## **International Symposium On Databases In Paral:**

**High-Performance Parallel Database Processing and Grid Databases** David Taniar, Clement H. C. Leung, Wenny Rahayu, Sushant Goel, 2008-09-17 The latest techniques and principles of parallel and grid database processing The growth in grid databases coupled with the utility of parallel query processing presents an important opportunity to understand and utilize high performance parallel database processing within a major database management system DBMS This important new book provides readers with a fundamental understanding of parallelism in data intensive applications and demonstrates how to develop faster capabilities to support them It presents a balanced treatment of the theoretical and practical aspects of high performance databases to demonstrate how parallel query is executed in a DBMS including concepts algorithms analytical models and grid transactions High Performance Parallel Database Processing and Grid Databases serves as a valuable resource for researchers working in parallel databases and for practitioners interested in building a high performance database It is also a much needed self contained textbook for database courses at the advanced undergraduate and graduate levels

**Parallel Database Systems** Pierre America, 1991-06-26 This volume presents the proceedings of a workshop on parallel database systems organized by the PRISMA Parallel Inference and Storage Machine project The invited contributions by internationally recognized experts give a thorough survey of several aspects of parallel database systems The second part of the volume gives an in depth overview of the PRISMA system This system is based on a parallel machine where the individual processors each have their own local memory and communicate with each other over a packet switched network On this machine a parallel object oriented programming language POOL X has been implemented which provides dedicated support for database systems as well as general facilities for parallel programming The POOL X system then serves as a platform for a complete relational main memory database management system which uses the parallelism of the machine to speed up significantly the execution of database queries The presentation of the PRISMA system together with the invited papers gives a broad overview of the state of the art in parallel database systems

*1999 International Symposium on Database Applications in Non-Traditional Environments (DANTE '99)* Y. Kambayashi, Hiroki Takakura, 2000 Annotation This collection of 60 papers presented at the November 1999 symposium provides research results on non traditional databases such as Internet related technologies handling of various kinds of data supporting technologies for virtual organization data models system technologies and applications Topics include temporal issues in data warehouse systems a semantic caching method based on linear constraints multimedia document support inside the AHYDS platform interacting with topological invariants of spatial databases spatio temporal levels of detail LoD for browsing video databases and similarity retrieval of human motion as multi stream time series data No subject index Annotation copyrighted by Book News Inc Portland OR

Tjoa, 2003-07-31 The Database and Expert Systems Applications DEXA conferences bring together researchers and practitioners from all over the world to exchange ideas experiences and opinions in a friendly and stimulating environment The papers are at once a record of what has been achieved and the first steps towards shaping the future of information systems DEXA covers a broad field and all aspects of database knowledge base and related technologies and their applications are represented Once again there were a good number of submissions 241 papers were submitted and of these the programme committee selected 103 to be presented DEXA 99 took place in Florence and was the tenth conference in the series following events in Vienna Berlin Valencia Prague Athens London Zurich Toulouse and Vienna The decade has seen many developments in the areas covered by DEXA developments in which DEXA has played its part I would like to express thanks to all the institutions which have actively supported and made possible this conference namely University of Florence Italy IDG CNR Italy FAW University of Linz Austria Austrian Computer Society DEXA Association In addition we must thank all the people who have contributed their time and effort to make the conference possible Special thanks go to Maria Schweikert Technical University of Vienna M Neubauer and G Wagner FAW University of Linz We must also thank all the members of the programme committee whose careful reviews are important to the quality of the conference

**Handbook of Research on Innovations in Database Technologies and Applications: Current and Future Trends** Ferragine, Viviana E., Doorn, Jorge Horacio, Rivero, Laura C., 2009-02-28 This book provides a wide compendium of references to topics in the field of the databases systems and applications Provided by publisher

Intelligent Information and Database Systems Jeng-Shyang Pan, Shyi-Ming Chen, Ngoc Thanh Nguyen, 2012-03-02 The three volume set LNAI 7196 LNAI 7197 and LNAI 7198 constitutes the refereed proceedings of the 4th Asian Conference on Intelligent Information and Database Systems ACIIDS 2012 held in Kaohsiung Taiwan in March 2012 The 161 revised papers presented were carefully reviewed and selected from more than 472 submissions The papers included cover the following topics intelligent database systems data warehouses and data mining natural language processing and computational linguistics semantic Web social networks and recommendation systems collaborative systems and applications e business and e commerce systems e learning systems information modeling and requirements engineering information retrieval systems intelligent agents and multi agent systems intelligent information systems intelligent internet systems intelligent optimization techniques object relational DBMS ontologies and knowledge sharing semi structured and XML database systems unified modeling language and unified processes Web services and semantic Web computer networks and communication systems

Massively Parallel Processing Applications and Development L. Dekker, W. Smit, J.C. Zuidervart, 2013-10-22 The contributions of a diverse selection of international hardware and software specialists are assimilated in this book s exploration of the development of massively parallel processing MPP The emphasis is placed on industrial applications and collaboration with users and suppliers from within the industrial community consolidates the scope of the publication From a practical point of view massively parallel

data processing is a vital step to further innovation in all areas where large amounts of data must be processed in parallel or in a distributed manner e g fluid dynamics meteorology seismics molecular engineering image processing parallel data base processing MPP technology can make the speed of computation higher and substantially reduce the computational costs However to achieve these features the MPP software has to be developed further to create user friendly programming systems and to become transparent for present day computer software Application of novel electro optic components and devices is continuing and will be a key for much more general and powerful architectures Vanishing of communication hardware limitations will result in the elimination of programming bottlenecks in parallel data processing Standardization of the functional characteristics of a programming model of massively parallel computers will become established Then efficient programming environments can be developed The result will be a widespread use of massively parallel processing systems in many areas of application

**Database Systems For Advanced Applications '95 - Proceedings Of The Fourth International Conference** Wang Ling Tok,Yoshifumi Masunaga,1995-03-31 This volume contains three keynote papers and 51 technical papers from contributors around the world on topics in the research and development of database systems such as Data Modelling Object Oriented Databases Active Databases Data Mining Heterogeneous Databases Distributed Databases Parallel Query Processing Multi Media Databases Transaction Management Systems Document Databases Temporal Databases Deductive Databases User Interface and Advanced Database Applications Database and XML
