Provided by publisher **Implementing the Climate Regime** Olav Schram Stokke, 2013-06-17 Global warming is the most severe environmental challenge faced by humanity today and the costs of responding effectively will be high While Russia s ratification of the Kyoto Protocol ensures the treaty s entry into force lack of capacity or incentives to renege on their commitments will impede mitigation efforts in many countries An important prerequisite for the proper functioning of the Protocol is that its compliance system which is spelled out by the Marrakesh Accords proves effective Implementing the Climate Regime describes and analyses Kyoto s compliance system Organized into four parts Part I describes the emergence

and design of the compliance system while Part II analyses various challenges to its effective operation such as the development of norms verification and the danger that the use of punitive consequences may also hurt compliant countries Part III discusses the potential role of external enforcement with particular emphasis on trade sanctions Part IV addresses the relationship between Kyoto compliance on one hand and international governance oil companies and green NGOs on the other

Contesting Global Environmental Knowledge, Norms and Governance M. J. Peterson, 2019-01-08 Through theoretical discussions and case studies this volume explores how processes of contestation about knowledge norms and governance processes shape efforts to promote sustainability through international environmental governance The epistemic communities literature of the 1990s highlighted the importance of expert consensus on scientific knowledge for problem definition and solution specification in international environmental agreements This book addresses a gap in this literature insufficient attention to the multiple forms of contestation that also inform international environmental governance These forms include within discipline contestation that helps forge expert consensus inter disciplinary contestation regarding the types of expert knowledge needed for effective response to environmental problems normative and practical arguments about the proper roles of experts and laypersons and contestation over how to combine globally developed norms and scientific knowledge with locally prevalent norms and traditional knowledge in ways ensuring effective implementation of environmental policies This collection advances understanding of the conditions under which contestation facilitates or hinders the development of effective global environmental governance The contributors examine how attempts to incorporate more than one stream of expert knowledge and to include lay knowledge alongside it have played out in efforts to create and maintain multilateral agreements relating to environmental concerns It will interest scholars and graduate students of political science global governance international environmental politics and global policy making Policy analysts should also find it useful

Wspc Reference On Natural Resources And Environmental Policy In The Era Of Global Change, The (In 4 Volumes) , 2016-10-21 The WSPC Reference on Natural Resources and Environmental Policy in the Era of Global Change provides a comprehensive and prominent reference of various highly authoritative volumes of long term scientific value for milestone concepts and theories The books in the reference set are edited by leading experts in the fields of Game Theory International Relations and Global Politics Computable General Equilibrium CGE Economy Wide Modeling and Experimental Economics Each book in the reference set includes chapters that are laid out by recognized broadly respected researchers in fields associated with issues related to natural resources and environmental policy in the era of global change The reference set focuses on the economic and strategic aspects of interactions among various parts of society all dependent on the availability and utilization of limited natural resources and their impact on the environment Policy implications are addressed including current challenges and future perspectives The combination of the four books provides a unique perspective on the issues that engage the public discourse of researchers and policy makers at state regional and global levels Each of the books

in the reference set and all four books as a whole provide coverage of disciplines and angles through which the reader can obtain an understanding of the state of the art of dealing with natural resources and environmental policy in the era of global change The books in the reference set complement each other and provide a scientific understanding of our ability to address the issues covered Arctic Governance: Volume 3 Geir Hønneland, Ida Folkestad Soltvedt, Svein Vigeland

Rottem, 2019-12-04 The Polar North is known to be home to large gas and oil reserves and its position holds significant trading and military advantages yet the maritime boundaries of the region remain ill defined In the twenty first century the Arctic is undergoing profound change As the sea ice melts a result of accelerating climate change global governance has become vital In this the third of three volumes the latest research and analysis from the world s leading Arctic research body the Fridtjof Nansen Institute is brought together for the first time Arctic Governance Norway Russia and Asia investigates the foreign policy discourses of Arctic governance specifically as regarding international relations and competing interests between Norway Russia and various Asian states Studies in International Relations and Politics William T.

Bagatelas, Getnet Tamene, David Reichardt, Bruno Sergi, 2010-10-28 The book represents a major examination regarding the current practice of international relations and world politics It analyzes the international relations of large medium and smaller sized actors and how they influence the larger dynamics and ebb and flow of the international system While assessing the perspectives of 21st century international systems it also examines how relations between actors may improve or worsen surely the most timely issue presently facing global and relational politics Through globalization the concept of a more balanced version of the American Dream has extended worldwide Irrespective of wealth or poverty globalization s promise of prosperity has been adopted eagerly despite uneven progress along the way Together with the larger realities of Neo Liberal thinking and influence where global and cyber markets have evolved with little supervision we have seen a move from enlightened self interest to the reality of pure self interest This book addresses the larger ethical implications of this global trend **Governing the Air** Rolf Lidskog, Goran Sundqvist, 2011-10-28 Experts offer theoretical and empirical

analyses that view the regulation of transboundary air pollution as a dynamic process Governing the Air looks at the regulation of air pollution not as a static procedure of enactment and agreement but as a dynamic process that reflects the shifting interrelationships of science policy and citizens Taking transboundary air pollution in Europe as its empirical focus the book not only assesses the particular regulation strategies that have evolved to govern European air but also offers theoretical insights into dynamics of social order political negotiation and scientific practices These dynamics are of pivotal concern today in light of emerging international governance problems related to climate change The contributors all prominent social scientists specializing in international environmental governance review earlier findings analyze the current situation and discuss future directions for both empirical and theoretical work The chapters discuss the institutional dimensions of international efforts to combat air pollution examining the effectiveness of CLRTAP Convention for Long Range

Transboundary Air Pollution and the political complexity of the European Union offer a broad overview and detailed case studies of the roles of science expertise and learning and examine the missing link in air pollution policies citizen involvement Changing political conditions evolving scientific knowledge and the need for citizen engagement offer significant challenges for air pollution policy making By focusing on process rather than product learning rather than knowledge and strategies rather than interests this book gives a nuanced view of how air pollution is made governable **EU Emissions**

Trading Jon Birger Skjærseth, Jørgen Wettestad, 2016-04-22 The EU Emissions Trading Scheme EU ETS has been characterized as one of the most far reaching and radical environmental policies for many years Given the EU's earlier resistance to this market based and US flavoured programme the development and implementation of the EU ETS has been rapid This novel approach to environmental regulation has the potential to affect not only greenhouse gas emissions in the EU but also international strategies for climate change protection This book investigates the origins evolution and consequences of the EU ETS and offers significant contributions to the literatures on climate policy and EU policy making

Biodiversity and the Precautionary Principle Rosie Cooney, Barney Dickson, Fauna Flora International, 2012-05-16 Great uncertainty typically surrounds decisions and management actions in the conservation of biodiversity and natural resource management and yet there are risks of serious and irreversible harm for both biodiversity and the humans that rely on it The precautionary principle arguably underlies all international conservation efforts and promotes acting to avoid serious or irreversible environmental harm despite lack of scientific certainty as to the likelihood magnitude or cause of harm This book is the first to examine the application of the precautionary principle to biodiversity conservation and natural resource management incorporating perspectives from scientists economists lawyers and practitioners from both developing and developed countries It analyses the application and impacts of the principle in many areas including forestry invasive alien species wildlife trade protected areas and fisheries in a range of national and international contexts Particular attention is drawn to issues of equity livelihoods science and politics and the book provides guidelines for applying the precautionary principle to biodiversity conservation and natural resource management **International Norm Disputes** Lisbeth

Zimmermann, Nicole Deitelhoff, Max Lesch, Antonio Arcudi, Anton Peez, 2023 This volume offers a study of when and why contested international norms decline It includes four contemporary case studies the torture prohibition the responsibility to protect the duty to prosecute institutionalized in the ICC and commercial whaling and two historical case studies privateering and the transatlantic slave trade **International Environmental Agreements** Steinar Andresen, Elin

Boasson, Geir Hønneland, 2012-03-12 International environmental agreements provide a practical basis for countries to address environmental issues on a global scale This book explores the workings and outcomes of these agreements and analyses key questions of why some problems are dealt with successfully and others ignored By examining fundamental policies and issues in environmental protection this text gives an easily comprehensible introduction to international

environmental agreements and discusses problems in three areas air water and on land It traces the history of agreements in broad thematic areas related to long distance air pollution ozone depleting and greenhouse gases ocean management biological diversity agricultural plant diversity and forest stewardship Drawing on experts in their respective fields this book provides an insightful evaluation of the successes and failures and analysis of the reasons for this Concluding with an insightful examination of research to show how performance of agreements can be improved in the future this volume is a vital contribution to our understanding of the politics associated with establishing international environmental consensus International Environmental Agreements will be of interest to scholars students and researchers in global environmental politics international relations and political science Steinar Andresen is Senior Research Fellow at the Fridtjof Nansen Institute Norway and formerly professor at the Dept of Political Science University of Oslo Elin Lerum Boasson is Research Fellow at the Fridtjof Nansen Institute Norway Geir H nneland is Research Director at the Fridtjof Nansen Institute and adjunct professor at the University of Troms

Historical Dictionary of the Green Movement Miranda Schreurs,Elim Papadakis,2020-02-26 There are very serious environmental problems facing the planet Biodiversity loss has reached unprecedented levels Climate change is progressing so rapidly that within this century we are likely to see substantial sea level rise There has been dramatic loss of tropical rainforests Plastic pollution is killing wildlife and polluting our oceans Various movements old and new are addressing these green issues Civil society activism has taken on new strategies with the emergence of new technologies and global networks of green activists have formed A new generation of green activists are emerging and boldly criticizing the status quo At the same time in some parts of the world green movements that looked like they were beginning to gain a political foothold or were even doing quite well are in retreat The reasons are complex Some suffer from lack of funding and hostile political and legal environments Others are being attacked by populist politicians who see green activism as a threat The second edition of Historical Dictionary of the Green Movement contains a chronology an introduction and an extensive bibliography The dictionary section has over 300 cross referenced on green movements green politics green trends and major environmental agreements and events This book is an excellent resource for students researchers and anyone wanting to know more about the green movement

Routledge Handbook of National and Regional Ocean Policies Biliانا Cicin-Sain,David Vanderzwaag,Miriam C. Balgos,2015-05-15 This comprehensive handbook prepared by leading ocean policy academics and practitioners from around the world presents in depth analyses of the experiences of fifteen developed and developing nations and four key regions of the world that have taken concrete steps toward cross cutting and integrated national and regional ocean policy All chapters follow a common framework for policy analysis While most coastal nations of the world already have a variety of sectoral policies in place to manage different uses of the ocean such as shipping fishing oil and gas development in the last two decades the coastal nations covered in the book have undertaken concerted efforts to articulate and implement an integrated ecosystem based

vision for the governance of ocean areas under their jurisdiction This includes goals and procedures to harmonize existing uses and laws to foster sustainable development of ocean areas to protect biodiversity and vulnerable resources and ecosystems and to coordinate the actions of the many government agencies that are typically involved in oceans affairs The book highlights the serious conflicts of use in most national ocean zones and the varying attempts by nations to follow the prescriptions emanating from the 1982 UN Law of the Sea Convention and the outcomes of the 1992 2002 and 2012 sustainable development summits The interrelationship among uses and processes in the coast and ocean requires that ocean governance be integrated precautionary and anticipatory Overall the book provides a definitive state of the art review and analysis of national and regional ocean policies around the world

NGO Diplomacy Michele M. Betsill, Elisabeth Corell, 2007-10-05 Provides an analytical framework for assessing the impact of NGOs on intergovernmental negotiations on the environment and identifying the factors that determine the degree of NGO influence with case studies that apply the framework to negotiations on climate change biosafety desertification whaling and forests Over the past thirty years nongovernmental organizations NGOs have played an increasingly influential role in international negotiations particularly on environmental issues NGO diplomacy has become in the words of one organizer an international experiment in democratizing intergovernmental decision making But there has been little attempt to determine the conditions under which NGOs make a difference in either the process or the outcome of international negotiations This book presents an analytic framework for the systematic and comparative study of NGO diplomacy in international environmental negotiations Chapters by experts on international environmental policy apply this framework to assess the effect of NGO diplomacy on specific negotiations on environmental and sustainability issues The proposed analytical framework offers researchers the tools with which to assess whether and how NGO diplomats affect negotiation processes outcomes or both and through comparative analysis the book identifies factors that explain variation in NGO influence including coordination of strategy degree of access institutional overlap and alliances with key states The empirical chapters use the framework to evaluate the degree of NGO influence on the first phase of the Kyoto Protocol negotiations on global climate change the Cartagena Protocol on Biosafety the United Nations Convention to Combat Desertification negotiations within the International Whaling Commission that resulted in new management procedures and a ban on commercial whaling and international negotiations on forests involving the United Nations the International Tropical Timber Organization and the World Trade Organization Contributors Steinar Andresen Michele M Betsill Stanley W Burgiel Elisabeth Corell David Humphreys Tora Skodvin

Small State Status Seeking Benjamin de Carvalho, Iver B Neumann, 2014-09-15 Status seeking is an important aspect of the foreign policies of a number of small states but one that has been rarely studied This book aims to contribute to our understanding not only of status seeking by coming at that question from a new angle that of a small state but also to our understanding of foreign policy by discussing the importance of status for foreign policy overall If status is a hierarchy then it

is important to focus not just on the highest ranking powers but also those at lower levels As the distribution of power is becoming more diffuse the role of small and medium powers becomes more significant than it was during the Cold war The book chapters go beyond familiar explications of soft power or conflict resolution to highlight new aspects of Norway s foreign policy including contributions to national defense global warming and management of Arctic resources This book will be of interest to students and scholars in areas including US Foreign Policy International Relations and European Politics

The A to Z of the Green Movement Miranda Schreurs,Elim Papadakis,2009-09-21 Human beings have been concerned about nature and their place in it for millennia Disquiet about the consequences of human action on the natural environment date back to the ancient Greeks and Romans The efforts of the green movement can be traced back to the 19th century In this period individuals groups and organizations began campaigning for the conservation and preservation of natural areas and the protection of wildlife species Efforts to combat pollution also began It was not until the 1960s however that the green movement in its more modern incarnation emerged The green movements that arose at this time maintained the concerns with conservation preservation and industrial pollution held by earlier generations but added to their agenda new issues including justice equality participatory democracy and sustainability The A to Z of the Green Movement provides a detailed and comprehensive overview of green parties and movements green issues and green concepts This is done through a chronology an introductory essay a bibliography and hundreds of cross referenced dictionary entries on countries in the world where green parties or proto parties have formed green movement organizations major international environmental conferences and green concepts This useful reference will be greatly valued by students academics journalists and policymakers alike

European Environmental Policy Mikael Skou Andersen,Duncan Liefferink,1997 This major new literary study offers a fresh view of the significance of the famous group of fourteenth century poems Pearl Cleanness Patience and Sir Gawain and the Green Knight It is a comprehensive study which puts the poems themselves firmly at its centre though it is always alert to relevant aspects of their literary and cultural context John Anderson builds his discussions of the poems ideas on an examination of the anonymous poet s superb Shakespeare like language He finds that the great fourteenth century struggle between religious and secular forces for control of men s minds underlies all the poems This title is the first in the new Manchester Medieval Literature series which makes readability a priority Accordingly despite its wide range of reference and the radicalism of some of its leading ideas this book is written in a jargon free style designed to appeal to specialist non specialist and student readers alike
