Rethinking Power, Institutions and Ideas in World Politics Amitav Acharya, 2014-01-10 The study of international relations has traditionally been dominated by Western ideas and practices and marginalized the voice and experiences of the non Western states and societies As the world moves to a post Western era it is imperative that the field of IR acquires a more global meaning and relevance Drawing together the work of renowned scholar Amitav Acharya and framed by a new introduction and conclusion written for the volume this book exposes the narrow meaning currently attached to some of the key concepts and ideas in IR and calls for

alternative and broader understandings of them The need for recasting the discipline has motivated and undergirded Acharya's own scholarship since his entry into the field over three decades ago This book reflects his own engagement, quarrels and compromise and concludes with suggestions for new pathways to a Global IR a forward looking and inclusive enterprise that is reflective of the multiple and global heritage of IR in an changing and interconnected world It is essential reading for anyone who is concerned about the history development and future of international relations and international relations theory

Complexity in World Politics Neil E. Harrison, 2012-02-01 Despite one hundred years of theorizing, scholars and practitioners alike are constantly surprised by international and global political events The collapse of communism in Europe the 1997 Asian financial crisis and 9 11 have demonstrated the inadequacy of current models that depict world politics as a simple mechanical system *Complexity in World Politics* shows how conventional theories oversimplify reality and illustrates how concepts drawn from complexity science can be adapted to increase our understanding of world politics and improve policy In language free of jargon the book's distinguished contributors explain and illustrate a complexity paradigm of world politics and define its central concepts They show how these concepts can improve conventional models as well as generate new ideas hypotheses and empirical approaches and conclude by outlining an agenda of theoretical development and empirical research to create and test complex systems theories of issue areas of world politics

Gender, Violence and Security Laura Shepherd, 2013-07-04 How do understandings of the relationships between gender violence security and the international inform policy and practice in which these notions are central What are the practical implications of basing policy on problematic discourses In this highly original poststructural feminist critique the author maps the discursive terrains of institutions both NGOs and the UN which formulate and implement resolutions and guides of practice that affect gender issues in the context of international policy practices The author investigates UN Security Council Resolution 1325 passed in 2000 to address gender issues in conflict areas in order to examine the discursive construction of security policy that takes gender seriously In doing so she argues that language is not merely descriptive of social political reality but rather constitutive of it Moving from concept to discourse and in turn to practice the author analyses the ways in which the resolution's discursive construction had an enormous influence over the practicalities of its implementation and how the resulting tensions and inconsistencies in its construction contributed to its failures The book argues for a re conceptualisation of gendered violence in conjunction with security in order to avoid partial and highly problematic understandings of their practical relationship Drawing together theoretical work on discourses of gender violence and international security sexualised violence in war gender and peace processes and the domestic international dichotomy with her own rigorous empirical investigation the author develops a compelling discourse theoretical analysis that promises to have far reaching impact in both academic and policy environments
