Berridge,2014-01-21 A new Edition of this well established introduction to international politics *South Africa, Race and the Making of International Relations* Vineet Thakur,Peter Vale,2020-01-17 This book offers readers an alternative history of the origins of the discipline of International Relations Conventional western histories of the discipline point to 1919 as the year of the birth of the discipline with two seminal initiatives setting up of the first Chair of IR at Aberystwyth and the founding of the Institute of International Relations on the side lines of the Paris Peace Conference From these events International Relations is argued to have been established as a path to create peace in the post War era and facilitated through a scientific study of international affairs International Relations was therefore both a field of study and knowledge production and a plan of action This pathbreaking book challenges these claims by presenting an alternative narrative of International Relations In this book we make three interconnected arguments First we argue that the natal moment in the founding of IR is not World War I as is generally believed but the Anglo Boer War Second we argue that the ideas methods and institutions that led to the making of IR were first thrashed out in South Africa in Johannesburg in fact Finally this South African genealogy of IR we show in the book allows us to properly investigate the emergence of academic IR at the interstices of race Empire and science **Culture in World Politics** Dominique Jacquin-Berdal,Andrew Oros,Marco Verweij,2016-07-27 World politics can be viewed as the patterns of cooperation and conflict between groups of people with different cultural backgrounds Surprisingly though for several decades the topics of culture in international relations has been largely ignored Only recently an increasing interest has re emerged in how world politics is affected by cultures i e by collectively shared perceptions norms and beliefs Culture in World Politics contributes to this development by presenting a variety of ways in which the roles of cultures in world politics can be studied A major aim of the book is to highlight alternative ways of thinking about the effects of culture on international relations and to stimulate discussion on the relative merit of these various approaches The book also shows the relevance of cultural studies for understanding two areas often assumed to be free of cultural influences international violence and the international political economy The contributions not only include insightful theoretical discussions but also show how illuminating empirical analyses can be undertaken with the help of cultural theories *Race and Racism in International Relations* Alexander Anievas,Nivi Manchanda,Robbie Shilliam,2014-10-30 International Relations as a discipline does not grant race and racism explanatory agency in its conventional analyses despite such issues being integral to the birth of the discipline Race and Racism in International Relations seeks to remedy this oversight by acting as a catalyst for remembering exposing and critically re articulating the central importance of race and racism in International Relations Focusing especially on the theoretical and political legacy of W E B Du Bois s concept of the colour line the cutting edge contributions in this text provide an accessible entry point for

both International Relations students and scholars into the literature and debates on race and racism by borrowing insights from disciplines such as history anthropology and sociology where race and race theory figures more prominently yet they also suggest that the field of IR is itself an intellectually and strategic field through which to further confront the global colour line Drawing together a wide range of contributors this much needed text will be essential reading for students and scholars in a range of areas including Postcolonial studies race racism in world politics and international relations theory

The Ideals of Global Sport Barbara J. Keys, 2019-02-15 Sport has the power to change the world South African president Nelson Mandela told the Sporting Club in Monte Carlo in 2000 Today we are inundated with similar claims from politicians diplomats intellectuals journalists athletes and fans about the many ways that international sports competitions make the world a better place Promoters of the Olympic Games and similar global sports events have spent more than a century telling us that these festivals offer a multitude of goods that they foster friendship and mutual understanding among peoples and nations promote peace combat racism and spread democracy In recent years boosters have suggested that sports mega events can advance environmental protection in a world threatened by climate change stimulate economic growth and reduce poverty in developing nations and promote human rights in repressive countries If the claims are to be believed sport is the most powerful and effective form of idealistic internationalism on the planet *The Ideals of Global Sport* investigates these grandiose claims peeling away the hype to reveal the reality that shockingly little evidence underpins these endlessly repeated assertions The essays written by scholars from many regions and disciplines and drawn from an exceptionally diverse array of sources show that these bold claims were sometimes cleverly leveraged by activist groups to pressure sports bodies into supporting moral causes But the essays methodically debunk sports organizations inflated proclamations about the record of their contributions to peace mutual understanding antiracism and democracy Exposing enduring shortcomings in the newer realm of human rights protection from the 1980 Moscow Olympic Games to Brazil's 2014 World Cup and the 2016 Rio Olympics *The Ideals of Global Sport* suggests that sport's idealistic pretensions can have distinctly non idealistic side effects distracting from the staggering financial costs of hosting the events serving corporate interests and aiding the spread of neoliberal globalization Contributors Jules Boykoff Susan Brownell Roland Burke Simon Creak Dmitry Dubrovsky Joon Seok Hong Barbara J Keys Renate Nagamine Jo o Roriz Robert Skinner *Rational Theory of International Politics* Charles L. Glaser, 2010-04-26 Within the realist school of international relations a prevailing view holds that the anarchic structure of the international system invariably forces the great powers to seek security at one another's expense dooming even peaceful nations to an unrelenting struggle for power and dominance *Rational Theory of International Politics* offers a more nuanced alternative to this view one that provides answers to the most fundamental and pressing questions of international relations Why do states sometimes compete and wage war while at other times they cooperate and pursue peace Does competition reflect pressures generated by the anarchic international system or rather states own expansionist

goals Are the United States and China on a collision course to war or is continued coexistence possible Is peace in the Middle East even feasible Charles Glaser puts forward a major new theory of international politics that identifies three kinds of variables that influence a state s strategy the state s motives specifically whether it is motivated by security concerns or greed material variables which determine its military capabilities and information variables most importantly what the state knows about its adversary s motives Rational Theory of International Politics demonstrates that variation in motives can be key to the choice of strategy that the international environment sometimes favors cooperation over competition and that information variables can be as important as material variables in determining the strategy a state should choose

Emergence of Africa in International Politics Taufiq Ahmad Nizami,1993 Contributed articles **Culture and Context in World Politics** Stephanie Lawson,2006-09-05 This wide ranging historically informed study examines the career of the culture concept and related notions of context in comparative and international politics tracing connections through the disciplines of anthropology and history as well as through issues in nationalism and democracy
