Kenen,2008-07-10 The nine papers in this volume were written for a conference on research in international trade and finance held at Princeton University in March 1973 Each author was asked to survey research on one major topic with a view to answering three questions What have we learned from recent empirical research What are the major gaps in present knowledge How should we go about filling those gaps When answering the second question authors were urged to look at the practical requirements of those who must make policy concerning the international economy and at the opportunities and insights offered by recent developments in pure theory When answering the third they were urged to look at developments in econometric technique newly available data and work in progress in related fields *Regional Policy* Norbert

Vanhove,2018-09-05 First published in 1999 this volume combines the theory and practice of regional economic policy in Europe Six main topics are covered as follows theory of regional economic development and policy Regional policy at the national level Regional disparities in the EU past and present Impact of the integration on regions Regional policy in the EU 1975 1999 The structural funds 2000 2006 and openness to Eastern European countries The book also includes an up to date bibliography on the topic covered **Growth, Structural Change and Regional Inequality in Malaysia** Asan Ali Golam

Hassan,2017-11-30 Economic development in the long run is seen as a process of structural change that is affected by economic growth Malaysia is one of the middle income economies that are going through rapid structural change Since the mid 1980s it has changed to an industrially based economy with large scale export of electrical and electronic components However thirty years after Malaysia's redistributive policies have been exercised regional inequality still exists This book examines the nature and impact of regional policies in relation to the patterns of demographic and economic structural change and in relation to growth distribution and income disparities across regions in Peninsular Malaysia The book also explores the degree to which differences in regional manufacturing distribution and concentration have contributed to regional inequality It concludes with a number of recommendations for regional policies that will reduce this inequality

Regional Economics Harry W. Richardson,1970-11-26 *Regional Dynamics* Gordon L. Clark,Meric S. Gertler,John E. M. Whiteman,2017-09-05 Originally published in 1986 This book is concerned with how regional economies adapt and respond to changing circumstances and especially with the spatial system and processes of restructuring Throughout the book there is a methodological commitment to adjustment theory a unique analytical framework for the study of the dynamics of

advanced capitalist economies Instead of homogenising space in the manner of neoclassical economic theory the authors focus on adjustment processes that produce and reproduce spatial differentiation The most important facets of regional economic structure are covered employment wages prices migration and capital investment in terms of their own dimensions and their connections with the larger theoretical framework Each part of the book develops one particular dimension of regional adjustment and each has an overview and summary Within each part there is a sequence of related studies focussing on the empirical aspects theoretical logic and distributive consequences of regional adjustment *Monthly Labor Review* ,1972 Publishes in depth articles on labor subjects current labor statistics information about current labor contracts and book reviews **Regional Economic Impact Analysis and Project Evaluation** H. Craig Davis,1990 This book provides a non technical introduction to the fundamental principles and techniques of regional impact and evaluation analysis The book is written for readers who have a minimal background in mathematics and economics and so the materials listed in the bibliographies have been chosen for their accessibility to such readers References to relevant papers of a more technical nature are indicated in notes in each reference Unlike existing texts which usually concentrate on regional impact or evaluation analysis Regional Economic Impact Analysis and Project Evaluation offers an extensive introduction to both these subjects since both are critical to the study and practice of regional economic analysis Two case studies intended as illustrations of practical applications are included in each of the six chapters that deal with specific principles or techniques While many of the case studies and much of the literature cited in the bibliographies is Canadian a substantial portion is from the United States and Great Britain demonstrating that the principles and techniques discussed in this book are universally applicable **Capital Mobilization and Regional Financial Markets** Kerry Odell,2017-11-30 Originally published in 1992 Capital Mobilization and Regional Financial Markets argues that barriers to financial flows within regions may be as important in affecting capital flows as interregional barriers The book conjectures that regional markets allow efficient mobilization of local funds and develops an analytical framework to motivate an investigation of region financial development in the Pacific Coast states between 1850 and 1920 Naturbanization Maria Jose Prados Velasco,2008-11-24 As the growth of the worlds population requires the continued search for residential space the urbanization of natural lands is an inevitable process but that process does not have to be one that is accomplished without regard for environmental quality This book presents the unique perspective of naturbanization the urbanization of protected a **Journal of Economic Literature** ,1972 *Air Transport and Regional Development Methodologies* Anne Graham,Nicole Adler,Ofelia Betancor,Volodymyr Bilotkach,Enrique J. The Dynamics of Growth in Emerging Economies Arzu Akkoyunlu Wigley, Selim Çağatay, 2018-12-19 How can Turkey increase its medium and long term growth potential Despite episodes of fast growth this has become a vital question for the Turkish economy in order to avoid being stuck in a middle income trap There has been an increase in the number of studies presenting growth in Turkey and quantifying the sources of economic growth however due to the difference in the main underlying assumptions and the time period covered in these studies the results differ The second strand of literature on growth in Turkey identifies the relative underperformance of the Turkish economy by developing models with microeconomic foundations Given the fact that there are a large number of studies investigating the macro dynamics of growth in Turkey the book s unique focus on the neglected issues in growth discussions closes the gap in the existing literature It addresses the

micro macro regional and gender aspects the environment energy growth nexus as well as the microeconomic dynamics of growth It also analyses the other significant determinants of long run growth in Turkey such as import dependency and saving investment decision The authors provide a macro overview of all of the precluded subjects in order to evaluate them in relation to one other as well as to derive policy conclusions from them This book primarily targets academics as well as graduate and undergraduate social sciences and humanities students both in Turkey and other countries It is also a must read for researchers and policy makers not only in Turkey but also in other developing economies and is of interest to specialists of non governmental and non profit organizations
