International Relations In Contemporary Africa:

International Relations in Contemporary Africa Michael O. Anda, 2000 Although developing countries far outnumber fully industrialized states they are often neglected in the study of international relations especially with respect to the development of foreign policy theory International Relations in Contemporary Africa attempts to fill this void in the literature on comparative international relations while at the same time providing a detailed analysis of the economic development and integration of West African countries Michael Anda specifically focuses on the members of the Economic Community of West African States ECOWAS and their policies which encourage coordination on issues ranging from science and technology to diplomacy and mutual defense Tracing the diplomatic history of West Africa from independence to the present he assesses the various dimensions of cooperation among the smaller and less developed states of West Africa while revealing the precarious nature of the economy and security in the region Both detailed and comprehensive International Relations in Contemporary Africa represents a significant contribution to African studies that appeal to those with an interest in the foreign policy of smaller states

Themes and Perspectives on Contemporary Africa's International Relations Fred Agwu, 2013

The Dynamics of Economic and Political Relations Between Africa and Foreign Powers Tukumbi Lumumba-Kasongo, 1999-01-30 International relations at large and Africa's in particular are shaped by the actors historical location by what they offer economically and culturally and by who they are socially In international relations nations tend to deal with objective conditions as they are or as they are perceived However Lumumba Kasongo demonstrates through case studies of Liberia and Zaire Congo that what the objective conditions are may not necessarily be what they ought to be in the national development process The international struggle for power between the West and the East and their supportive brutal and oppressive states in the South especially in Africa created the extremely weak conditions that redefined international relations as the tools of domination rather than the tools of understanding and cooperation As Lumumba Kasongo clarifies Africa did not gain economically or developmentally from this struggle An important work for scholars and researchers of contemporary Africa and international relations in general

Africa's Challenge to International Relations Theory K. Dunn, T. Shaw, 2001-02-20 Africa has been noticeably absent in international relations theory This new collection of essays by contemporary Africanists convincingly demonstrates the importance of the continent to every theoretical approach in international relations This collection breaks new ground in how we think about both international relations and Africa re examining such foundational concepts as sovereignty the state and power critically investigating the salience of realism neo liberalism liberalism in Africa and providing new thinking about regionalism security and identity

Contemporary Africa and the Foreseeable World Order Gilad Ben-Nun, Cristina D'Alessandro, Zach Levey, Francis Onditi, 2019-04-10 Contemporary Africa and the Foreseeable World Order sheds light on the place of Africa Agency in the competitive and changing global system This book provides scholars policymakers and other stakeholders studying and working on African

issues with innovative solutions strategies knowledge insights case studies and analyses to support decision making on how best African states should position themselves in the dynamic global system in order to influence key decisions Featuring themes such as the African Union AU and the consequences of the discovery of oil in the non traditional oil exporting countries the editors and contributors have demonstrated why and how Africa s position in the foreseeable world order is largely dependent on the influence of both existing and emerging world powers *Handbook of Africa's International Relations* Tim Murithi, 2013-09-05 Africa s international relations have often been defined and oriented by the dominant international and geopolitical agendas of the day In the aftermath of colonialism the Cold War became a dominant paradigm that defined the nature of the continent s relationship with the rest of the world The contemporary forces of globalization are now exerting an undue influence and impact upon Africa s international relations Increasingly the African continent is emerging as a vocal and in some respects an influential actor in international relations There is a paucity of analysis and research on this emerging trend This timely book proposes to fill this analytical gap by engaging with a wide range of issues with chapters written by experts on a variety of themes The emerging political prominence of the African continent on the world stage is predicated on an evolving internal process of continental integration In particular there are normative and policy efforts to revive the spirit of Pan Africanism the 21st century is witnessing the evolution of Pan Africanism notably through the constitution and establishment of the African Union AU Given the fact that there is a dearth of analysis on this phenomenon this volume will also interrogate the notion of Pan Africanism through various lenses notably peace and security development the environment and trade The volume will also engage with the emerging role of the AU as an international actor e g with regard to its role in the reform of the United Nations Security Council climate change the International Criminal Court ICC the treaty establishing Africa as a nuclear free zone Internally Displaced Persons the Millennium Development Goals MDGs international trade the environment public health issues security and development issues This book will assess how the AU s role as an international actor is complicated by the difficulty of promoting consensus among African states and then maintaining that consensus in the face of often divergent national interests This book will in part assess the role of the AU in articulating collective and joint policies and in making interventions in international decision and policy making circles The Handbook will also assess the role of African social movements and their relationship with global actors The role of African citizens in ameliorating their own conditions is often underplayed in the international relations discourse and this volume will seek to redress this oversight Throughout the book the various chapters will also assess the role that these citizen linkages have contributed towards continental integration and in confronting the challenges of globalization **African International Relations** Mark W. DeLancey, 2019-03-13 African International Relations is a thoroughly revised and updated bibliography that contains annotated entries for international books and journal articles in the field of African international relations *External Research* United States. Department of State.

External Research Division, United States. Department of State. Office of Intelligence Research, 1968 **Environmental Politics and Liberation in Contemporary Africa** M.A. Salih, 2013-03-14 Nowadays the environment looms large in the analysis of conflict in developing societies and the precise role it plays is the subject of an ongoing debate The debate has moved on from the earlier but still popular notions of power struggles class struggles and ethnic conflicts to a perception of conflict as the product of intense group competition for resources Where the state controls the distribution of resources itself inevitably becomes party to conflicts whose bone of contention is access to state power as the most efficient means of gaining access to resources The resources in question are social health education transportation communication recreation etc and material land water housing jobs contracts licenses permits etc In parts of the world and especially in Africa diminishing resources and authoritarian state rule exacerbate group competition leading to political confrontation This is the line I have followed in analysing conflict in the Horn of Africa Markakis 1987 1998 Mohamed Salih's first contribution in this volume is to move the debate a step beyond this line which can be criticized as unduly materialist He does it by bringing culture into the realm of resources not only as a resource in itself but also as the agency that assigns natural resources their value Culture thus becomes a contextual element in conflict over resources whose value is culturally determined *Politics and Society in Contemporary Africa* Naomi Chazan, 1999 The new edition of this text includes entirely new chapters on political economy and South Africa and has been thoroughly revised throughout to reflect the major changes in Africa and in the wider world since the end of the Cold War The book seeks to improve our understanding of the multiple forces at work on the continent Globalization and Emerging Trends in African States' Foreign Policy-Making Process Rok Ajulu, 2018-02-05 This title was first published in 2002 The resurgence of the democratization movement in Africa in the post Cold War era is gradually replacing authoritarianism with forms of democratic systems These changes have put into question the traditional big man image of African states foreign policy and foreign policy making The first book of its kind to focus on the foreign policy making process of Southern African countries in the era of globalization these instructive and rewarding case studies contextualize the increasing involvement of other internal actors in African states foreign policy making process Foreign policy actors such as the Presidency Ministries of Defence Foreign Affairs Trade Finance and the Intelligence Community among others are examined in a comparative perspective Issues of Governance, Security, and Development in Contemporary Africa Mohamed Saliou Camara, Alem Hailu, Sabella O. Abidde, 2023-12-15 Governance security and development are three critical components of a dialectical nexus that is both dominant and determinant for any objective and fruitful quest for the understanding of the trajectory of a country a region or in the case of Africa a continent from a colonial past to a neocolonial and meta colonial present and toward a future of strategic optimal independence and self reliance That colonial past and the ensuing neocolonial and meta colonial present have made these critical components and the dialectical nexus that they form particularly challenging for the African continent For this reason Issues of Governance Security and

Development in Contemporary Africa offers an in depth interdisciplinary analysis of the challenges that contemporary Africa faces within these critical areas as well as the resources and prospects that the continent possesses and can leverage to overcome the said challenges Using case studies involving a range of countries across the continent Mohamed Saliou Camara Alem Hailu and Sabella O Abidde argue that Africa needs to decolonize the terms of reference that guide its nation building statecraft and national development agenda in ways that will facilitate the establishment of viable systems of governance and security and the promotion of genuine development *External Research List* ,1968 *African Frontiers* John Idriss Lahai,Tanya Lyons,2016-03-23 Through a multidisciplinary approach African Frontiers counters the superficial Eurocentric and gender insensitive dominant discursive representation of Africa within the discourse of war and conflict management and security and peace nation building The chapters historicize and theorize the realities in postcolonial African states and the ramifications on the continents future Situating the study within the context of the prevailing cultural and geo political realities in the postcolonial African states the chapters illustrate the complex ways in which events and processes are experienced at the local level and how these local realities in turn impact and shape the patterns of political and military engagement in Africa and beyond Organized along three major themes Insurgency governance and peacebuilding expert researchers from around the world contribute chapters on Rebel and insurgent formations such as the RUF the LRA and Boko Haram state governance and corruption terrorism and counter terrorism security and peacebuilding focussing on the tensions and challenges facing post conflict societies such as Sierra Leone Rwanda and the newest nation state on the continent South Sudan This highly significant and topical study problematizes the impact of wars on African nations as well as the epistemological framing of the local realities and fallouts of armed conflict on post colonial states **Critical Perspectives on the Responsibility to Protect** Philip Cunliffe,2011-03-31 This edited volume critically examines the widely supported doctrine of the Responsibility to Protect and investigates the claim that it embodies progressive values in international politics Since the United Nations World Summit of 2005 a remarkable consensus has emerged in support of the doctrine of the responsibility to protect R2P the idea that states and the international community bear a joint duty to protect peoples around the world from mass atrocities While there has been plenty of discussion over how this doctrine can best be implemented there has been no systematic criticism of the principles underlying R2P This volume is the first critically to interrogate both the theoretical principles and the policy consequences of this doctrine The authors in this collection argue that the doctrine of R2P does not in fact embody progressive values and they explore the possibility that the R2P may undermine political accountability within states and international peace between them This volume not only advances a novel set of arguments but will also spur debate by offering views that are seldom heard in discussions of R2P The aim of the volume is to bring a range of criticisms to bear from a variety of disciplinary perspectives including international law political science IR theory and security studies This book will be of much interest to students of the Responsibility to Protect

humanitarian intervention human security critical security studies and IR in general Researching Peacebuilding in Africa Ismail Rashid, Amy Niang, 2020-11-29 This book examines the multifaceted nature of conflict and the importance of the socio economic and political contexts of conflict and violence and shows how to support ongoing initiatives and programs to build sustainable peace on the African continent Drawing on a range of conceptual framings in the study of peace and conflict from gender perspectives to institutionalist to decolonial perspectives the contributors show how peacebuilding research covers a whole range of questions that go beyond concerns for post conflict reconstruction strategies Chapters focus on the methodological theoretical and practical aspects of peacebuilding and provide a toolbox of perspectives for conceptualizing and doing peacebuilding research in Africa Anchored in African centered perspectives the book encourages and promotes high quality interdisciplinary research that is conflict sensitive historically informed theoretically grounded and analytically sound This book will be of benefit to scholars policy makers and research institutions engaged in peacebuilding in Africa

Decolonizing International Relations Branwen Gruffydd Jones, 2006-09-20 The discipline of International Relations IR is concerned with the powerful states and actors in the global political economy and dominated by North American and European scholars This book exposes the ways in which IR has consistently ignored questions of colonialism imperialism race slavery and dispossession in the non European world **External Research. New Regionalism and Asylum Seekers Susan Kneebone, Felicity Rawlings-Sanaei, 2007 Includes statistical tables **Black Death: AIDS in Africa** Susan Hunter, 2015-06-02 To the surprise of many George W Bush pledged 10 billion to combat AIDS in developing nations Noted specialist Susan Hunter tells the untold story of AIDS in Africa home to 80 percent of the 40 million people in the world currently infected with HIV She weaves together the history of colonialism in Africa an insider's take on the reluctance of drug companies to provide cheap medication and vaccines in poor countries and personal anecdotes from the 20 years she spent in Africa working on the AIDS crisis Taken together these strands make it unmistakably clear that a history of the exploitation of developing nations by the West is directly responsible for the spread of disease in developing nations and the AIDS pandemic in Africa Hunter looks at what Africans are already doing on the ground level to combat AIDS and what the world can and must do to help Accessibly written and hard hitting Black Death brings the staggering statistics to life and paints for the first time a stunning picture of the most important political issue today
